BEEDAL

Real Name: Beedal (last name unrevealed).

Other Aliases: None.

Occupation: former Captain in the Sektan Authority space fleet, defector, adventurer.

Identity: Publicly known.

Legal Status: Expatriate/fugitive of the planet Sekta Prime

Place of Birth: Sekta Prime.

Marital Status: Single.

Known Relatives: None at this time.

Group Affiliations: Formerly the Sektan Authority, formerly associated with Locus, formerly associated with Doctor Pupae, currently associated with Cami-li-Cat and Puma.

Base of Operations: Formerly the planet Sekta Prime, currently none.

First Appearance: Locus #1 (2011)

History: Very little of Beedal's history is actually known. This is largely due to the fact that, as a former Captain of the Sektan Authority, his background records are tightly sealed and deemed "eyes only" information that, to date, have been reserved for high-ranking Sektan military personnel. What is known however is that Beedal was enlisted by Doctor Pupae to pursue the fugitive Locus. Pupae had always appreciated Beedal's effectiveness and skill, and determined that he would make an excellent agent for the job at hand.

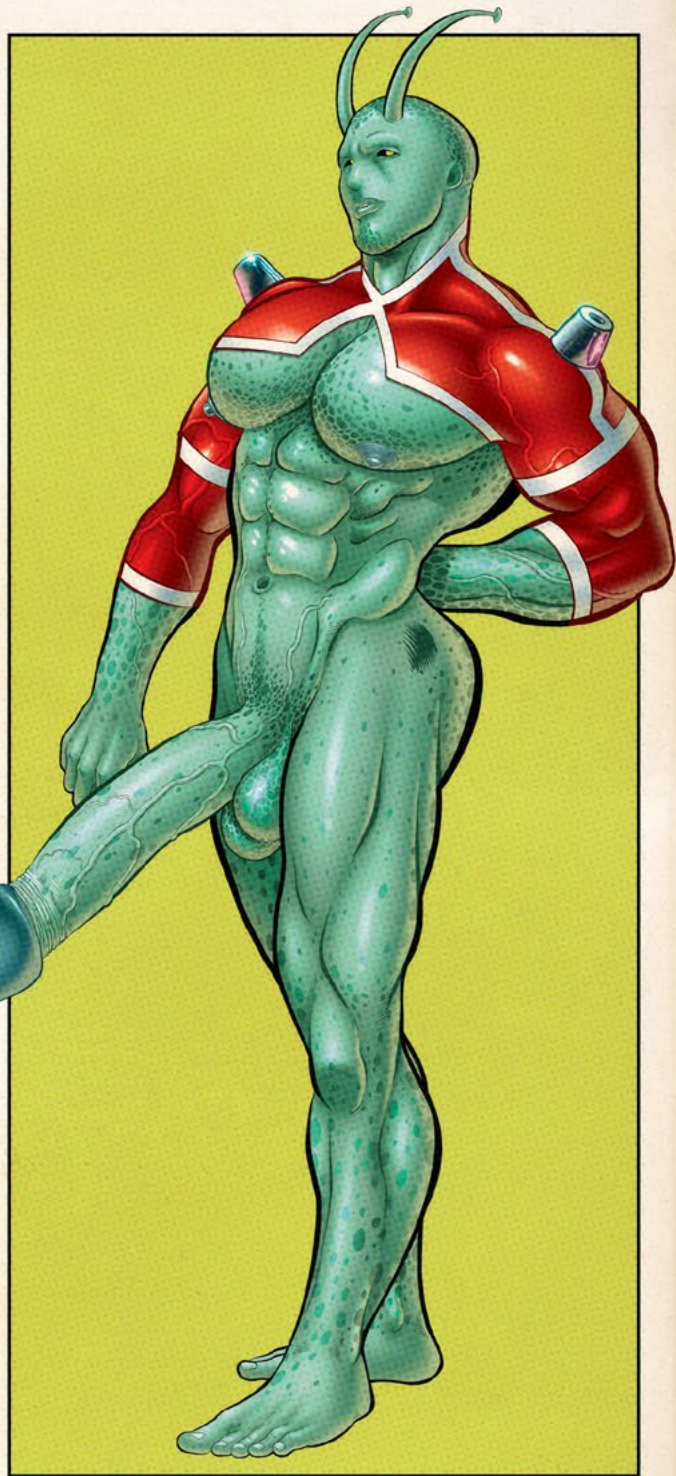

Beedal tracked Locus and eventually found him turning tricks for a living on planet Suktamimus. The Captain and his guards descended upon Locus and proceeded to apprehend him. While Locus did try to resist, Beedal had him shot and stunned.

Locus was brought aboard Beedal's star cruiser to be extradited back to Sekta Prime where he was to face forceful extraction of his semen, (which was intended to be delivered to the Sektan Queen as per Sektan law). Eventually, Locus would face execution in the Caves of the Soubbapilars.

It would all have been a done deal except that Beedal found himself curiously drawn to Locus. The Captain had been deeply closeted his entire life – a necessity in Sektan culture if one wishes to serve in the Sektan Authority, or more importantly, avoid incarceration and even death at the hands of the government. For years his true self had remained dormant, but this intense attraction to Locus awakened feeling and urges in Beedal which had gone ignored for far too long.

Beedal and Locus became intimate and making up for years of lost time, Beedal fucked his prisoner in his cell. For his part, Locus also began to develop affection for Beedal, discovering that the Captain was not the callous and unyielding man he initially believed him to be. At first, Locus thought he could use Beedal to facilitate his escape, but his plan backfired when Beedal began regretting his affiliation and fornications with Locus. The Captain decided to leave his prisoner in the cruel hands of Doctor Pupae.

Locus would have perished in the Caves of the Soubbapilars, but at the last possible moment, Beedal transported him to safety. The two of them believed they had "faked" Locus' death, providing the Sektan Authority with sufficient reason to depart the area, which in turn would leave Beedal and Locus free to flee Sekta Prime for good.

Their success was short-lived however, as it was discovered that Beedal had indeed assisted Locus in escaping his sentence. Desperate to flee Sekta Prime, Beedal and Locus realized their only means of escaping the planet was to win the money necessary to purchase a space vessel. Foolishly, the two men resorted to entering a seedy Bijaahkt gambling tournament.

Having very little currency to use as buy-in, Beedal allowed Locus to serve as "Tahk-Gokt", a living bet or buy-in. Locus was stripped and "prepared" to be presented to all of the players involved while Beedal frantically hoped that his card-game skills were up to snuff.

Unfortunately for the former Captain and his young ally, they were not. Not only did Beedal lose the match and lose Locus in the process, he also ended up losing his own freedom, he himself becoming the property of the winner. Both Beedal and Locus was ravaged and abused by all the other Bijaahkt players, until Doctor Pupae and the Sektan Authority crashed the party and arrested all involved.

Pupae who had always rather liked Captain Beedal offered him a choice. Beedal could return to the Sektan Authority and serve directly under Pupae and all would be forgiven... providing he would forget he ever met Locus and allow him to be taken by Pupae for experimental purposes. Reluctantly, Beedal agreed, and miraculously, Pupae remained true to his word.

As Locus was hauled off, Beedal's heart broke into a million pieces, but even so, his keen mind was already beginning to formulate a plan. He would betray Pupae and find a way to save Locus yet again.

Good intentions aside, Beedal couldn't have anticipated that Pupae would be one step ahead of him, not entirely trusting the reinstated Captain. His window for rescuing Locus had closed, and now Beedal was forced to seek out Camili-Cat and

Puma, former associates of Locus for help. He tracked the two Felinoids to the home of Admiral Zygan where he narrowly saved them from certain death.

Now the three men are working in tandem, racing against time to save Locus from Doctor Pupae's twisted plans. Beedal leads the way as he alone knows the inner workings of the Sektan Authority, and how to avoid them. He desperately hopes that his knowledge of Pupae's methods and installations will eventually lead to him and Locus being reunited.

Gender: Male.

Sexual Orientation: Homosexual

Height: 7'3 (to tips of antennae, 7'0).

Weight: 210 lbs.

Hair: None

Skin: Mint green.

Spots: Dark green and ample.

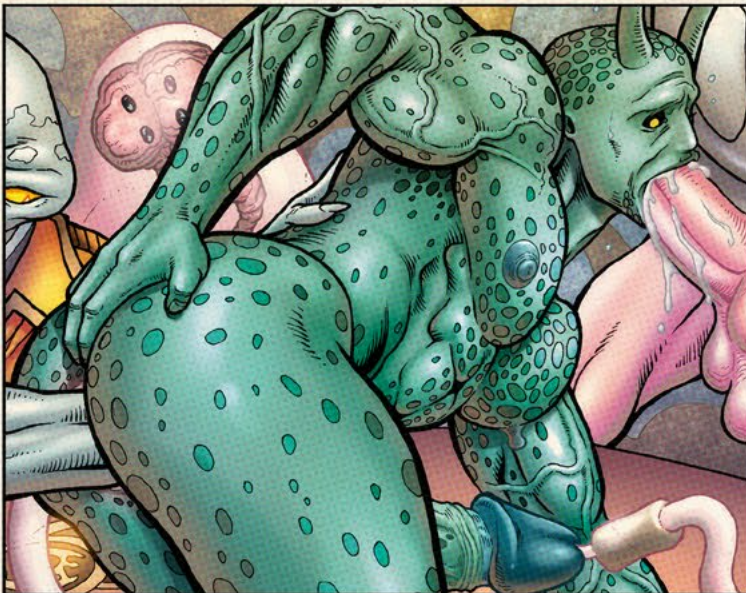

Eyes: Yellow.

Penis: 12 inches, uncircumcised.

Known superhuman powers: Beedal has no particular powers per se. However, being a Sektan male in his late thirties, he does possess exceptional strength, speed and agility. His senses are also extremely acute.

Beedal is well versed in many forms of hand to hand combat. His knowledge of weaponry is extensive, and he can use most firearms with deadly accuracy.

He's a skilled pilot and engineer, and his military training has considerably honed his already sharp mind. He's a cunning strategist and charismatic leader, efficient, swift, and determined in every way. ■

CAMILI-CAT

Real Name: Cam.

Other Aliases: Cami, Puss, Boy Pussy, Kitten, Tiger.

Occupation: Adventurer.

Identity: Publicly known.

Legal Status: Former citizen of the planet Felainus, now none.

Place of Birth: The planet Felainus Prime.

Marital Status: Single.

Known Relatives: Mylessa (mother, deceased), Cal (Father, presumed deceased), Mina (sister).

Group Affiliations: Member of the Guardians of the Cube for a very brief time, currently none.

Base of Operations: His shuttle, the Mina, which he named after his sister.

First Appearance: Magma Forces #5 (1986)

First Modern Appearance: Camili-Cat: Felinoids #1 (1999)

History: Cam was a young boy when his home planet was invaded by a malicious race of aliens known as the Renoxamorphs. The invasion was brutal, and the wars fought saw many Felinoid casualties. Cal, Cam's father was lost early on in the conflict, as he was a general in the Felinoids' defense army. Soon after, Cam's mother took him and his small sister, Mina, and attempted to flee their doomed planet. The trio was captured and subjected to horrible treatments by the invading enemies.

Cam in particular was forced to endure all manner of indignities as two especially twisted Renoxamorph slave traders took a special interest in him. Thus, the boy's training as a sex slave began, and much to their pleasure, Cam seemed to exceed their expectations with his voracious sexual appetite.

One fateful day, the Renoxamorphs who enjoyed tormenting Cam to no end, executed his mother before his very eyes. They told him that they had done the same to Mina only hours earlier. Later that night, Cam managed to incapacitate the guards watching him. He stole a small ship, and fled, leaving his doomed home world behind forever.

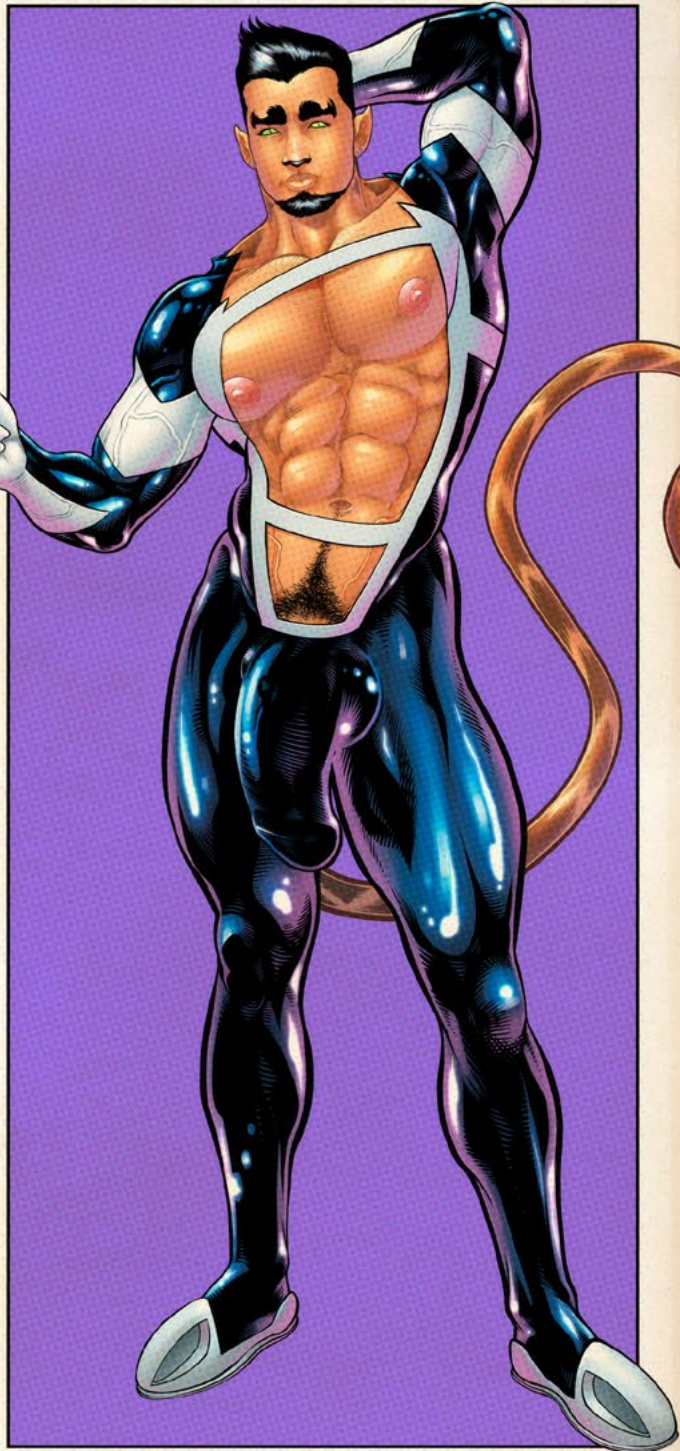

Eventually, Cam's stolen shuttle was intercepted by a man named Tahl. The young Felinoid was apprehended and shackled. Tahl recognized that he had happened upon a rare commodity. Young Felinoid males were sought out as sex toys throughout the galaxy, and they were rare finds indeed.

