

How to

# Install or Update

1

You'll need a greyscale 1st to 4th gen running Rockbox to apply the theme.  
Install Rockbox if you don't have it installed!  
<https://www.rockbox.org>

2

Plug in the iPod  
Open it up in your computer's File Browser.

3, in the iPod's storage

On the computer, navigate to the **iPod's .rockbox** folder.

You might need to show hidden files to see this folder.

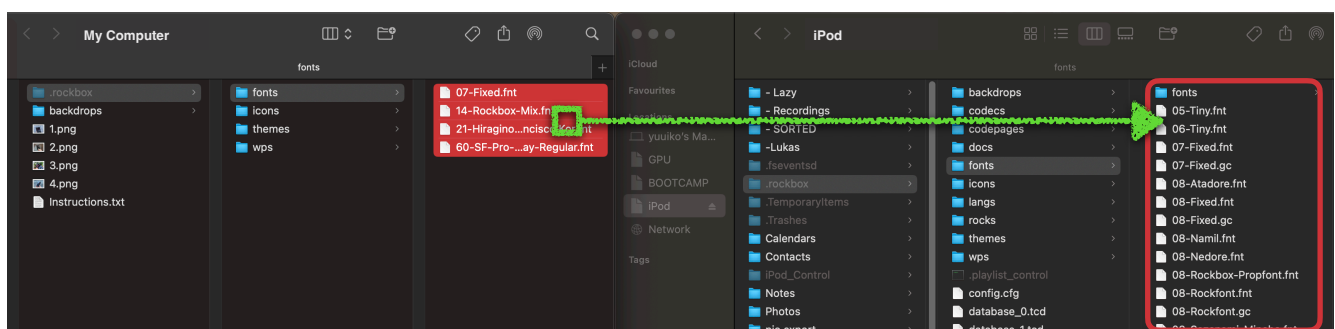

If you're on a Mac, hit [⌘⇧.] to toggle hidden files.

4, in your computer's storage

THIS folder you downloaded also contains a [.rockbox] folder.

Merge its contents into the [.rockbox] folder on the iPod, making sure to place the files in the right folders.

If updating, replace / delete any previous files or folders from older versions of this theme.

5

Eject and unplug the iPod once all files are in place.

6

On the iPod itself, boot into Rockbox.

Head to the theme settings to select the theme

or if updating to a new version of the theme, select the theme again.
