## TWINVOLT DAGGERS

Dagger, uncommon (requires attunement)

This pair of magic daggers have small blades and long handles made of gold and iron. Inside each of them, there's a bluish-green gemstone. Looking closely at the gem, you can see bolts of energy flowing inside it, like a trapped storm.

You have a +1 bonus to attack and damage rolls made with these daggers. When you hit the same creature with both daggers in the same turn, the creature takes an extra 1d6 electric damage and can't take reactions until the end of your next turn.