Tahl took Cam to the planet Darria and put him up for sale at auction. That is where Cam and Locus first laid eyes upon one another. Locus used the last of his money in order to purchase Cam and free him.

The two young men became lovers, and helped each other survive the dangers of the Darrian street life.

Locus gained employment with a vile intergalactic gangster named Slavva, but for his part, Cam couldn't stomach Slavva or the idea of Locus working for the man. He implored Locus to leave Slavva, but Locus knew that such a thing was not possible. Cam tried to be supportive, but he couldn't abide the things that Slavva had Locus do. Eventually, he and Locus parted ways.

Cam left Darria shortly after leaving Locus, and he spent several months fending for himself, but eventually he met a Sivan female named Felicia. The two became fast friends, and decided to stick together, continuing on their way throughout the galaxy.

Cam's interstellar travels brought him to the planet Earth. For a brief time, he became a member of the Guardians of the Cube, but eventually left the team in favor of resuming his search for survivors of the Felinoid race.

This was his primary goal: finding other surviving members of his species. He was consumed by this need to not be the last surviving Felinoid in the Galaxy. Along his search, he made a few friends such as Felicia and Locus, but he has regrettably managed to make far more enemies.

Still, no matter what kind of trouble Cam lands in, it seems that his exceptional prowess as a lover and ample endowment always manage to bail him out of even the stickiest situation.

Locus eventually returned to Cam's side, providing him with vital star charts and clues that led Cam to a mysterious planet called Pillahr. Allegedly, Felinoid survivors resided there. But before Cam could set a course for Pillahr, he and Locus had a terrible disagreement. Locus left in anger, and Cam chose not to go after him, but to resume his search for his kinsmen instead.

On Pillahr, Cam was reunited with an old friend, a fellow Felinoid named Lanor. This greatly encouraged Cam since for the first time in several years, he now knew that he was not the last of his kind. Along with Lanor's help, Cam continued to search the strange jungle planet, every step taking him closer and closer to his ultimate destiny. When he finally found a band of surviving Felinoids, he discovered they had been enslaved by his sister Mina, whom he thought had perished years ago.

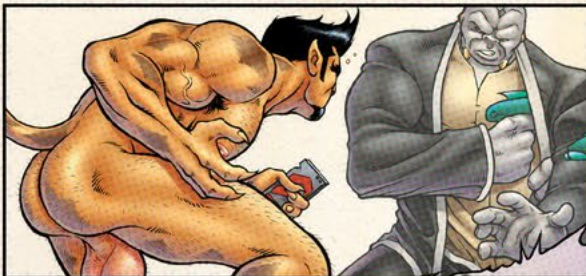

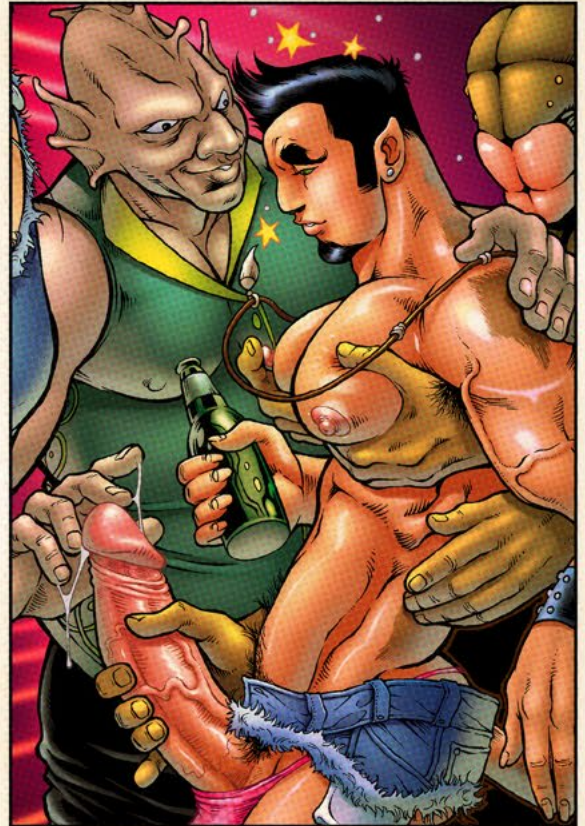

Mina had gone insane thanks to the abuse she'd suffered at the hands of the Renoxamorphs. Now twisted and evil, she had become the cruel leader of a band of interstellar marauders. Meanwhile, Locus who was feeling like a real shit for the way he had acted with Cam, brought together his new allies, Captain Jung, Flamer and Disco, along with Felicia and her companion Slith, and formed a rescue team which eventually aided Cam in liberating his fellow Felinoids and defeating Mina.

Ever the wandering spirit, Camili-Cat found he could not sit still and remain on Pillahr, so he and Locus left the colony, choosing instead to roam the galaxy in the pursuit of adventure.

When Locus again left Cam's side to flee the Sektan authority – he did not wish to endanger Cam by bringing their wrath down upon his Felinoid lover – Cam was captured by Dr. Pupae. The twisted Sektan scientist modified Cam's DNA, increasing his strength, endurance and durability.

Before Cam escaped the mad doctor, Pupae lied to him, telling him that Locus had been killed. Devastated, Cam went on a self-destructive bender, which ended with him becoming a servant of the space tyrant named Nelvo Plour.

While in Nelvo's possession, Cam met Puma, a Felinoid/Sivan halfbreed who informed him that Locus was still alive. Cam realized that Pupae had lied to him, deliberately trying to cause him pain and heartache. This prompted Cam to steal Nelvo's "Pleasure Dome" sex yacht, and accompanied by Puma, the two Felinoids have taken off in search of Locus.

Gender: Male.
Sexual Orientation: Bisexual.
Height: 6'2.
Weight: 195 lbs.
Hair: Black.
Fur: Orange with brown stripes.
Eyes: Emerald green.
Penis: 12 inches, uncircumcised.

Known superhuman powers: Cam has no particular powers. However, being a Felinoid male in his late twenties, he does possess exceptional strength, speed and agility. His senses are also extremely acute. Additionally, the genetic modifications which Dr. Pupae has made to Cam's DNA have greatly augmented his strength, speed, agility, stamina and endurance.

On occasion, Cam wears a special flight suit which enhances his physical capabilities, thus further amplifying his strength ten fold.

He has also employed flight packs in the past which permit him to fly at limited speeds and for limited amounts of time. Not recommended for high velocity use, these flight packs are used primarily as a means of traversing distances in a short period of time, or to avoid rough or difficult terrain by foot.

Cam is well versed in many forms of hand to hand combat, and though he abhors violence (no doubt a result of his troubled childhood), he is not to be trifled with, more than able to defend himself.

His knowledge of weaponry is also quite vast, and he can be a deadly marksman. He favors a mini pistol that has limited range, but great accuracy.

Notes: As a lover, Cam is exceptionally skilled. The things he can do with his anatomy are the stuff of legend on the pleasure planet Suktamimus. His extensive training as a sex slave has greatly augmented his sexuality, and his Felinoid heritage makes him a naturally sensual and deeply sexual being. If laser pistols can't solve a problem, then surely his massive, impossibly hard dick will. ■

DEIMOS

Real Name: Deimos (his human middle and last names have never been revealed).

Other Aliases: The Taro Demon.

Occupation: Former farmer. Former angel of God. Former fallen angel turned demon turned champion of Heaven. Ally to Isaiah Shade and Julio Flores. Boytoy of Silas Lafoy. Adventurer.

Identity: Publicly known.

Legal Status: Inapplicable.

Place of Birth: Specific location unknown, though thought to be somewhere in ancient Greece, thousands of years ago.

Marital Status: Single.

Known Relatives: None identified at this time.

Group Affiliations: Heaven's Elite.

Base of Operations: Cape Elizabeth, Maine, United States.

First Appearance: Deimos #0 (2004).

History: Much of Deimos' earliest origins are shrouded in mystery, and virtually nothing is known about his life as a human. We know he was born in ancient Greece, and while rumor has it that he was the son of a simple farmer, nothing can be substantiated at the present time. The details as to the kind of life he led then have yet to be revealed.

Also shrouded in mystery are the events leading to his becoming an angel of God and the role Deimos played while imbued with his Heavenly powers. It was initially thought that Deimos fell from Heaven alongside Lucifer (Bob) and was subsequently remade into a demon countless years ago, but that supposition has since been proven false.

Conceivably, Deimos' fall from Grace happened several thousand years after Bob's descent, but only now are the hints and details as to the circumstances of Deimos' own descent into Hell surfacing. While Deimos himself stubbornly prefers never to discuss these events, the origins of his path to redemption, at least, are well known.

After thousands of years of evildoing as a demon of Hell, Deimos began to remember his life as a human, and eventually his life as an angel. Remembrance brought with it a longing to leave behind his life of evil and seek forgiveness with the All Mighty in order to once again become an Angel of Heaven.

A deal was struck. Heaven would grant Deimos forgiveness if he agreed to fight for the side of good in the war between Heaven and Hell, and a prophecy was born.

The prophecy stated that Heaven's greatest champion in the war against Hell would rise from Hell. While Deimos began his journey towards absolution, secretly praying to Heaven and searching for a way out of the bowels of Hades, a young man by the name of William Zambu, better known as Billy, was chosen by the Divine to make the prophecy come true.

As Billy set about trying to summon Deimos to our Earthly plane, he was ambushed by some of Bob's deadliest demonic hordes. Meanwhile, in Hell, Deimos was uncovered as a traitor, and as punishment Bob had him skinned alive and emasculated a thousand times over.

The battle on Earth raged for days and Billy, though wounded and permanently blinded in the conflict, rose victorious. He used his incredible magics to

create a new body for Deimos from the body parts of his fallen demonic adversaries. Then Billy mystically freed Deimos' soul from the bowels of Hell and placed it within the new vessel.

Newly able to move freely on Earth, Deimos was ready to begin his long and arduous journey toward absolution. As a show of its Divine endorsement, Heaven gave Deimos his halo back. He wears it as an earring on his left ear.

His wings, however, are another story. The symbol of angelic divinity, they will have to be earned through sacrifice and selflessness. While those concepts are not new to Deimos, they had been long forgotten, making his current trek one fraught with hardship, peril and inner struggle.

In 1982, Deimos had recently arrived on Earth, rescued from the bowels of Hell by Billy Zambu.

At this point in his life, Deimos is a relatively inexperienced Demon. Despite his thousands of years of life as a demon, physically, he appears to be in his early twenties. He's constantly horny, completely impulsive and governed by the wants and desires of his id.

Deimos turns up in Maine, sent there by Billy to protect Isaiah Shade from demonic attack. No one ever suspected that the dreaded White Worm would attack mere moments after the Taro Demon's arrival.

To make matters worse, Deimos is unskilled at controlling his incubus powers. Unbeknownst to everyone, Deimos included, his influence washes over Isaiah and Julio Flores, making them both lust after him in an intense way.

While this makes Julio more aggressive and brazen, it makes Isaiah begin to question his own sexuality and motives.

Deimos remained at Isaiah's side for several months as the sexual tension continued to mount between them. While Deimos was more than willing to get it on with Isaiah, the latter continued to fight his desires... and Deimos' not inconsiderable, though not deliberate influence. It seems that just as the pair was about to concede to their feelings for one another, Deimos caught the eye of the eccentric millionaire, Silas Lafoy.

Secretly a dark priest and the leader of the Disciples of the Great Dreamer, Lafoy set his sights on Deimos and abducted him. He imprisoned the young demon, shaving him from head to toe, leaving only the hair on his head and under his arms intact, and branded his right testicle with his initials, the symbol of his power, mystically binding Deimos to his side.

As Lafoy's boytoy, Deimos was permitted only to wear either the most ridiculously flimsy thongs, barely capable of containing his ample endowment, or, at times, nothing more than a golden bow tie.

In the months as Lafoy's prisoner, Deimos was used and abused sexually, in all sorts of depraved ways, often making him regret possessing a penis. To Lafoy, "owning" Deimos, a strikingly beautiful, otherworldly creature well-known for his might, was a monumental symbol of his power. He often displayed his young captive to his peers in the most provocative ways possible in an attempt to bolster his social standing, and would occasionally allow them to play with Deimos sexually for their amusement.

Deimos attempted escape on numerous occasions, only to learn the hard way that, as long as his flesh bore Lafoy's initials, he was powerless to free himself.

Meanwhile, for nearly two years, Isaiah searched for Deimos, determined to find him and profess his true feelings to him, but Lafoy has been clever in concealing his prisoner. Now however it seems that Isaiah has finally caught a break, and with the help of the Gargoyle clan, he may be closer to rescuing Deimos than ever before.

Gender: Male.

Sexual Orientation: Homosexual

Height: 6'2 (to tips of horns, 6'5).

Weight: 213 lbs.

Hair: Jet black.

Skin: Purple.

Eyes: Violet.

Penis: 14 inches, uncircumcised.

Known superhuman powers: As an Incubus Demon, Deimos possesses superhuman strength, endurance, stamina, speed, agility, reflexes and durability.

Like all Incubi, Deimos can draw upon the life force of certain individuals in order to heal his own wounds. This typically works best during sex.

While this ability is handy, it doesn't seem to work with everyone he encounters. The degree to which he can heal and the rate at which this occurs can vary tremendously, although his use of this ability, or ability to wield this power is predictably and extremely effective with specific individuals such as his close friends Isaiah Shade and Julio Flores.

Like other Incubi, Deimos can also produce extremely potent pheromones that grant him the ability to "seduce" individuals, and place them under his control to some degree. While a part of Deimos' repertoire of demon-borne powers, he does not have complete mastery of this ability. It is often triggered accidentally, and sometimes, without him even realizing it.

Yes, Deimos' arsenal of demonic abilities are impressive, and his status as a sort of half-demon, half-angelic creature add to his might considerably, but he has never had much appreciation for the more mystical aspects of his powers. Typically, the young demon prefers good old-fashioned fists and brute force to emotional or sexual manipulation. ■

DEVILHOUND

Real Name: Blaine Howard.

Other Aliases: None.

Occupation: Former stockbroker, turned avenger of broken hearts and professional adventurer.

Identity: Not publicly known.

Legal Status: Citizen of the United States with no criminal record, presumed deceased.

Place of Birth: Beijing, China.

Marital Status: Widower.

Known Relatives: Richard Howard (father, deceased), Liang Song (mother, presumed deceased).

Group Affiliations: Member of the Brigayde. Sons of the Night.

Base of Operations: Formerly the Armistice Estates, Gateway City. Currently operating from the Mount Almas Marshlands.

First Appearance: Rapture #5 (2013).

History: The only son of wealthy business tycoon Richard Blaine and his girlfriend Liang Song, Blaine inherited a large fortune when his father died. For years, Blaine tried to track down his mother without success, coming to the conclusion that she had most likely passed away as well.

