## PAPER MINIATURES

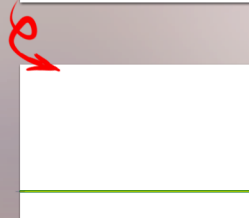

You may find it easier to work on one component at a time, and in light of that, you may want to separate the page like so:

**Tip:** Use a sharp craft knife and a metal ruler!

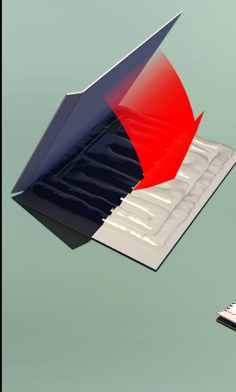

Slit the page at the edge of the dotted red lines as shown here in orange.

Flip the page and score it using those slits as a guide. This is shown in green.

Score down the black dotted line as shown in green.

It is also helpful to slit the bottom tabs below the red dotted line as indicated here by the orange line.

Apply glue to the back of the mini. Be sure to keep the tab portion dry!

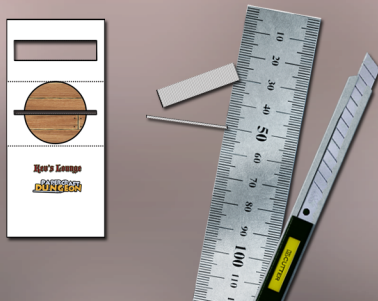

Fold the mini closed, and apply pressure.

Cut out the mini with a sharp craft knife. We've provided a generous black border, so you don't need to be too precise, unless you want to!

Color the white edges with a black marker to get a nice professional finish!

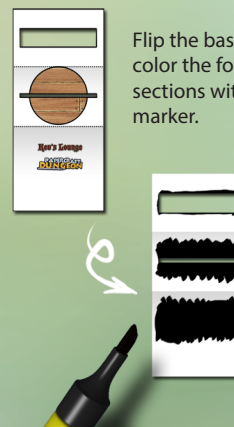

Cut the slots out of the base.

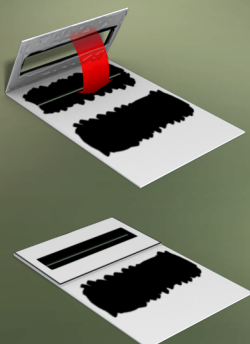

Score along the dotted lines as shown here in green.

Flip the base over and color the following sections with a black marker.

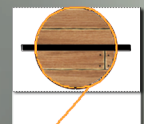

Glue down the first flap.

Glue down the second flap.

**Important!** Don't get glue in the center slot!

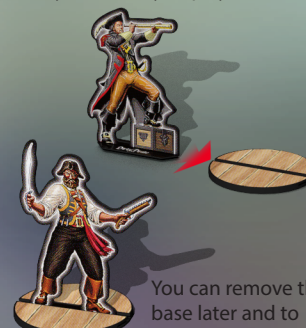

Cut out the disc with a sharp pair of scissors!

Color the white edges in with a black marker.

Slide the mini into the base and you're ready to play!

You can remove the base later and to store everything flat!
