

A TASTE OF SORCERY

Written and illustrated
by
Hermia Idril

Oasis city of Tarrehin

Mmm this should be..

Ah yeah!
This is the place

This random alley?
I thought we were heading
to your friends shop?

We are.

Now let's see
if I remember
this right.

Hmm should
be this one

Yes!

Right through he-

?!
?

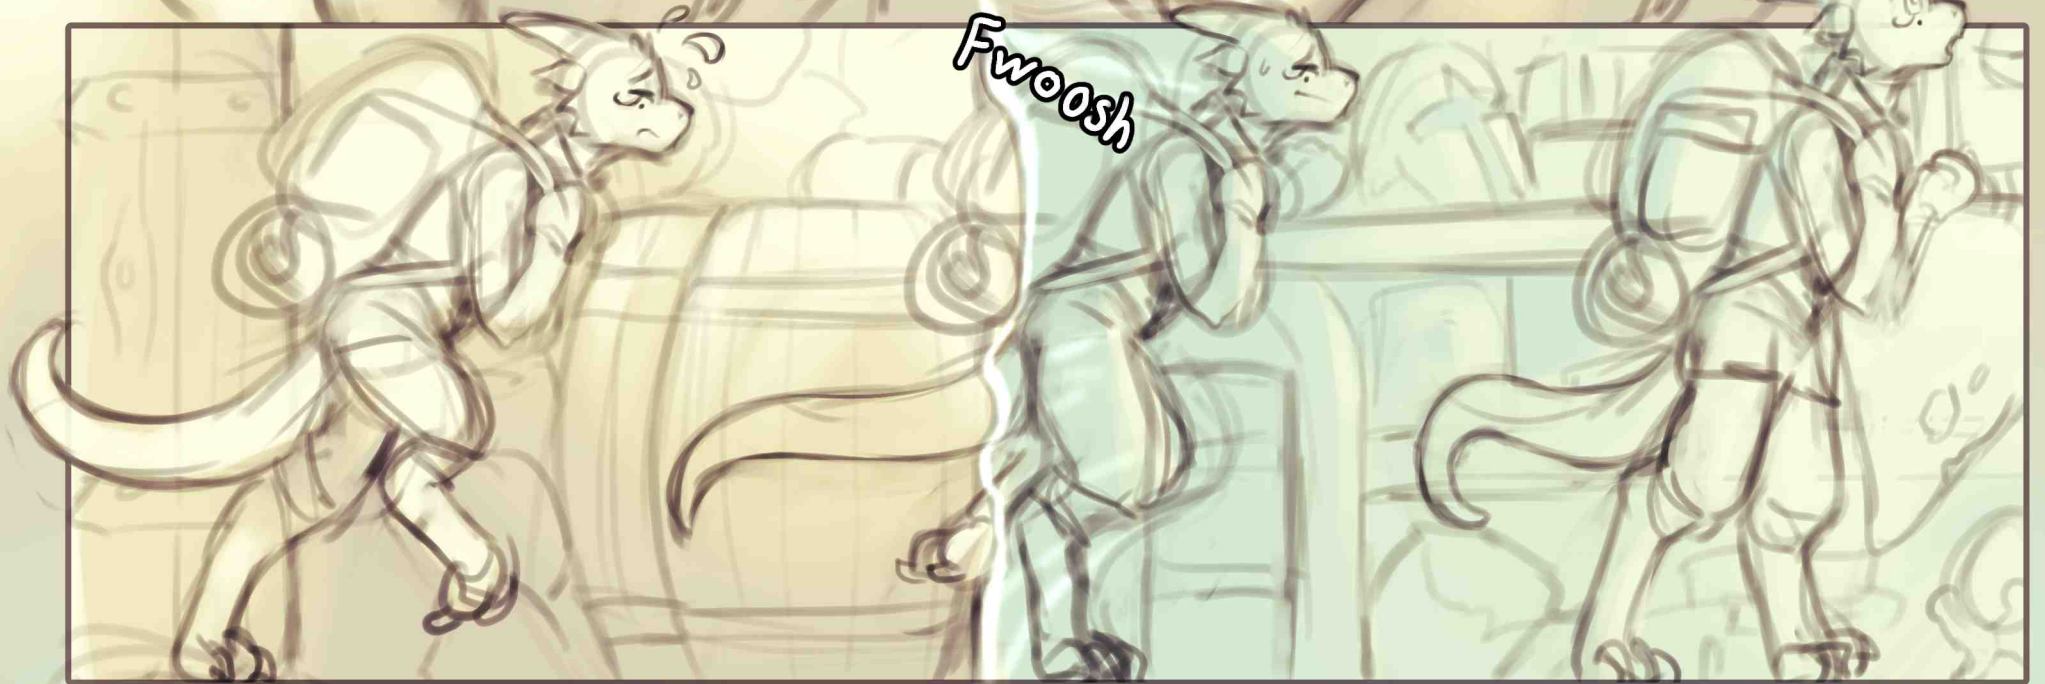

Ehmm

Eri?...

ooo

No? ok..

Alright Siffo you can do it just like Eri.

Fwoosh

There you are sweetie.

What was that?

It didn't feel like an illusion

It's a hidden plane shift spell.

Explains why the air got cooler.

Bit risky for most spell casters. But Lapal knows what she's doing.

Well I don't know if I would call it hidden any more

Since you stumbling your way through it by accident...