Blaine followed in his father's footsteps, himself becoming a very successful stock broker. Along the way, he met Kyle Travell, the man who would become his husband. Shortly after their wedding, Blaine caught Kyle cheating on him. Kyle revealed that he was only interested in Blaine's money and had no genuine love for him at all.

Devastated, Blaine wandered the rain-drenched streets of Gateway City for hours until meeting a mysterious elderly Chinese man who offered him shelter. Blaine followed the stranger back to his home. There, Blaine heard — felt — a bizarre humming coming from a slender wooden box on a shelf. Inside the box was an ancient, enchanted devil's tail.

The old man explained that the tail was drawn to Blaine's grief and that his broken heart had awoken it. Under a strange hypnosis, Blaine allowed the old man to insert the tail into his anus, transforming him into Devilhound, the avenger of broken hearts.

Under the tail's spell and the old man's control, Devilhound used his new-found powers to dispatch his cheating husband, as well as dozens of men who had cheated on their loved ones. Though the tail cannot be removed from his body, Devilhound was eventually able to break free of his new master and of the tail's control.

Desperate and afraid, he sought shelter with the Brigayde. He became a member of the team and continued his struggle to remain in control of his own actions, continually fighting against the tail's incredible will for dominance and worried that the old man would someday find him.

Mere weeks after joining the Brigayde, Devilhound encountered Jon Dazy. Dazy had been on the run, pursued for a crime he hadn't committed. Devilhound could have apprehended the fugitive, but instead the two were instantly drawn to one another.

Secretly, they began an illicit affair, meeting often for sex and hours of getting to know one another in Gateway City's Coconut Oil Motel.

Desperately afraid of what his teammates might do should they learn of his affair with Dazy, Devilhound hid the truth from them for as long as he could. However, when Dazy was eventually apprehended, the truth came out and Devilhound was faced with a devastatingly difficult choice.

He could try to help Dazy escape or allow him to be turned over to the authorities and eventually remanded to the custody of Dr. Harry Cartright for rehabilitation. Ultimately choosing to do what was expected of him, Devilhound stood aside as his lover was carted away to the Fraserview hospital for the criminally insane.

Devilhound quickly found that he could not live with his decision, and proceeded to break Jon Dazy out of the hospital. Unfortunately, in the process, Dazy was shot and killed by Dr. Cartright. Utterly heartbroken, Devilhound destroyed the hospital, setting it ablaze, inadvertently releasing all of its inmates and patients into the world.

Hunted by Cartright and his band of armed security guards, Devilhound fled to the Mount Almas Marshlands. There he buried Dazy's remains, certain this would be the last he'd ever see of his slain lover.

Mere moments after the "burial", Cartright caught up to Devilhound and shot him with armor piercing rounds, the only ammunition strong enough to pierce Devilhound's near-invulnerable flesh.

The mortally wounded Devilhound barely managed to escape Cartright and his guards. He could feel his life draining away, and his demonic tail-born abilities were quickly failing him. Soon enough, Cartright caught up to him and prepared to fire the killing shot, but was immediately prevented from doing so by a resurrected and transformed Jon Dazy.

Somehow, Dazy's powers had interacted with the natural energies of the Marshlands. This didn't just save his life, but it forever metamorphosed him into the Mangrove, a creature half-man and half-plant. As the Mangrove, Jon Dazy was no longer human and was easily able to dispatch Devilhound's pursuers.

Once the threat was neutralized, Mangrove turned to Devilhound who seemed to take his final breath in his arms. At the moment of Devilhound's passing, the mystical devil's tail that had for so long plagued his life, fell from his body, their arcane bond broken at last. Mangrove used his incredibly natural powers over nature to extend Devilhound's life and keep his lover alive long enough for his massive injuries to heal.

Neither Devilhound nor the Mangrove have been seen since. Though it is posited that Devilhound did indeed survive Cartright's assault, it's uncertain if or how Mangrove's ministrations will have altered his physiology, and if so, to what degree.

Gender: Male.

Sexual Orientation: Homosexual

Height: 5'11.

Weight: 170 lbs.

Hair: Black.

Eyes: Blue as Blaine, red as Devilhound.

Penis: 9 inches, uncircumcised.

Known superhuman powers: Devilhound's semen has the power to set fire to those who have cheated a loved one. Since bonding with the tail, he has developed superhuman strength, endurance, agility and speed.

His senses have also been greatly augmented, and he has the uncanny ability to sense guilt in others.

Prior to Devilhound's death and resurrection, the demonic tail that had firmly planted itself in his anus had only ever been removed through mystical means, and then only by one individual – Jacko the Halloweener. However, the tail could not be kept away from Devilhound's caboose for very long, and tended to return to its current residence once Halloween night ended.

While the tail typically attempted to dominate Devilhound's will, he has proven that his will was the stronger of the two. Devilhound's ability to control the tail's murderous fury was firm, but fragile. However, as the tail's current master, he could utilize it as a powerful weapon in battle, and the tail served as a deadly additional limb/appendage which could be used with deadly accuracy.

Devilhound was a dervish of a hand to hand combatant. His skills were legendary and he had been known to fell large groups of assailants on his very own. His preternatural instincts allowed him to almost sense an attacker's intent and actions before they could make them.

It's often mistakenly assumed that Devilhound was capable of flight, when in fact this is not the case. He was capable of leaping great distances and jumping to incredible heights. Those who have observed him leap from one building to the next are typically the perpetrators of the rumor that Devilhound can fly. He never attempted to clarify this misconception, believing that even a false rumor could amplify his mysticism and the shroud of mystery surrounding him. Such things can keep opponents off-balance and prove advantageous in battle.

Devilhound was completely impervious to fire. He was able to pass through intense flame and heat without so much as a scratch. Extreme cold had very little effect on him as well as he was capable of regulating his core body temperature at will, turning the heat up any time he so chose to or was required to do so.

It is another common misconception that Devilhound's sperm was instantly deadly to those it touched. In fact, it only tended to set people who had cheated a loved one on fire.

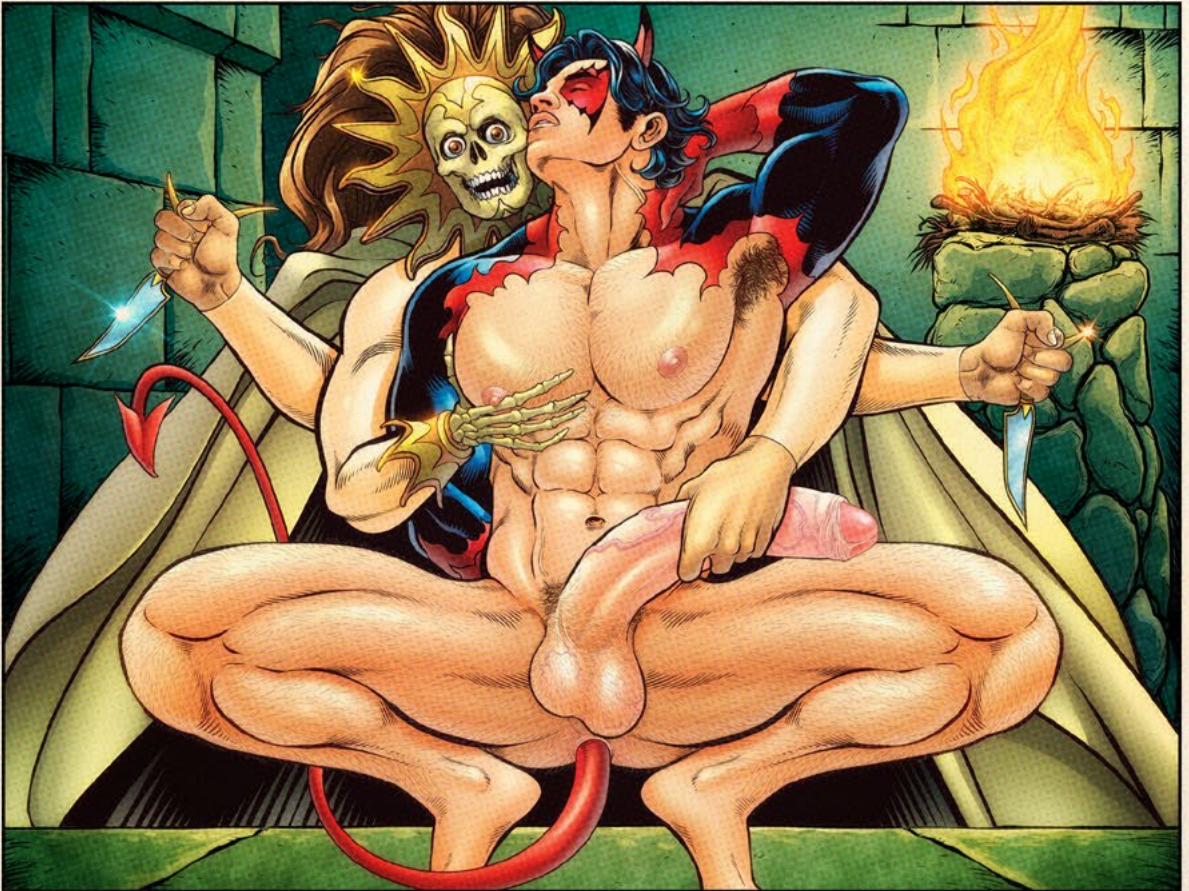

It's believed that Devilhound could actually control this ability, and actively selected who would be immolated. Despite assurances that he would not be harmed by Devilhound's spunk, Jon Dazy always preferred to use condoms when having intercourse with his lover.

Additionally, Dazy gave Devilhound explicit warnings never to cum in his mouth or down his throat during fellatio. Devilhound knew full-well that Dazy was in no particular danger from him, but chose to oblige his lover out of respect, believing that eventually, Dazy would come to trust him fully and completely, and that such preamble would become unnecessary.

Notes: In a chance meeting with Jacko the Halloweener one fateful Halloween night, Devilhound found out that he was in fact a Son of the Night. However, Jacko failed to explain what that meant and how it could impact Devilhound's life.

Interestingly enough, Jacko is the only individual who has ever been able to remove the mystical tail from Devilhound's ass. To do so, he wove an ancient and very dangerous spell that could only be performed on All Hallow's Eve. The Halloweener even wound up wearing it himself for a brief time, but eventually the tail returned to Devilhound's pretty pink hole.

Devilhound has not seen nor heard from Jacko, or from any other Sons of the Night since that time. He continues to wonder about the implications of this discovery. He is open to learning more about the Sons of the Night and what it means to be one of them, but for now he remains largely in the dark on such matters. ■

GHOSTBOY

Real Name: Peter Goldman

Other Aliases: The Fright.

Occupation: Former gymnast, Adventurer.

Identity: Publicly known.

Legal Status: Citizen of the United States with no criminal record.

Place of Birth: Gateway City.

Marital Status: Single.

Known Relatives: Sylvia (mother), Omar (father), Toro (Uncle).

Group Affiliations: Former member of the Guardians of the Cube, currently none.

Base of Operations: Gateway City.

First Appearance: Guardians of the Cube #1, volume #1 (1992)

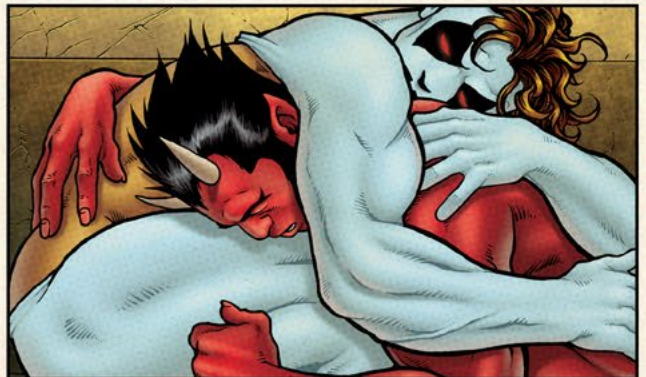

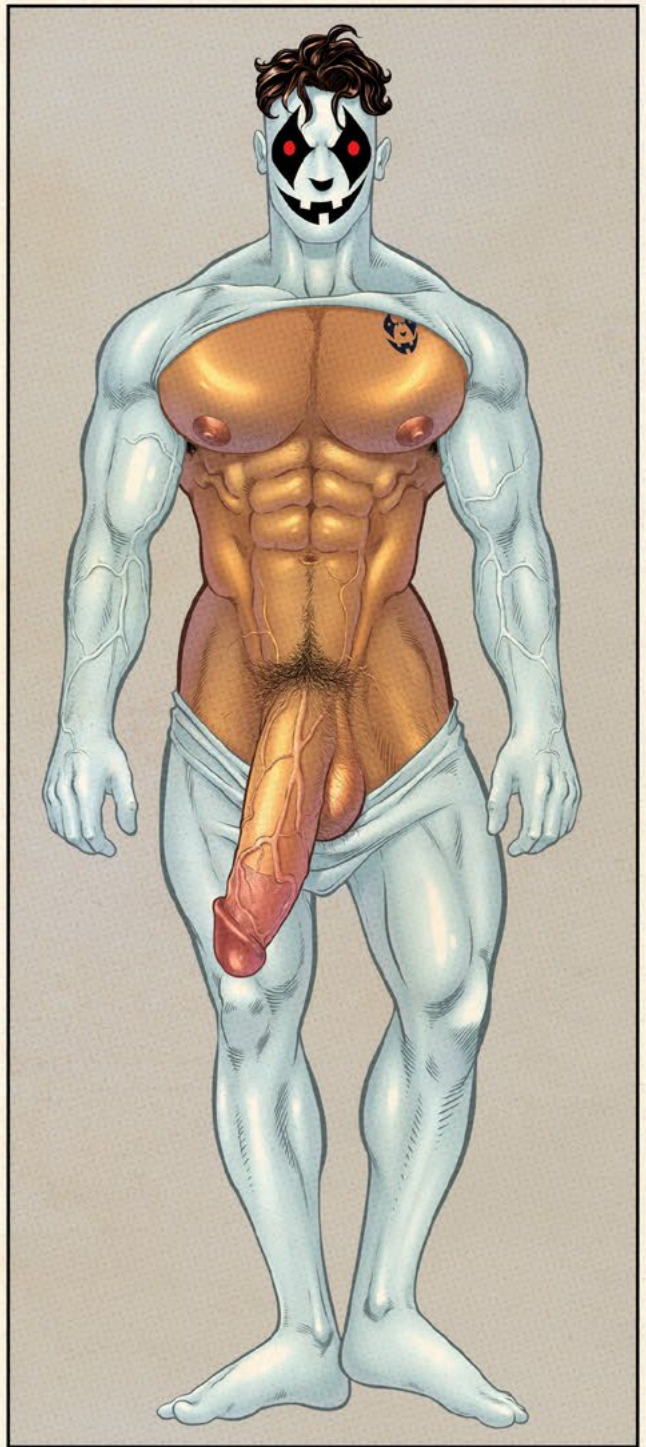

History: Peter Goldman is an accomplished gymnast and chose a career of costumed crime-fighting over that of a professional athlete. Granted amazing phantom-like abilities by the bizarre alien artifact simply known as the Cube, Ghostboy became one of the founding members of the Guardians of the Cube, Gateway City's most recognized group of super human protectors.

While he was in a romantic relationship with Naked Justice, Ghostboy's body was hijacked by Daddy Longlegs and his displaced "soul" was cast adrift in the world. Peter was presumed dead. In fact, a memorial service was held for him by his teammates. Meanwhile, Peter's spirit found its way into the body of Aisha Wood, a medically brain-dead young woman who had been on life support for a number of months. With little other choice, Peter awoke as a female, and soon discovered that he had retained his super powers even while inhabiting a new body. In fact, as "Ghostgirl", Peter even learned that he had some new abilities that, since regaining his male body, he has not been able to employ again.

But while he eventually found his way back into his original male form, Peter's temporary transformation into a woman sundered his relationship with Naked Justice, who was utterly unable to cope with the change. In the end, Ghostboy and NJ were never the same again, and while they have had a civil working relationship, it was doubtful that the two could ever be friends again. But thanks to Byron Durand, aka Space Cadet, Naked Justice and Peter have been able to mend their friendship and both are actively attempting to put the past behind them.

After literally growing up in the public eye as a young budding hero coming into his prime, Ghostboy finally feels he's found his own footing. At ease with his powers and with a sense of who he is as an individual, the young adventurer fell deeply in love with fellow Guardian Diablo. The two of them began an illicit, secret affair quite despite themselves, and though Ghostboy was following his heart, he always felt like a home-wrecker for coming between Diablo and his wife, Pascale.

In a strange twist of fate, on the day Peter decided to finally come out to his mother Sylvia, his father Omar, a man long-thought to be dead, reappeared looking every bit as young as he had the day he vanished. In fact, he looked to be roughly the same age as his now deeply confused son. Before Peter could get answers about what had happened to his father, he, his father and Diablo were kidnapped by Toro, Ghostboy's maniacal uncle. Toro took the three men to a mysterious island at the heart of the Bermuda triangle, and eventually the Guardians of

the Cube came to the rescue. Then, upon returning to Gateway City, Ghostboy was finally able to come out to his mother.

She is trying to come to terms with the reality that her son is a homosexual. Meanwhile, Peter has had the opportunity to get to know his father, and has even proposed to Diablo.

To complicate matters, a mysterious figure named Unrest has turned up in Peter's life and has attempted to convince him that the two of them were once lovers. Allegedly using his telepathic abilities to bury all memories of their time together deep within Peter's mind, Unrest now wishes to convince Peter that their love was once strong and genuine. It seems that Unrest wants Peter to freely choose between Diablo and him, but Peter has difficulty reconciling these supposed new-found memories with what he knows and clearly remembers.

Unrest's prior involvement with Peter is nebulous at best, and though Unrest has attempted to restore Peter's memories of their supposed time together, he was interrupted by Diablo. Unable to complete the process, Unrest chose instead to bury the recollections in Peter's psyche anew. Presumably, Unrest plans to try again. If he will succeed remains to be seen. More importantly, whether or not Unrest is genuine in his claims remains strongly debatable.

For now, Peter does not consciously remember Unrest or their purported time together, and his primary concern is whether or not Diablo will finally accept his marriage proposal.

Gender: Male.
Sexual Orientation: Homosexual.
Height: 5'9.
Weight: 127 lbs.
Hair: Brown.
Eyes: Hazel.
Penis: 11 inches, circumcised.

Known superhuman powers: As a fighter, Ghostboy is incredibly skilled. Powers aside, he can best most enemies in physical combat with relative ease. His is the body of a gymnast and his stamina and endurance are greatly fortified by his athleticism.

Besides his great physical prowess, he possesses several unusual abilities bestowed upon him by the bizarre alien artifact known simply as "the Cube".

He can become invisible and make others invisible through physical contact. The limitations of this power have yet to be determined and he can remain this way for several hours at a time when he chooses to.

Additionally, he can phase through solid objects and, using his phasing ability to harmlessly let air molecules pass through his body, Ghostboy can, in essence, fly, though the speeds he can achieve while employing this ability are modest at best.

Perhaps his most powerful ability is equally the one he calls upon the least. When provoked, he can become a creature known as "the Fright".

As the Fright, Ghostboy's body becomes a hideous green monster, and when in this form, Ghostboy can attack a foe psychically, essentially forcing them to confront their most debilitating fears, usually resulting in the individual's catatonia or collapse.

Because it can be difficult for Ghostboy to return to his normal state when in his Fright persona, he himself fears this power and risks calling upon it as infrequently as possible. ■

ISAIAH SHADE

Real Name: Isaiah Darius Shade.

Other Aliases: None.

Occupation: Former College student, studying to become a lawyer. Former landscaper. Former male stripper. Demon slayer. Occultist. Adventurer.

Identity: Publicly known.

Legal Status: Citizen of the United States with no criminal record.

Place of Birth: Bangor, Maine, United States.

Marital Status: Widowed.

Known Relatives: Abigail "Abby" Harris Shade (wife, legally deceased), Deandra Durand Shade (mother), Rhyland Shade (father), Emil Durand (uncle), Louisa Durand (aunt), Yolanda Mae "Nanna" Durand (grandmother), Byron Durand (cousin), Sheldon Emil Durand (cousin), Shannon Louisa Durand (cousin).

Group Affiliations: None, however for a time he was closely associated with Realtor Julio Flores and the Taro Demon known as Deimos.

Base of Operations: Cape Elizabeth, Maine.

First Appearance: Jacko's Horny Halloween Tales #1 (2016)

History: Isaiah Darius was born to proud parents Deandra and Rhyland Shade, and though the couple would try for several years, their beautiful baby boy would remain their only child.

Isaiah's parents were nurturing and encouraged their son's inquisitive nature, his individuality and his propensity for learning. He enjoyed a relatively normal childhood, though a particular incident would mark him for life.

One Halloween's Eve when Isaiah was ten years old, the boy was trick-or-treating down a particularly dark street with some of friends when he was very nearly abducted by a mysterious stranger... a stranger the police never successfully apprehended.

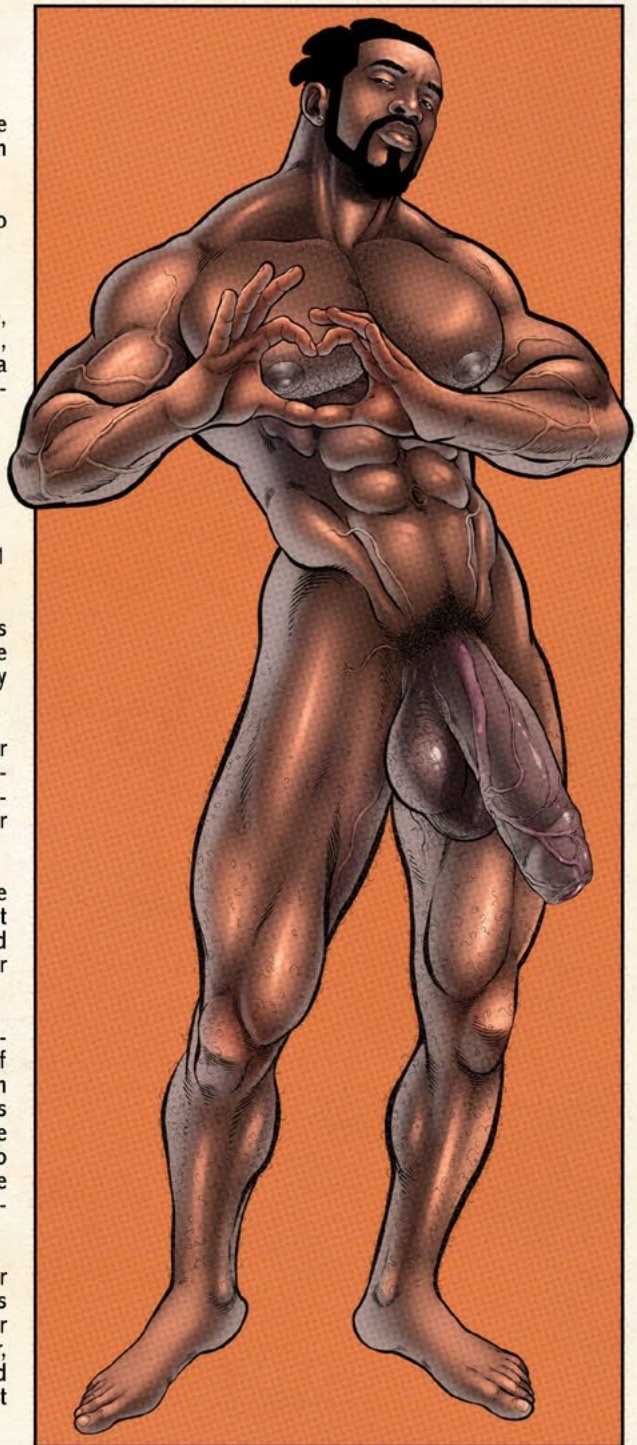

Back at the Shade family home, Isaiah's mother experienced what she could only describe as an awful feeling of dread... a dark premonition. She knew her son was in mortal danger. Had it not been for his parents and his uncle Emil, one can only guess at what might have become of young Isaiah. Fortunately, they were able to intervene in time and wrestle young Isaiah from the would-be kidnapper who proceeded to dash away, vanishing into the dark of night.

For several years, Isaiah would fear the dark and suffer from serious night terrors, seeing his aggressor's horrible visage in his worst nightmares. Through regular counselling sessions, he eventually overcame his fear, though the memory of that horrible night has remained with him since, and Halloween continues to be his least favorite season of the year.

By the time he was in high school, Isaiah was at the top of the honor roll as well as a star athlete playing football and soccer like a young pro. Already, he had dreams of attending law school and eventually becoming a lawyer. He studied hard, and after graduation, he enrolled at the University of Maine School of Law.

Despite his student loans and his parent's financial assistance, Isaiah felt the financial crunch of being a full-time college student. He took on several part-time jobs to help pay the bills and worked for a time as a landscaper. However, his earnings were meager and barely helped cover his mounting expenses.

One particularly hot afternoon on the job, Isaiah had stripped off his shirt as he worked a client's flowerbed,

innocently revealing his chiseled physique in an attempt to beat the heat. His client, a well-to-do woman in her late thirties named Madeline, approached the glistening, muscular young hunk with a tall glass of lemonade and proceeded to inform him that she felt he was wasting his time and natural talents as a landscaper. Indeed, she knew of a job that would ultimately pay far better and for which he was perfectly suited. Isaiah was understandably intrigued, and soon enough, Madeline coaxed the youth into her home and instructed him to undress for her.

Understandably taken aback, Isaiah hesitated at first, but when Madeline told him that she ran a legitimate and successful exotic male dancer business where he could earn hundreds of dollars in a single night, he obliged, slowly stripping naked for the enthralled woman. Marveling at his innate, sensual rhythm along with his remarkable masculine beauty and impressively lengthy and girthy endowment, Madeline hired Isaiah on the very spot.

Soon Isaiah was Madeline's most requested dancer, and despite the often voracious appetites and unabashed roaming hands of the female clientele, he found the work pleasant enough and very lucrative. He was finally back on top of his student loans and mounting bills.

It was while he was dancing at a Sorority house off campus that Isaiah was reunited with his high-school sweetheart – a lovely young woman named Abigail "Abby" Harris. Isaiah and Abby had been going steady in their freshmen high school year until Abby's family abruptly had to leave town. Isaiah never knew exactly what had prompted their departure, nor had he heard from Abby since their separation.

Together again at the sorority house, Abby slipped a cool hundred in Isaiah's flimsy thong, brushing her fingers teasingly against his shaft, requesting a private dance. How could Isaiah refuse? Moments later, the two of them were alone, and the couple found themselves picking up right where they had left off, all those years ago. They reminisced, chatting for hours, and although Abby would not reveal the reason behind her family's sudden exit from town, the couple reconnected in a most concrete way. They eventually made love until the early morning hours and awoke in one another's loving arms.

The two continued to see each other as often as they could, and a handful of months later, they were married in a simple but lovely ceremony.

Isaiah and Abby were intensely happy for a short time. They found a modest little house to rent off campus and both continued pursuing their education. All seemed to be going extremely well, but one ill-fated Halloween, Isaiah and his future literally went to Hell.

Abby, who loved Halloween, had brought home a strange porcelain devil figurine which she had purchased at a rummage sale. Isaiah found the bizarrely leering sculpture oddly off-putting and unsettling, and yet he was inexplicably drawn to it. It was as if the accursed thing was calling to him.

Abby eventually left the house to attend a Halloween Craft Fair. That's when the disturbing little devil sprang to life, and attacked Isaiah. The creature, not at all a Halloween decoration, had been posing, lying in wait – waiting for Isaiah. The Devil immobilized him, rendering him powerless to defend himself. He forced Isaiah to strip naked and masturbate for his pleasure. Gorging itself on the young man's semen, relishing his naked, vulnerable body, and defiling him in every way imaginable, the vile demon finally condemned Isaiah's soul to an eternity in Hell, and his spiritless body to a life of sexual servitude.

Abby returned home to discover the grotesque entity straddling her now soulless, mindless lover. Selflessly, she offered her own soul in exchange for his, and instantly, Isaiah was spared from eternal damnation, but Abby was doomed in his place.

Isaiah vowed to rescue Abby from Hell at any cost.

Isaiah didn't return from Hell unchanged. The underworld had left its shadowy mark upon him. In his own words, he'd become "catnip" to demons who were now drawn to his intoxicating, supernatural aura. When anally penetrated by a demonic entity, Isaiah's body and soul could act as a sort of cage entrapping the creatures, immediately learning all they know, and ultimately eradicating them.

For a time, Isaiah attempted to master his new-found powers by studying under the African Shaman named William "Billy" Zambu. Feeling called to Isaiah's abilities, Billy offered to help Isaiah learn how to use his strange skills for good. He also revealed to Isaiah that every demon slain using these powers would help him divine Abby's location in Hell, and perhaps one day lead to her successful rescue.

Billy couldn't remain with Isaiah indefinitely, and eventually the Shaman returned to Gateway City, leaving Isaiah to ponder his future. In light of all he had recently gone through and of his mission to save his wife, Isaiah felt he could pursue his education no longer, and so he put his schooling on hold.

More and more, he employed his outlandish abilities to aid others besieged by unholy forces. After a time, he gained a reputation as someone who could exorcise demons from dwellings and individuals with unprecedented results.