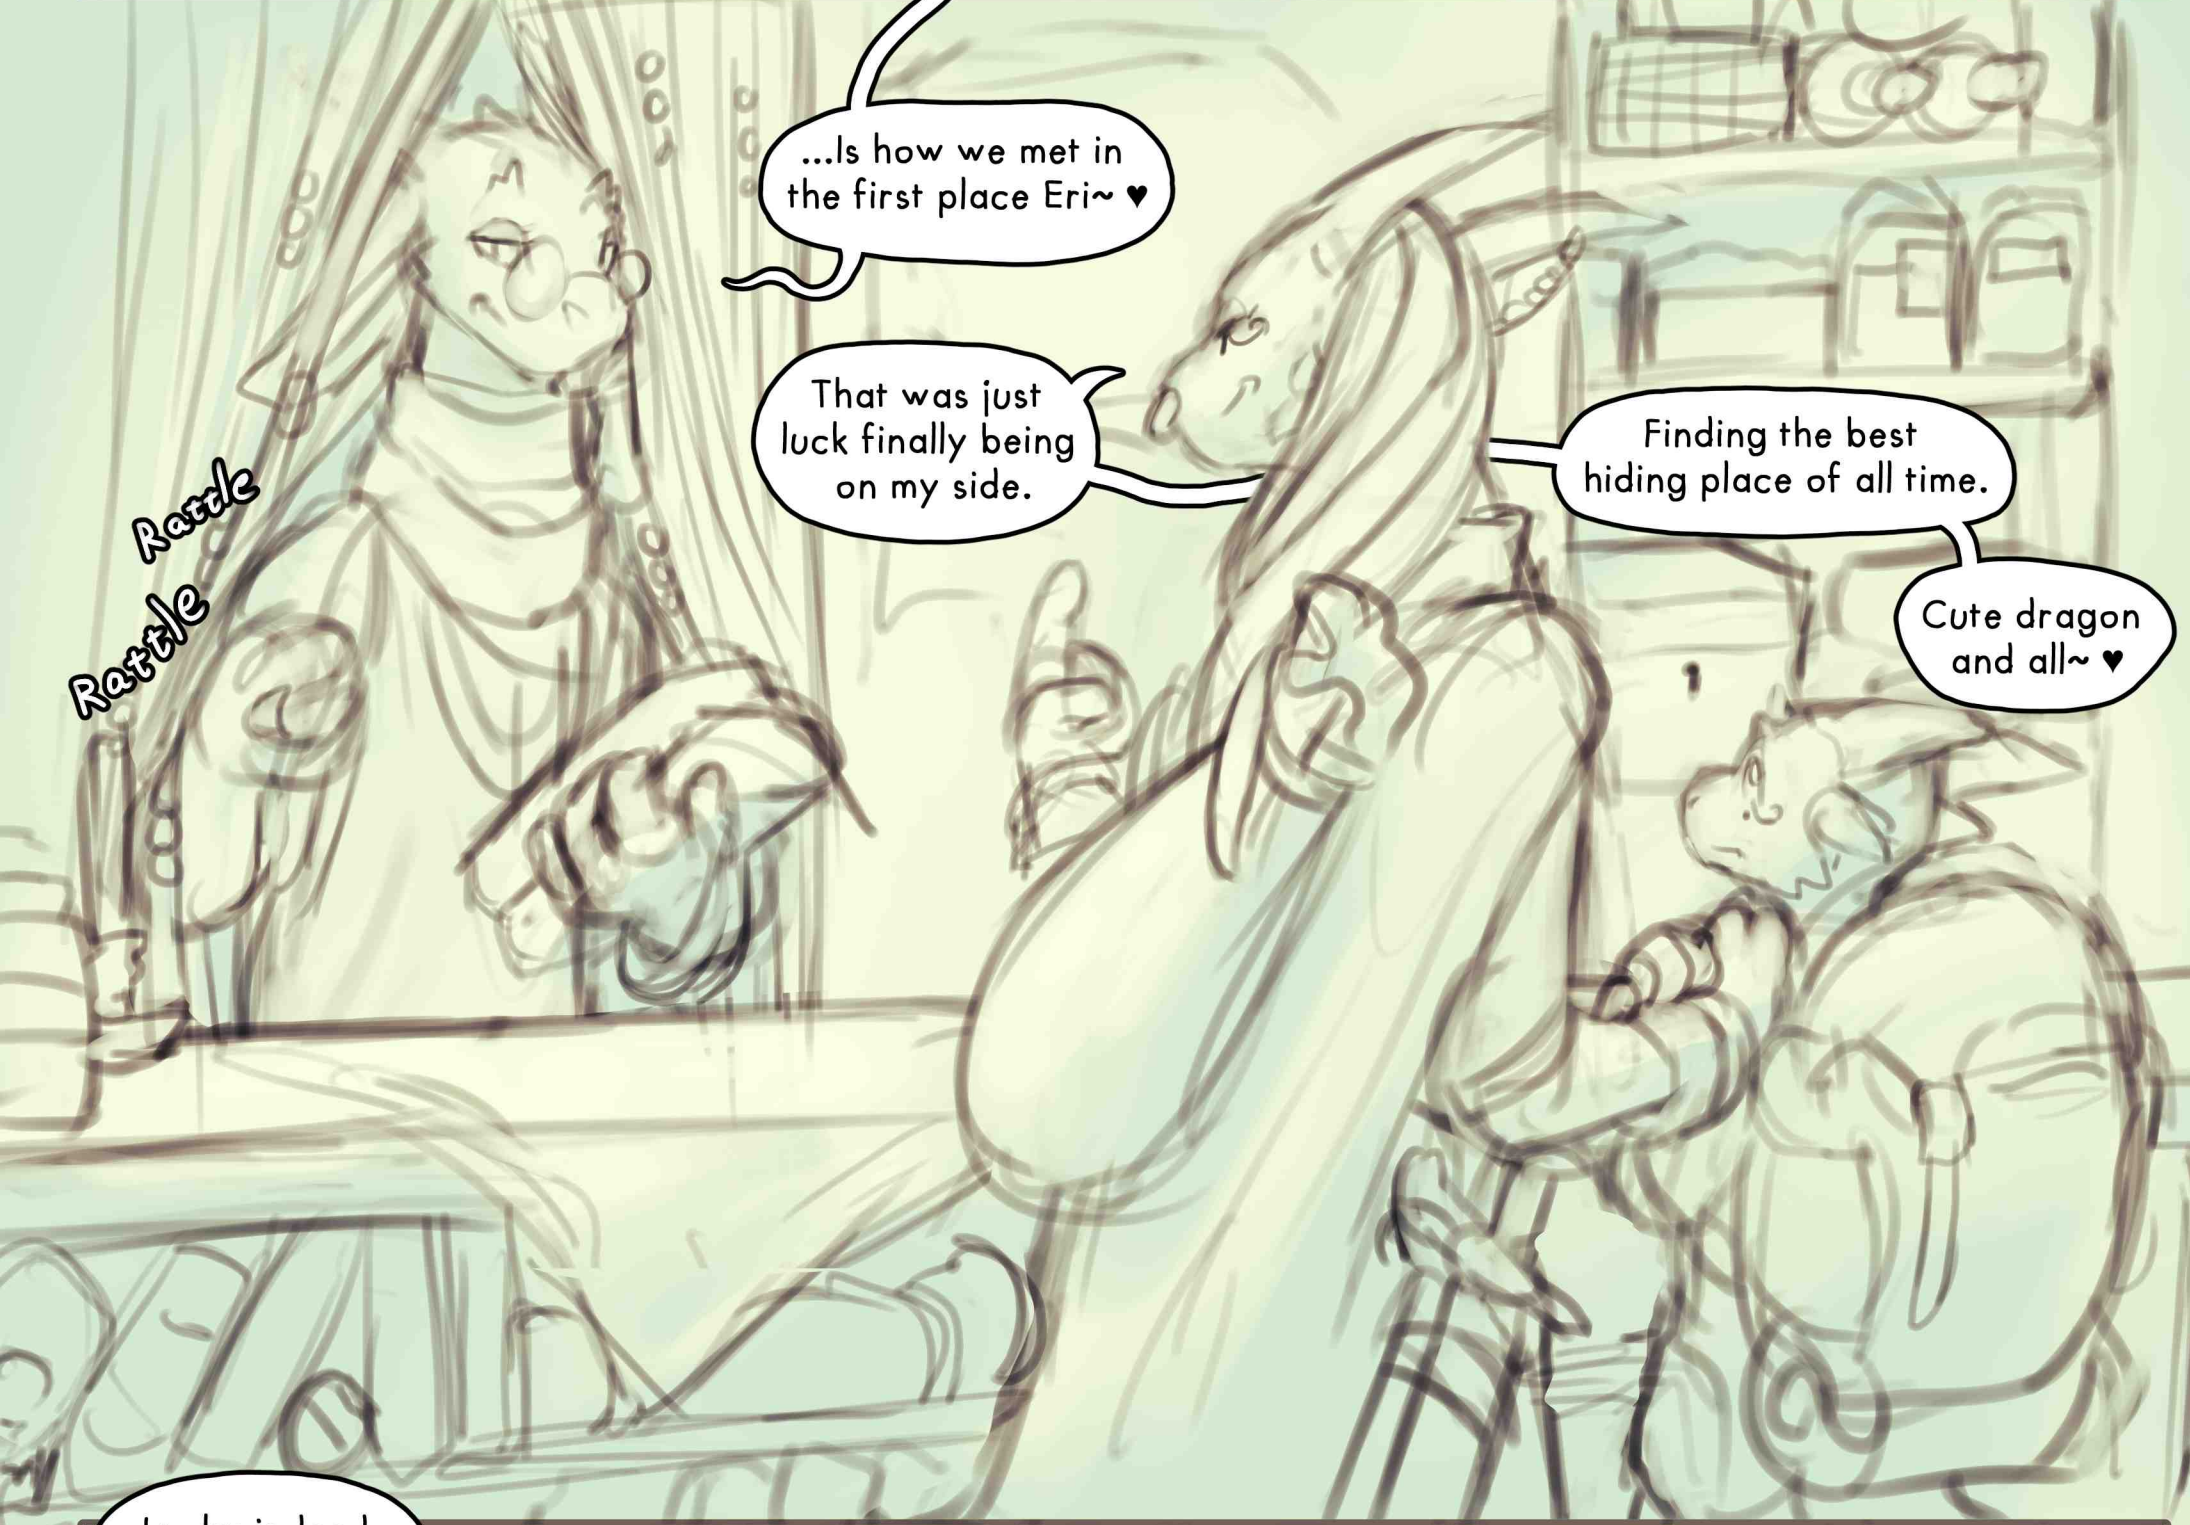

...Is how we met in the first place Eri~ ♥

That was just luck finally being on my side.

Finding the best hiding place of all time.

Cute dragon and all~ ♥

Rattle
Rattle

Lucky indeed, for both of us~

So what can this "cute dragon" help you with more exactly?

In your last few letters you mentioned looking for new ways to use magic.

POMF!

Don't Really know what avenues you've explored in your exploits into the world of magic.

But I do believe I have most of what a Junior magician might need

Magical Staffs

Enchanted rings

spell foci

Powerful tomes

Even magical potions for those who dabble in the alchemical.

Well those all sound quite interesting and helpful to me.

But reason we are seeking you out, is for my fiancé

-it's...

..because I need some help with my magic

Oh?

Well, how do I put this ...

I need your help finding some means to connect me to the flow of magic in the way Eri, and I can only assume, you are.

I've read all the books Eri has on magic and have tried all manner of spells. But no matter how I try I can't get it to work.

Just feels like trying to light a fire without fuel.

Eri said you'd helped her before and might be able to help me.

So can you help me figure out just what I'm doing wrong?...