Called to Cape Elizabeth in Maine by Real Estate Agent Julio Flores, Isaiah was tasked with cleansing the Arledge Crowley house. In his life, Crowley had raped and killed hundreds of male African-American slaves, going so far as to even consume their flesh believing their blood held great power. In death, he had become something even worse. His foul anti-soul haunted the home he once lived in and killed all who dared to enter it. After a long, difficult battle, Isaiah was successful in destroying Crowley. Through his conflict with the creature, he gained more insight into Abby's whereabouts, getting him one step closer to saving her.

Moments later Deimos, the young Taro Demon arrived, sent to Maine by Isaiah's friend and mentor, Billy Zambu. Billy instructed Deimos to assist Isaiah in his quest and to watch his back. As Isaiah was new to the mystical world, and Deimos was new to the world of humans, Billy firmly believed the two could become great assets to one another.

At that time, Deimos' incubus powers were in full swing. Isaiah was immediately affected, falling deeply in lust with him, but he refused to act on his impulses and seriously questioned where these urges were coming from given that he'd never felt sexual attraction toward another man before. The following months spent together only served to deepen their relationship, and what began as mutual respect and a healthy dose of sexual tension developed into undeniable affection and genuine love.

Isaiah, Deimos and Julio Flores grew closer to one another, and one night, Flores suggested that the three of them should go into business together. The idea was that Julio would locate "possessed" properties that Isaiah could cleanse, and that the trio could eventually sell off. Reluctantly, Isaiah and Deimos agreed to this plan, but their partnership would be short-lived.

During a particularly grueling battle with an entity called Sinew, Isaiah was mystically aided by the shaman known as Papa Pourquoi. After the difficult conflict was won, Pourquoi instructed Isaiah to come visit him at his home deep in the Louisiana Bayou. Once there, Isaiah learned more about himself as a human being, finally coming to terms with his attraction to both women and men, concluding that he is neither heterosexual or homosexual, but rather bisexual, though preferring to use no labels and simply be who he is in the moment.

Additionally, it was revealed that Papa Pourquoi is Abby's long-lost biological father. The mysterious shaman channeled Abby's soul through his own body, permitting Isaiah to see and touch his lost bride one final time. Seeing Abby rather than Pourquoi, Isaiah makes love to Abby who then warns him that he must stop trying to rescue her from Hell or risk a terrible fate. She insists that he must lead his life, unafraid to show Deimos how much he cares for him.

With that final revelation, Abby vanished, returning to the abyss. Pourquoi then explained to Isaiah that he must pay Abby's soul-debt with his body, and the next few days were spent with Papa Pourquoi thoroughly enjoying Isaiah sexually.

The soul-debt finally paid in full, Isaiah makes his way back to the motel he, Deimos and Flores occupied while in Louisiana. He longs for Deimos and cannot wait to see him again. But before Isaiah can be reunited with Deimos and profess his love, Deimos strangely vanishes.

Kidnapped and enslaved by the twisted Silas Lafoy, Deimos is shaved and subjugated. His testicle is branded with Lafoy's initials, magically binding him to the madman, and cursing him to an existence of servitude as little more than a sex toy. Deimos is abused and sexually savaged non-stop.

Unwilling to accept Deimos' disappearance, Isaiah vows to search for him, certain that he did not "vanish" of his own accord. For two years, Isaiah looks everywhere for Deimos, always coming up short. He exhausts every lead, but somehow, Deimos eludes him.

At first, Isaiah doesn't know that Lafoy is the man who has abducted Deimos. He learns of this after a meeting with Gargo, the oldest and wisest of the Gargoyle clan. It is then decided that Gargo shall use his magic to transport Isaiah to where Deimos is being held.

In order to fit into Lafoy's harem, Isaiah's entire body is shaved by the Gargoyles, so that he will pass as one of the callboys on site. Then he's whisked off to Colorado, where Deimos is being held prisoner.

Once reunited, Isaiah and Deimos are free to give in to their deepest desires and longings for one another. At first, all seems to go well, but the moment Deimos penetrates Isaiah, all Hell breaks loose. Isaiah's powers are triggered seemingly spelling the end of the bewildered Taro Demon.

Whether the two of them survive their first attempt at consummating their love remains to be seen.

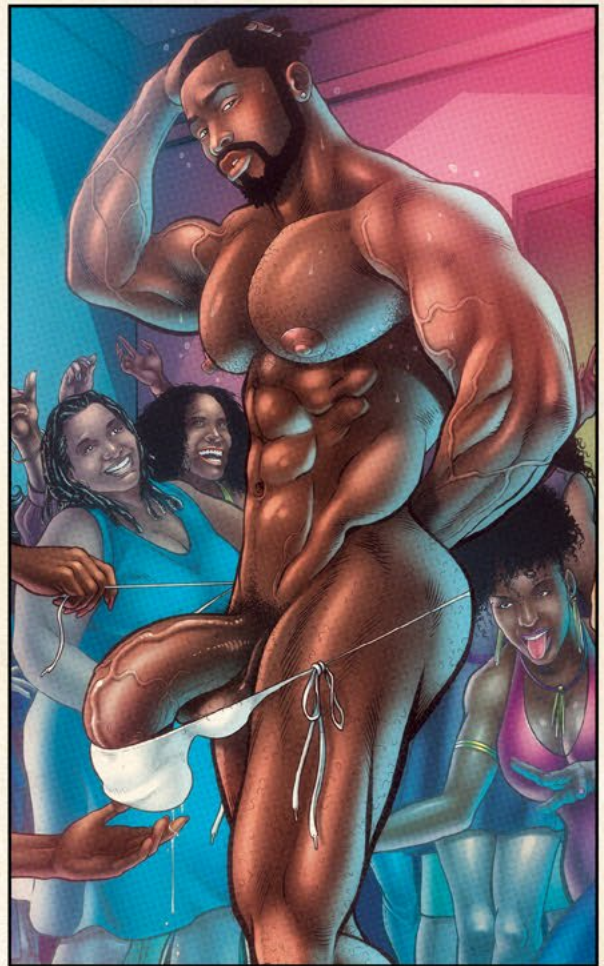

Gender: Male.
Sexual Orientation: Bisexual
Height: 6'1.
Weight: 197 lbs.
Hair: Jet black.
Eyes: Brown.
Penis: 12 inches, uncircumcised.

Known superhuman powers: Isaiah's trip to Hell left him with a number of impressive and strange abilities as well as physiological enhancements. Now stronger and faster than the average human male of similar height and build, Isaiah's stamina is greatly enhanced. Additionally his senses of sight and hearing are far superior to that of an average person. He is capable of seeing perfectly well in pitch-black conditions, and his ability to hear the softest of sounds is unsurpassed.

While Isaiah has always been a physically active young man, that does not instantly make him an adept hand-to-hand fighter. He did learn a few combat moves and techniques while studying with Billy Zambu, and Deimos has even tried to show him how to become a better brawler, but Isaiah detests physical violence and resorts to it only when all other options have been exhausted.

His Hell-born powers are numerous and can serve him well, though his mastery of them is far from absolute. He is still learning how to control his mystical abilities, but close proximity to demonic entities often triggers them, and places them on what he calls "automatic". Often, he wields his powers instinctively rather than purposely, and mercifully, this has gotten him out of most scrapes unscathed to date.

Due to his time in Hell, Isaiah has returned to the realm of the living changed at a cellular level. He is irresistible to demons – as if his very scent has become deeply intoxicating to them. They are instantly drawn to him. Typically, it is Isaiah's penis that indicates the presence of evil. He immediately becomes erect and impossibly hard in the presence of the unholy. His cock "vibrates", acting as a sort of flesh and blood sensor rod, undeniably indicating that the time to leap into action has come.

In the presence of evil, Isaiah likes to pretend he's a powerless, horny human and the ruse typically encourages demons to penetrate him anally. This is, of course, a mortal trap. Once inside of Isaiah, the demons' anti-soul is absorbed into Isaiah's own spirit, and their physical body is completely obliterated. The demons' essence effectively becomes caged within Isaiah, and their knowledge and experience are his to access. This is how he searches for Abby's whereabouts in Hell. With each demon slain, Isaiah comes one step closer to finding his wife.

For a time, Isaiah believed himself unable to summon his mystical energy at will, believing close proximity to forces of Hell to be the necessary catalyst for his powers to manifest themselves. Billy Zambu showed him that this was not the case, and that with practice, Isaiah could harness ambient mystical energies, present everywhere, but undetectable by the average human. This is a skill which Isaiah continues to work on and develop further, knowing full well that greater, more deliberate control over his magic would be a great asset in battle.

In the past, Isaiah has shown himself able to communicate with the souls of the dead, and this has helped him on a number of occasions. Moreover, he has experienced visceral visions of possible future events which have led him to believe that his fate, and the fates of his loved ones are not written in stone. If he can see possible outcomes, it stands to reason that he can change them. This at its core is the very definition of Isaiah and all he does. He is a young man who has known great horror and evil in his short life, and still his heart brims with love and goodness. All he does, he does for the ones he loves and for those in need of help and compassion. Indeed, perhaps his greatest power of all is his unwavering ability to love intensely and profoundly, even in the face of the most oppressive evil. ■

JULIO FLORES

Real Name: Julio Miguel Flores.

Other Aliases: None.

Occupation: Real Estate Agent, Adventurer.

Identity: Publicly known.

Legal Status: Citizen of the United States with no criminal record.

Place of Birth: San Antonio, Texas, United States.

Marital Status: Single.

Known Relatives: Unnamed mother, father, sister, and grandmother.

Group Affiliations: None. However for a time he was closely associated with occultist Isaiah Shade and Deimos the Taro Demon.

Base of Operations: Cape Elizabeth, Maine.

First Appearance: Gay For Slay #1 (2019)

History: Born in the United States of America, Julio Flores is the son of Mexican migrant parents who made their way to the States in order to provide their son with every opportunity in life.

Very little has been revealed about Julio's childhood and teen years, but as a young adult, he enrolled in a realtor licensing course and became a successful real estate agent. Blessed with a quick wit and sharp tongue, Julio had no problem representing his clients' properties and rose rather quickly in the ranks of the office where he was employed.

Eventually, Julio became successful enough to venture out on his own, and soon he opened his very own office where he greatly enjoyed autonomy and not having to share earnings and commissions with others in his office. He was young, successful and felt he was living the American dream, until he was traveling in Maine and purchased an investment property in scenic Cape Elizabeth he simply could not sell.

Flores had found what he believed to be a sure-fire opportunity: A gorgeous old Colonial house which had been on the market for several years and had been drastically reduced in price. Julio believed he could buy it for a pittance, update it slightly, then turn around and sell it with ease, making a hefty profit.

However, the house turned out to be haunted, or rather "possessed", and after several tradespeople lost their lives to the entity within its walls, Flores realized he needed to turn to someone who had experience dealing with the world of the supernatural. Through some of his business contacts, Julio had learned of a man named Isaiah Shade. Allegedly, Shade could cleanse the old house of the malignant evil infesting it, and this would permit Julio to offload the property at last.

Contacting Shade was not easy, but eventually Julio succeeded in tracking him down. Soon the demon-slayer arrived in Cape Elizabeth ready to face the demonic spirit of Arledge Crowley, the man who had owned the house in the late 1800s. Shade requested only one thing as payment. Should he be successful, he wanted Julio to sell him the house, but at a reduced cost. Reluctantly, Julio agreed, desperate to be rid of the nightmare estate, and perhaps, not fully believing that the occultist would be victorious against the evil within the mansion.

Shade prevailed, and Crowley was obliterated. The house was cleansed and Julio not only sold it to Isaiah as promised, but he also saw a brilliant opportunity. He knew that many other properties out there were "inhabited" by malevolent forces. He figured that Isaiah could cleanse the houses, and then he could turn around and sell them. By this time, the Taro Demon called Deimos had joined Julio and Isaiah in Maine, and he became the third member of this paranormal real-estate venture.

As time went on, Julio found himself falling in love with Deimos. He felt that even though Deimos might not go for a guy like him, he could get into his pants simply by being forceful and confident. Despite Julio's long history of rejection with other guys, he proved to be an exceptionally gifted lover and quickly won Deimos over. The big Taro Demon enjoyed being topped and dominated by the smaller human male on a number of occasions, until ultimately, Deimos was abducted by millionaire Silas Lafoy.

Julio and Isaiah searched high and low for their missing friend for several years, finding no trace of him. Eventually the stress of Deimos' disappearance caused a near-irreparable rift between Julio and Isaiah and the two men parted ways, despite the fact that they had become the very best of friends in their short time together.

Knowing full well that Deimos adored him but actually loved Isaiah, Julio decided that the only way he could be with Deimos was to remind Isaiah and the Taro Demon alike that Isaiah's wife Abby could still be rescued from Hell. If she could indeed be rescued, then Isaiah would conceivably focus all of his attention on her, leaving Deimos for Julio.

It is still not known how Julio did this, but somehow, he managed to enter the kingdom of Hell and go in search of the captive Abby. It's presumed he obtained the aid of Papa Pourquoi in order to gain entry, but that supposition has yet to be officially confirmed.

Currently, Julio remains in Hell, searching for Abigail Shade, hopeful that he can find a way to free her from her bonds and liberate her from the underworld, eventually returning her to her husband. He hopes to not lose his own mortal soul in the process so that he can one day himself be reunited with Deimos, the demon he loves with all of his heart.

Gender: Male.
Sexual Orientation: Homosexual.
Height: 5'4.
Weight: 143 lbs.
Hair: Brown.
Eyes: Hazel.
Penis: 10 inches, uncircumcised.

Known superhuman powers: None.

Weapons and paraphernalia: While Julio Flores has no powers to speak of, he possesses a rapier wit and a sharp tongue. He can talk his way out of nearly any situation, and if diplomacy and subtle manipulation don't work, then he resorts to guns and violence. Growing up in Texas, Julio is no stranger to firearms and is well-versed in their usage. He is as comfortable with a pistol as he is with a rifle, and just as deadly precise with everything in between.

Due to the supernatural nature of his venture with Isaiah and Deimos, Julio has become quite the researcher and has made it his business to know everything there is to know about the entities he and his friends encounter. Whether it be trips to the reference section of the library, or uncovering old, arcane tomes from alternative bookstores, more often than not Julio's extended knowledge has been instrumental in saving the day. ■

LOCUS

Real Name: Locus Onta.

Other Aliases: the Lean Green Sex Machine.

Occupation: Former smuggler, adventurer.

Identity: Publicly known.

Legal Status: Expatriate/fugitive of the planet Sekta Prime

Place of Birth: The planet Darria.

Marital Status: Single.

Known Relatives: Lyrren (mother, deceased), unnamed father (deceased), Herektio (step father, deceased).

Group Affiliations: Former employee of Slavva, currently still a member of Captain Jung's crew, though he has not been with them in some time.

Base of Operations: Varies between his ship and his apartment on planet Darria. Occasionally the Mina, Camili-Cat's shuttle will serve Locus as a home away from home. Formerly the Huntress.

First Appearance: Affinity #1 (1991)

First Modern Appearance: Rapture #1 (2005)

History: Locus led a life of luxury as a child growing up on the planet Darria. His mother Lyrren was a wealthy heiress who raised her child to be extremely self assured and confident.

When Lyrren died under suspicious circumstances during his teenage years, Locus found himself at the mercy of his twisted step father Herektio, a greedy, violent and unfeeling man who had wed Locus' mother not for love but rather to gain access to her vast fortune. Soon, Herektio turned his lascivious appetites toward his handsome step-son. Locus found himself regularly abused physically by this odious man and quickly decided that he would not tolerate this sort of treatment.

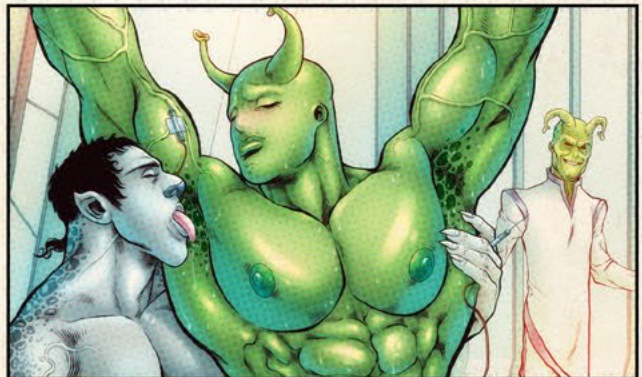

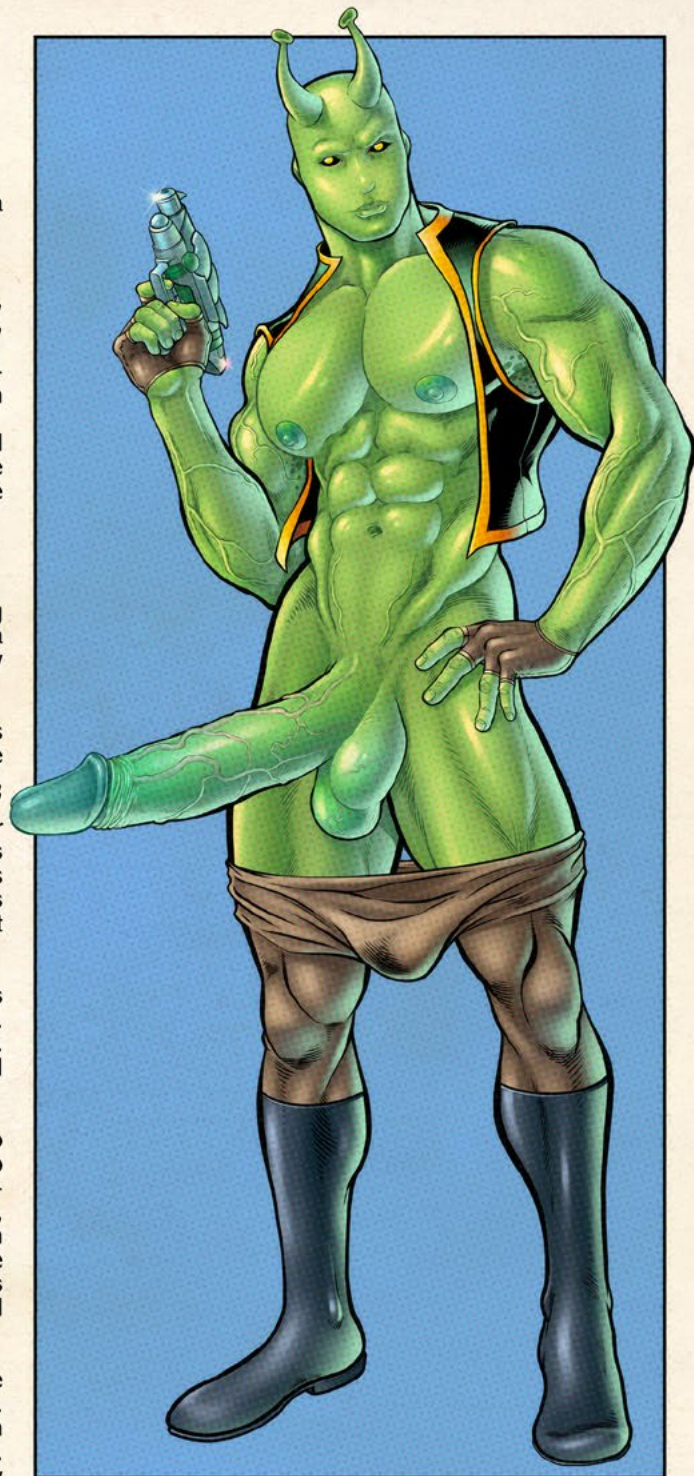

With some effort, Locus unearthed evidence that his step father had poisoned and murdered his mother. Locus denounced Herektio to the Darrian authorities. Ultimately, this led to the man's arrest and eventual execution.

With Herektio gone, Locus was left as the sole heir to his mother's considerable wealth. Alas, young, dumb and full of cum, it was not long before Locus squandered his fortune on miscellaneous boyfriends, drugs, alcohol and gambling. Eventually left with nothing, the young Sektan found himself out on the treacherous streets of Darria. It was on those streets that he met and befriended a young Felinoid named Cam.

Cam was being sold at auction, and Locus used the last of his money in order to purchase and free him. The two young men became lovers, and helped each other survive the dangers of the Darrian street life. Their love grew quickly, and the two became nearly inseparable.

Eventually, Locus gained employment with a vile intergalactic gangster named Slavva. Quickly, he became one of Slavva's best smugglers. Perhaps it was Locus' smug and arrogant attitude that won Slavva over. Certainly his skill as a smuggler was one of the only reasons Slavva didn't put the young man to work in one of his many flesh-clubs. The youth's ability to avoid police patrols and routine ship searches kept Slavva from enslaving Locus as a sex worker and toy, but there were limits to what Slavva would tolerate.

For his part, Cam couldn't stomach Slavva or the idea of Locus working for the man. He implored Locus to

leave Slavva, but Locus knew that such a thing was not possible. Once you were under Slavva's hand, you could never escape it. Cam tried to be supportive, but he couldn't stomach the things that Slavva had Locus do. Eventually, he and Locus parted ways.

Though heartbroken, Locus remained employed with Slavva. Not long after their separation, Locus uncovered star charts and maps which held evidence of a surviving Felinoid colony. Being a loyal friend, Locus risked his life to get those charts to Cam.

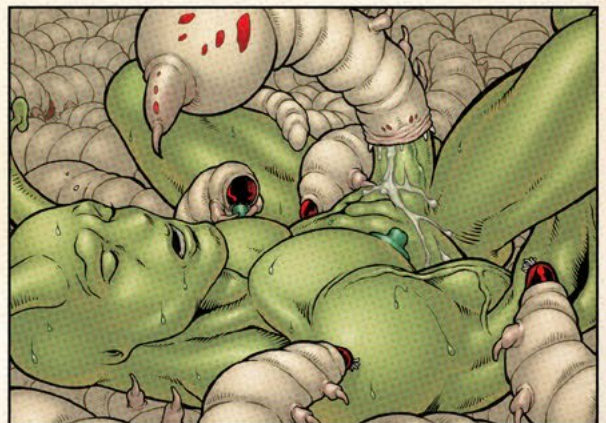

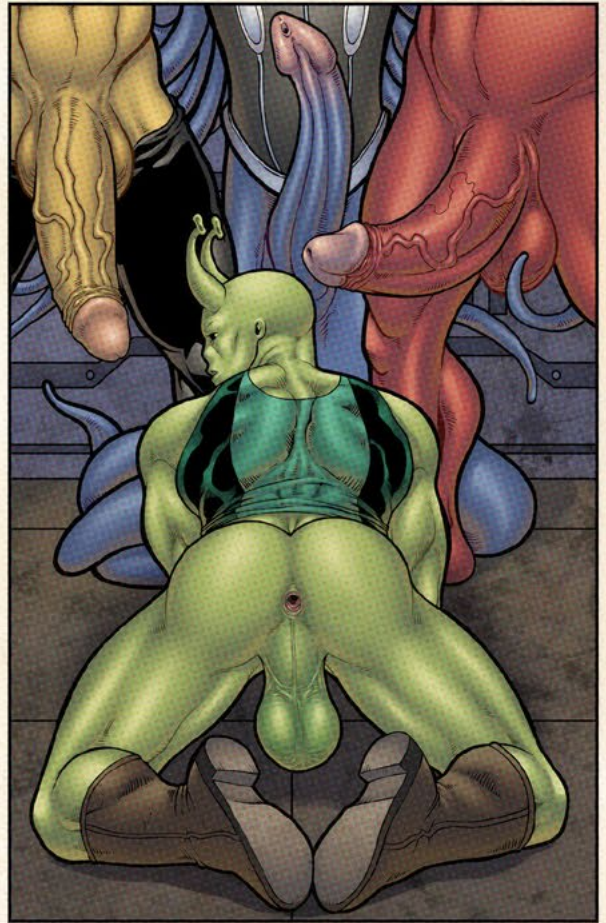

This angered Slavva, who in turn stripped the young Sektan of his position and finally enslaved him, forcing him to dance as a sex slave in his favorite night club. Slavva toyed with Locus, marveling at the sheer size of the young Sektan's endowment, but his anger would not be satisfied. Soon he decided to execute Locus, but Cam arrived just in time to save the day. Before escaping, Locus strangled and killed Slavva in revenge.

Locus joined Cam and Felicia, a Sivan woman and close friend of Cam's aboard the Mina. He traveled with them for a short period of time, until a stupid difference of opinion forced Locus to leave Cam's side.

Meanwhile, Slavva's followers had placed a considerable bounty on Locus' head, and soon he was being hunted down by Captain Jung, Disco and Flamer, a trio of bounty hunters.

The hunters captured Locus but decided to free him and make him part of their crew. Locus remained with Captain Jung and his associates for several months, until he found he could no longer live without his beloved Cam. He chose to leave Jung's crew and venture out in search of Cam once again.

Identifying as a gay Sektan man, Locus never felt particularly attached to his Sektan heritage or its backwards, bigoted societal traditions. Because of this, he made a point of never returning to Sekta Prime. This was problematic for a number of reasons, not the least of which was the fact that Locus was legally obligated to return to Sekta Prime in order to contribute semen to the Sektan Queen every mating season. This is the sworn duty of every fertile Sektan male in existence, regardless of the individual's sexual preference and orientation, but Locus was adamant he would not participate. When he didn't show up for this duty, he was branded a fugitive and a warrant for his arrest was issued.

Now on the run from the Sektan Authority, Locus fled to the planet Suktamimus. There he worked on the down low as a male prostitute in order to survive, all the while, searching for clues to Cam's possible whereabouts.

Eventually, Locus was apprehended by the Sektan Authority. Led by one Captain Beedal, Locus was tracked down, arrested, and charged with the crime of homosexuality, which bears a death sentence on the Sektan home-planet.

On the way to Sekta Prime, Locus discovered that Beedal was in fact himself also a homosexual. Quite unexpectedly, the two of them bonded and Beedal helped Locus escape the Authority now led by a sadistic scientist named Dr. Pupae.

Pupae had been fixated on Locus for a number of years. First his intent was to capture the young Sektan and force him to mate with the Sektan queen. To Pupae's dismay, Locus proved nearly impossible to coerce, and the Doctor had decided to have him killed instead, but this plan also backfired, leading to Locus befriending Beedal.

The duo manage to evade Pupae and his soldiers for a time, until misfortune landed them back on Sekta Prime. Locus and Beedal were desperate to escape the planet. Their best bet was to purchase transport off-world, but in order to do that, they required a large sum of currency, something neither of them possessed.

In his infinite wisdom, Beedal suggested that he and Locus enter a high-stakes Bijaahkt tournament, hoping to win the cash they needed. Having insufficient funds to enter the game, Beedal was forced to put Locus up as collateral, essentially using him as his living buy-in.

Naturally, things went sideways. Beedal lost the match. Both he and Locus were claimed by the victor, but moments before the winner could depart with his hunky new winnings, Doctor Pupae crashed the party and arrested Locus and Beedal.

Pupae gave Beedal a choice: rejoin the Sektan Authority or be prosecuted and executed as a homosexual criminal. Beedal reluctantly agreed to return to the Authority and seemingly turned his back on Locus. Crestfallen, Locus was taken to Pupae's secret lab.

Locus' future looks uncertain. While he fears for himself, he yearns for his long lost Felinoid lover, Camili-Cat, fearing that he will never again lay eyes upon him.

Finding himself ensnared in Pupae's clutches once again, Locus faces a particularly gruesome fate as the Doctor prepares to extract Locus' conscience – his very essence and spirit – from his body, leaving it completely vacant.

Once Locus' spirit has been excised, Pupae intends to transfer his own essence into the much younger, healthier body, shedding his own decrepit physical form in the process.

It's uncertain what would become of Locus' psyche should Pupae succeed in his body thievery, but in all likelihood, Pupae isn't very concerned with that detail. Whether Locus manages to get out of this especially dire predicament remains to be seen.

Gender: Male.
Sexual Orientation: Homosexual
Height: 6'0 (to tips of antennae, 6'7).
Weight: 186 lbs.
Hair: None
Skin: Lime green.
Spots: Dark green.
Eyes: Yellow.
Penis: 14 inches, uncircumcised.

Known superhuman powers: Locus has no superhuman powers. However, being a Sektan male in his late twenties, he does possess exceptional strength, speed and agility. His senses are also extremely acute.

Locus is well versed in many forms of hand to hand combat. His knowledge of weaponry is extensive, and he can use most firearms with deadly accuracy. Locus is also a skilled pilot and engineer.

Notes: Locus knows he's gorgeous. Despite his narcissism, he doesn't believe he's the center of the universe. He has a big heart, and is loyal to a fault. ■

NAKED JUSTICE

Real name: Felix Percival Himner

Occupation: Former socialite, former explorer, former waiter, junior manager at the Empire Bucks Bank in Gateway City, Adventurer

Legal Status: Former citizen of Great Britain where he is presumed deceased, currently residing in North America with no criminal record

Former aliases: Tomorrow's Hero

Marital status: Unmarried, in a serious relationship with Byron Durand (Space Cadet)

Known relatives: Imelda Himner (mother, deceased), Harry Himner (father, deceased)

Group affiliations: Former member of the Unrivaled Alliance, former honorary member of the Guardians of the Cube

Base of operations: Gateway City, North America

First appearance: The Incredibly Hung Naked Justice #1 (2002)

Origin: Naked Justice: Beginnings #1

History: Also known as "The Incredibly Hung Naked Justice", London resident Felix Himner received his amazing powers and immortality while exploring the allegedly "lost" Sphynxter of Homotepp in Egypt in 1943. After discovering the mysterious structure, Felix encountered King Cock-A-Tut, a mystical pharaoh and the guardian of Homotepp's Sphynxter.

Cock-A-Tut had been entrusted with awaiting Felix's prophesied arrival. Additionally, he had also been instructed to bestow immeasurable power and immortality upon Felix, thus helping him fulfill his destiny as "tomorrow's hero". Felix had no clue what he was getting into by accepting this gift of power, and naturally Cock-A-Tut vanished without so much as an explanation, or without giving the newly minted hero a clue as to what he should do next.

For the first part of his career, Felix struggled with controlling his powers. He discovered that his body could generate incredible amounts of electrical energy and that he could discharge that energy at will. While this may sound appealing, bear in mind that our hero could not control this gift. Too often, on the verge of orgasm, Felix would discharge volts of lightning from his erect member. As you can imagine, this made having sex somewhat complicated.

Eventually, Naked Justice met Britain's Unrivaled Alliance, and with the help of team leader Trip, Felix learned to better control his abilities. He remained with the Alliance until the team was destroyed in a confrontation with the mad super-genius, Doctor Silverfish.

After the Alliance's demise, Felix tried to find new purpose by using his powers to help people in several parts of the world. For a time he resided in Quebec, Canada, where he and the Archbishop had a torrid and secret love affair. Eventually, the forever-young hero made his way to Gateway City, aligning himself with the Guardians of the Cube.

On a mission to put an end to the evil Jack the Stripper's rapist crime-spree, Naked Justice, along with fellow Guardian Ghostboy, met Space Cadet for the first time. The three heroes were able to stop the twisted stripper, but narrowly escaped becoming his next victims themselves.

From that point on, Naked Justice and Space Cadet continued to develop their friendship, and the two men became increasingly close. After his breakup with Ghostboy, Naked Justice continued to see Space Cadet and their relationship and affection for one another deepened.

They eventually fell madly, deeply in love with one another.

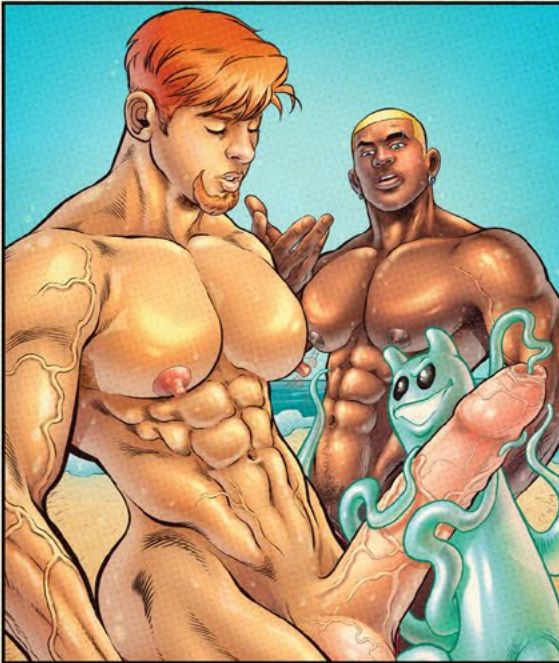

Several months into their relationship, the two heroes have decided to take things to the next level, and move in with one another. They have found a modest little apartment in downtown Gateway City, and continue to use their incredible powers to fight crime.

Naked Justice and Space Cadet's destinies are more closely linked than they realize. For now, they make the most of every day, loving one another and doing their best to keep the streets of their beloved city safe for the innocent. But the future... this future, remains ever in flux, and a great revelation is headed Naked Justice's way... a revelation that will change the course of his life and that of Space Cadet forever.

Gender: Male.
Sexual Orientation: Homosexual
Height: 6'1
Weight: 225 lbs
Eyes: Green
Hair: Red
Penis: 12 inches, uncircumcised

Known superhuman powers: The powers that were granted to Naked Justice by King Cock-A-Tut are vast and impressive. He can generate incredible, perpetual amounts of electrical energy within his body, and discharge it at will through his limbs and extremities. Typically, he likes to do this from his erect penis, but he has also been known to fire bolts of lightning from his fingertips and even his nipples.

He can transform his entire body into living lightning, and blast from one point to another, thus traveling at the speed of light. He is currently attempting to learn how to employ this ability to transport others along with him. He believes he is very close to achieving this goal.

Thanks to his ancient-Egypt-born gifts, Naked Justice has also become physically nearly unbreakable. Additionally, he is now immortal due to his inheritance of these uncanny abilities. While it's not to say that he cannot be harmed or killed, his skin, bones and muscles are incredibly resilient and tough, able to resist massive impacts and other kinds of trauma without so much as a scratch or a break. His cells have completely stopped aging, and are completely immune to disease or viruses of any kind. Unless Naked Justice is killed by other means or individuals, it's believed he will live forever.

Though the full extent of his amazing powers remains to be ascertained, Naked Justice discovers new aspects to his abilities with every battle he fights. His skill and mastery can only continue to increase, and his wisdom as a hero, too, grows with each bolt of lightning he fires in the name of justice. ■

PUMA

Real Name: Puma.

Other Aliases: The Golden Beast.

Occupation: Former spy and resistance fighter, turned bounty hunter. Former sex-slave of Nelvo Plour. Adventurer.

Identity: Publicly known.

Legal Status: Former citizen of the planet Felainus Prime, currently a resident of the planet Suktamimus.

Place of Birth: Felainus Prime.

Marital Status: Single.

Known Relatives: As yet unnamed Felinoid mother and unnamed Sivan father. Both parents are presumed deceased.

Group Affiliations: Former member of the Felinoid resistance, former member of Captain Jung's crew, former slave boy of Nelvo Plour, now allied with Camili-Cat in his search for Locus.

Base of Operations: Formerly the planet Felainus Prime, occasionally the planet Suktamimus, formerly Captain Jung's vessel, the Huntress, currently Nelvo's pleasure dome.

First Appearance: Star Crossed #2 (2018)

History: Also called "the Golden Beast", Puma is a Sivan/Felinoid half-breed with an unusually keen intellect and sharp mind. His uncanny ability to almost immediately size up an individual and their intentions makes him a master diplomat and very well-suited to manipulating his opponents in order to better control the outcome of events.

Once a member of the Felinoid resistance, Puma learned to live with adversity at a young age. He was accustomed to being an outsider, due to his mixed heritage. His mother was a Felinoid and his father was a Sivan – Sivans being yet another race of feline humanoids, and sworn enemies of the Felinoids – Puma quickly learned how to manipulate those around him in order to fit in and avoid adversity.

When the Renoxamorphs attacked Felainus Prime eradicating most of its population and enslaving those who remained alive, a young and brash Puma joined the Felinoid resistance, a band of freedom fighters dedicated to fighting for their home world and people.

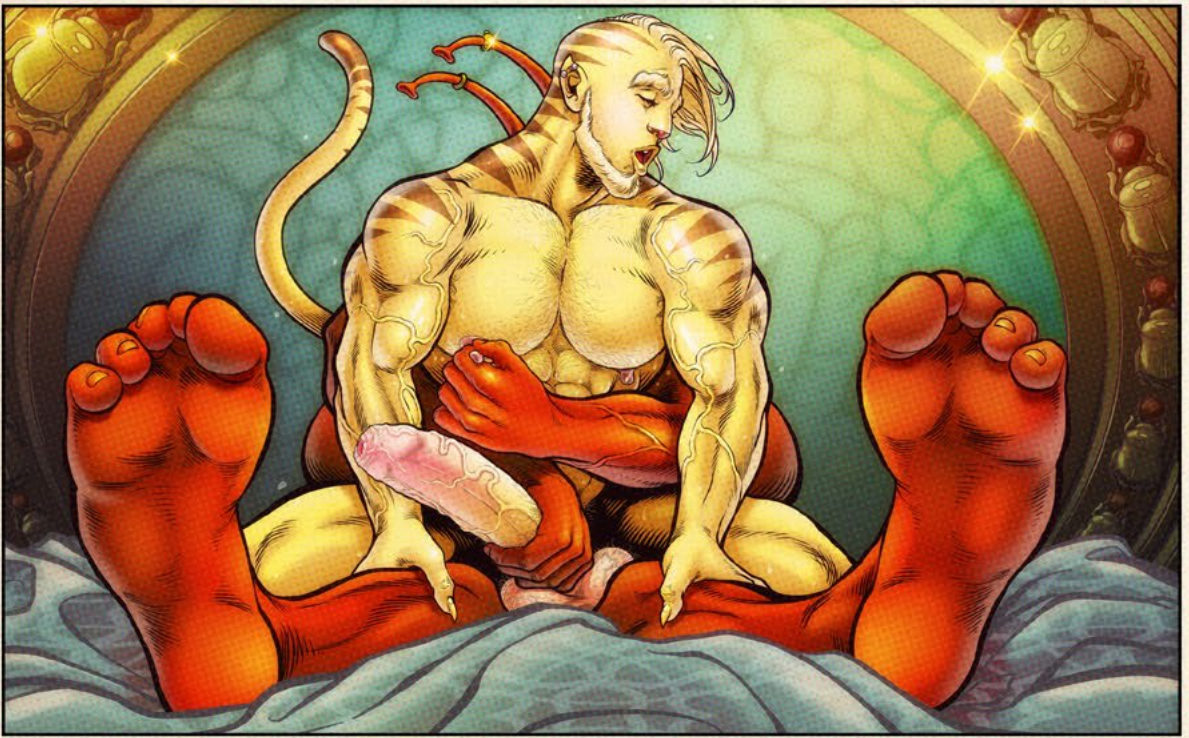

Thanks to his acute interpersonal skills, Puma became a spy for the resistance, successfully infiltrating the Renoxamorph POW camps, posing as a young captive. In this capacity, he was able to use his body and sexuality to acquire invaluable information which, time and time again was instrumental in dealing devastating blows to the alien invaders.

His time with the resistance during the Renoxamorph war taught Puma how to fight and handle himself in times of conflict. He learned how to wield many types of fire arms, and became well-versed in the usage of small blades and even certain types of swords.

For all the efforts of Puma and his rebel friends, the war would not go in their favor, and the Felinoid home planet would fall.

Eventually, the resistance was forced to disband in the face of impossible odds, and its members scattered across the galaxy in order to survive. Puma wound up working the sex trade on the pleasure planet Suktamimus, where his physical beauty and ample endowment came in very handy. He learned to survive on his own, and seldom rely on others.

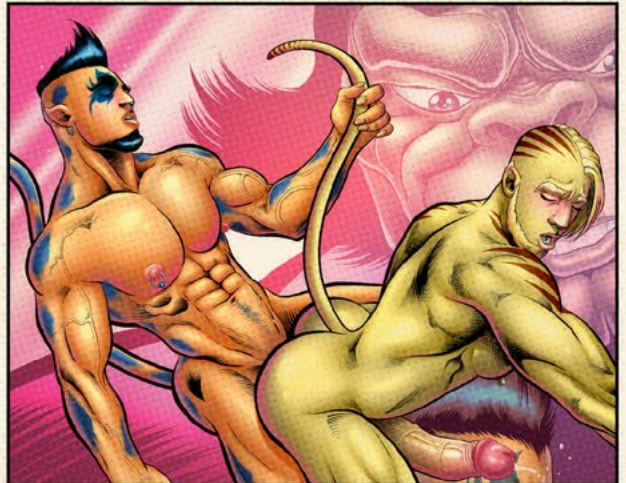

As a Felinoid male, most of the galaxy discounts Puma, seeing only a being conditioned for sex and breeding, worth virtually nothing more. But Puma realized early on that his penis gives him power, and if others underestimate him because of what's dangling between his legs, he would learn to use that to his advantage.

He eventually became a sort of information broker on Suktamimus, making a name for himself in the underworld as a man who could obtain almost any piece of information. It was during his time as a spy on Suktamimus that led Puma to joining Captain Jung and his band of Star Crossed bounty hunters. He became very close to this group of outcasts, and remained as a part of the crew for several years before a run-in with the intergalactic crime-lord Nelvo Plour saw Puma lose his freedom. Having no money to give to Nelvo, he repaid his debt with the only currency he possessed... his body.

Puma served Nelvo loyally for quite some time, and Nelvo always treated Puma with a great deal of affection. Though the two were master and slave, Nelvo showed Puma tenderness in a way he rarely showed any of his other "possessions". When Nelvo added the Felinoid Camili-Cat, "Cam" to his harem of male sex toys, he immediately paired him with Puma. Nelvo knew these two stunning specimens of masculine beauty would look incredible breeding each other.

Sometime later, Puma and Cam discovered that they had both known Locus. Cam knew him as a lover and companion from his youth, while Puma knew him as a fellow member of Captain Jung's band of bounty hunters. The two Felinoids banded together and vowed to see Locus rescued from the clutches of his captors. Dangerously, this led them to betraying Nelvo and stealing his pleasure dome starcraft in order to embark on their search across the galaxy.

Presumably, Nelvo will not react favorably to losing his two favorite possessions. For now however, Cam and Puma are on a mission, and they have vowed not to rest until Locus is again a free man and back in the arms of Camili-Cat.

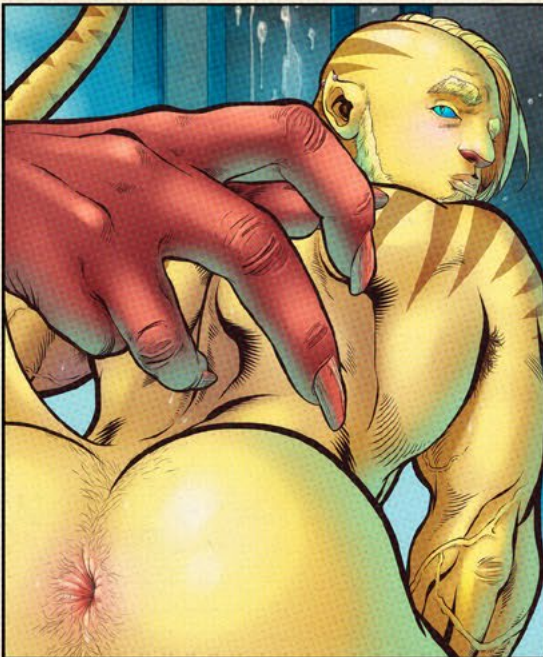

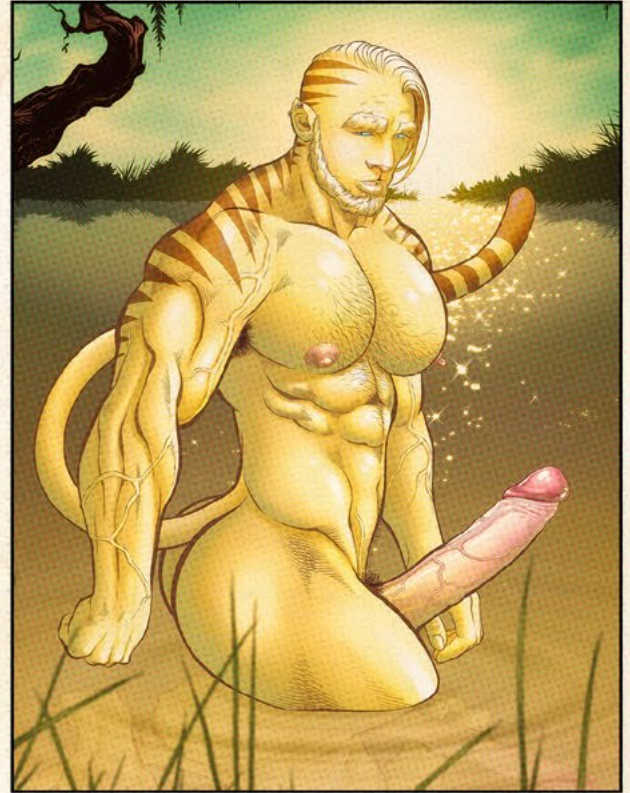

Gender: Male.
Sexual Orientation: Homosexual
Height: 6'2.
Weight: 195 lbs.
Hair: Blond.
Fur: Cream with brown stripes.
Eyes: Blue.
Penis: 11 inches, uncircumcised.

Known superhuman powers: Puma is formidable in a fight. He is often underestimated because he presents as a young Felinoid male. However, most overlook his Sivan lineage, and this is a grave error because that side of his physiology grants him impressive metamorphic abilities.

Puma can transform into most any kind of feline life form he chooses, making him exceptionally dangerous, especially in close-quarter combat. How long he can hold such a form while conscious is currently unknown, but unconscious, Puma immediately reverts to his natural humanoid state.

To date, he has demonstrated that he can morph into felines from both the planets Siva and Felainus. It is possible that he could also adopt the form of felines from other worlds such as Earth and Suktamimus, for example. However this hypothesis has yet to be proven. ■

RED VELVET

Real Name: Rajmund (last name unrevealed).

Other Aliases: None.

Occupation: Former professional ballet dancer, performer, singer, songwriter, acrobat turned adventurer.

Identity: Publicly known.

Legal Status: Former citizen of Poland with no criminal record. Immigrated to the United States, currently residing in Gateway City.

Place of Birth: Koszalin, Poland

Marital Status: Single.

Known Relatives: Grandfather (deceased).

Group Affiliations: Former member of La Troupe de la Lune, personal assistant to Doctor Oliver Solando, member of the Brigayde.

Base of Operations: Until recently, the Armistice Estates, Gateway City.

First Appearance: The Brigayde #1 (2016).

History: Taken from his grandfather as a child, Rajmund was forced to become the best ballet dancer he could be by a Russian crime-lord named Popov. The gangster spared no expense in molding the young dancer, hiring only the best teachers money could buy.

When Rajmund turned eighteen, Popov pushed himself upon him, forcing him to turn upon his vile captor. The youth was able to overcome his aggressor and make a break for it, fleeing to the United States. In their struggle, Popov was left disfigured. The foul man vowed he would someday find Rajmund again and exact his revenge.

Upon his arrival in North America, Rajmund made his way to Las Vegas where he auditioned for La Troupe de la Lune, an international dance company.

The managers of La Troupe de la Lune immediately recognized his immense talent, and helped him legally become a citizen of the United States. Rajmund was promptly hired and quickly became famous as Red Velvet, the company's biggest, brightest star.

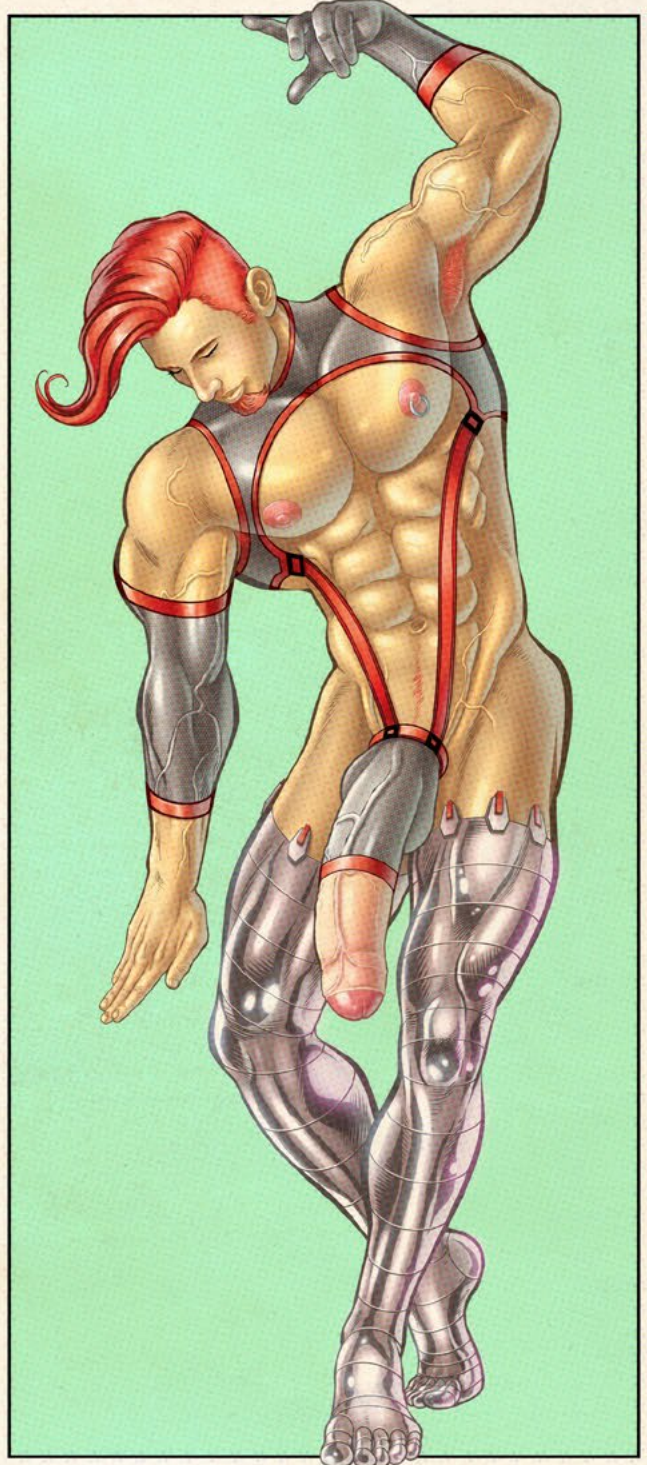

Sadly, Red's fame led Popov back to him. In a fateful altercation, Popov crushed Red's legs beneath the full weight of a fork lift's heavy load, leaving the youth broken and near death.

To save his life, doctors had to amputate Red's mangled legs. Broken and depressed, Red could not see how he continue on with his life, until Oliver Solando paid him a visit, offering to fit him with synthetic, mechanical legs. As thanks for all that Solando did for him, Red remained at his side as a sort of personal assistant.

Solando for his part was intent of forming a team of superheroes that would would fight for the good of all, but primarily watch over the lgbtqia2s+ community, protecting their rights, safety and freedoms.

While Oliver Solando is the patron who funded the birth of the Brigayde, Red Velvet is largely responsible for physically bringing the team together. At Solando's behest, Red personally reached out to every original member of the Brigayde, convincing them to join the team.

When Red's original bionic legs were damaged during a fire rescue mission, Solando created a new set for him. This new set were vastly superior.

They possess enhanced versions of the original pair's every attribute, as well as metamorphic capabilities, making them a great deal more powerful.

When he chooses, Red can prompt his feet to morph into concussive blasters, capable of low to high settings, either stunning, or perhaps even killing a target. He can use these blasters for propulsion, permitting him to fly or levitate at impressive, but limited speeds, the extent of which have yet to be tested and determined.

Additionally, the legs are outfitted with holographic technology which can disguise the metallic outer coverings of the artificial appendages, simulating human flesh. For the first time since losing his human legs, Red feels whole again.

Though he does not consider himself a superhero, Red remains an integral part of the team. Secretly, however, he longs to leave crime fighting behind and return to the stage. At heart, he is a performer and there is nothing he loves more than being on stage.

Gender: Male.

Sexual Orientation: Homosexual

Height: 6'0.

Weight: 175 lbs. Red himself weights approximately 125 lbs, no longer possessing the mass of his original human legs. The latest iteration of his mechanical limbs weigh a surprisingly light 25 lbs a piece.

Hair: Red.

Eyes: Hazel.

Penis: 9 inches, uncircumcised.

Known superhuman powers: None.

Weapons and paraphernalia: Red's bionic legs permit him to run at tremendous speeds. The synthetic appendages are resilient, extremely strong and durable, but not invulnerable. As Red recently discovered, the original pain were susceptible to extreme heat and force.

Now fitted with the superior, vastly improved and augmented "version 2.0" of his artificial limbs, Red has become an even more remarkable force. However, the full extent and limits of these legs has yet to be tested, but to date, they continue to surprise Red, and more importantly, afford him a serious edge in battle, striking fear in the hearts of his foes. ■

SPACE CADET

Real name: Byron Emil Durand.

Occupation: Photographer, underwear model, exotic dancer. Adventurer and Guardian of the Cube Former bodyguard for hire

Legal Status: Citizen of Gateway City with no criminal record

Former aliases: None

Marital status: Unmarried, in a serious relationship with Felix Himner (Naked Justice)

Known relatives: Louisa Durand (mother), Dr. Emil Durand (father), Sheldon Emil Durand (younger brother), Shannon Louisa Durand (younger sister), Yolanda Mae "Nanna" Durand (grandmother), Isaiah Shade (cousin)

Group affiliations: Former member of the now defunct Guardians of the Cube

Base of operations: Gateway City, North America

First appearance: The incredibly hung Naked Justice #2 (2004)

History: Born to Louisa Durand, a dance teacher, and Emil Durand, a well-respected scientist and engineer, Byron Durand is the eldest of three siblings.

He was a very quiet child who preferred to keep to himself and read comics rather than interact with the other children at his school. Considered the school geek, he was bullied from a young age by the older kids, and because of his slight build, they found it easy to push him around. Despite the hardships he endured, Byron remained a very optimistic and happy child, taking refuge from adversity in the pages of his favorite comic books.

His mother and father used to try and encourage him to be more outgoing, but Byron had no interest in making friends with the kids who treated him so poorly. He preferred to nourish his imagination instead.

One fateful afternoon when he was 15 years old, he and his mother were out walking in New York when Byron caught a glimpse of "the Goddess". To this day, his parents still don't know to whom he was referring, but Byron insists that this moment was the defining instant of his life. He saw his heroine fly gracefully across the bright, blue sky, her long silver hair and cloak flowing in the cool breeze, and in that instant, his life would be changed forever.

He had been bullied and ridiculed for too long, and he would stand for it no longer. Byron began to exercise and take care of his body. He joined the school track team and began to lift weights, becoming a full-fledged athlete. He took an interest in martial arts, pursued lessons, and became well-versed in many forms of combat.

Seeing "the Goddess" made him realize that he could be more than the boy that everybody pushed around, and that in fact he could become someone that people looked up to and respected. He decided then and there that he would fulfill his dream of becoming a superhero.

At 18, Byron felt he was ready for adventure. By then he had become an extremely handsome young man, toned and muscled to perfection. His body was as powerful a fighting machine as it was beautiful. Still, Byron needed a "gimmick"... an advantage in battle, something that set him apart and would give him his own identity as a hero. That is when he decided to turn to his father.

Gender: Male.

Sexual Orientation: Homosexual

Height: 5'8

Weight: 175 lbs

Eyes: naturally brown, though they appear blue because of the special contact lenses he wears.

Hair: Naturally black, dyed platinum blond.

Penis: 11 inches, uncircumcised. His foreskin has recently been restored.

Known superhuman powers: Space Cadet's abilities and powers have changed a great deal over the years, mostly due to his father's scientific enhancements. At the beginning of his career as an adventurer, Space Cadet had to rely on sophisticated paraphernalia such as jet packs to help him fly, and laser pistols which he employed as weapons in battle.

Along with a specialized suit and helmet which permitted him to breathe in airless environments, Space Cadet's initial arsenal was impressive, but by no means infallible. It was too easy for this equipment to fail him in battle, often resulting in perilous situations.

After several near-fatal battles, Space Cadet petitioned his father Emil Durand to help "alter" his physical abilities so that he would no longer depend on technology in battle. Space Cadet's ingenious father agreed to enhance his son through the use of several new scientific methods. Since these enhancements, Space Cadet no longer requires any of his original battle equipment, save perhaps his special optical contact lenses which make his eyes appear blue and permit him to see on a variety of light spectrums.

Now Space Cadet's powers appear to be fueled by cosmic radiation. His body is capable of absorbing ambient energy and discharging it in the form of highly concussive beams of light. Typically, Space Cadet chooses to emit these "laser beams" from his eyes or his hands, but it's believed he could theoretically project them from any part of his body... even his erect penis.

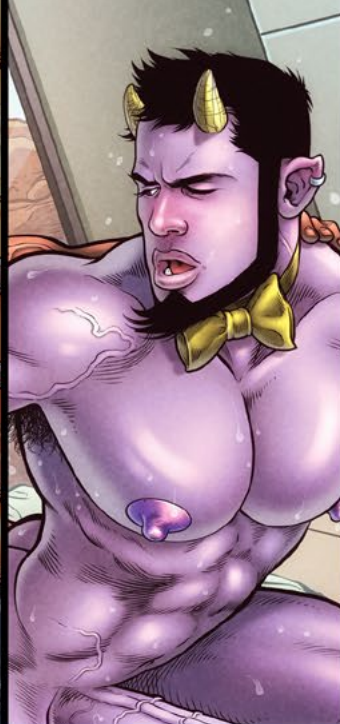

With enough concentration, Space Cadet can focus the width of his energy discharge into a finely tuned laser beam, ideal for precise requirements. Furthermore, he can emanate stored energy from every pore of his body, creating a searing, blinding, intense heat. To some degree, this heat can serve as a form of shielding as it can burn or melt objects that enter its radius. This is especially handy when trying to avoid being hit by bullets.

Since his enhancements, Space Cadet has developed flight capability. His maximum speed remains untested, but to date he has proven capable of breaking the sound barrier. He also seems capable of holding his breath for amazing periods of time, with his current record at just under an hour. This permits him to fly beyond the Earth's atmosphere without the need for an external air supply. Recently, he has also discovered that this ability is equally helpful when he is underwater.

Additionally, his skin has become incredibly tough, making him extremely resistant to impacts and physical attacks. This does not make him invulnerable however, only tougher to damage.

Whether the increased resilience of his skin marks the extent of his enhanced abilities or if there are still some aspects to his powers that remain to be discovered is unclear. After all, Space Cadet is the first human Emil Durand has ever enhanced, but one thing is for certain. Emil is closely and continually monitoring his son to ensure that there are no complications or negative side-effects from his scientific tampering.
