

Hello Everybody,  
I would like to introduce my  
lab assistant... Her name  
was Mary Smith...we can now  
refer to her as Relief  
Station BETA!

After a certain lab accident, mary was fused to this dollification stand and transformed into this... thing...grotesque!

She is totally assimilated!  
I swabbed her for DNA and  
the test couldn't tell she  
was ever human...which  
means.... We can sell her!

Just look what she made herself into.... Three holes in the front....room for full penetration...and look at the fuck hole of a mouth.

And just look at this view...a fuckhole. Thats it... she is practically nothing but an augmented sexual automaton

Its self lubing, self cleaning, motion sensing! And it is all self contained in unit. I'll have to ask the boys but I think it may be nuclear powered! No way this thing will run out of batteries!

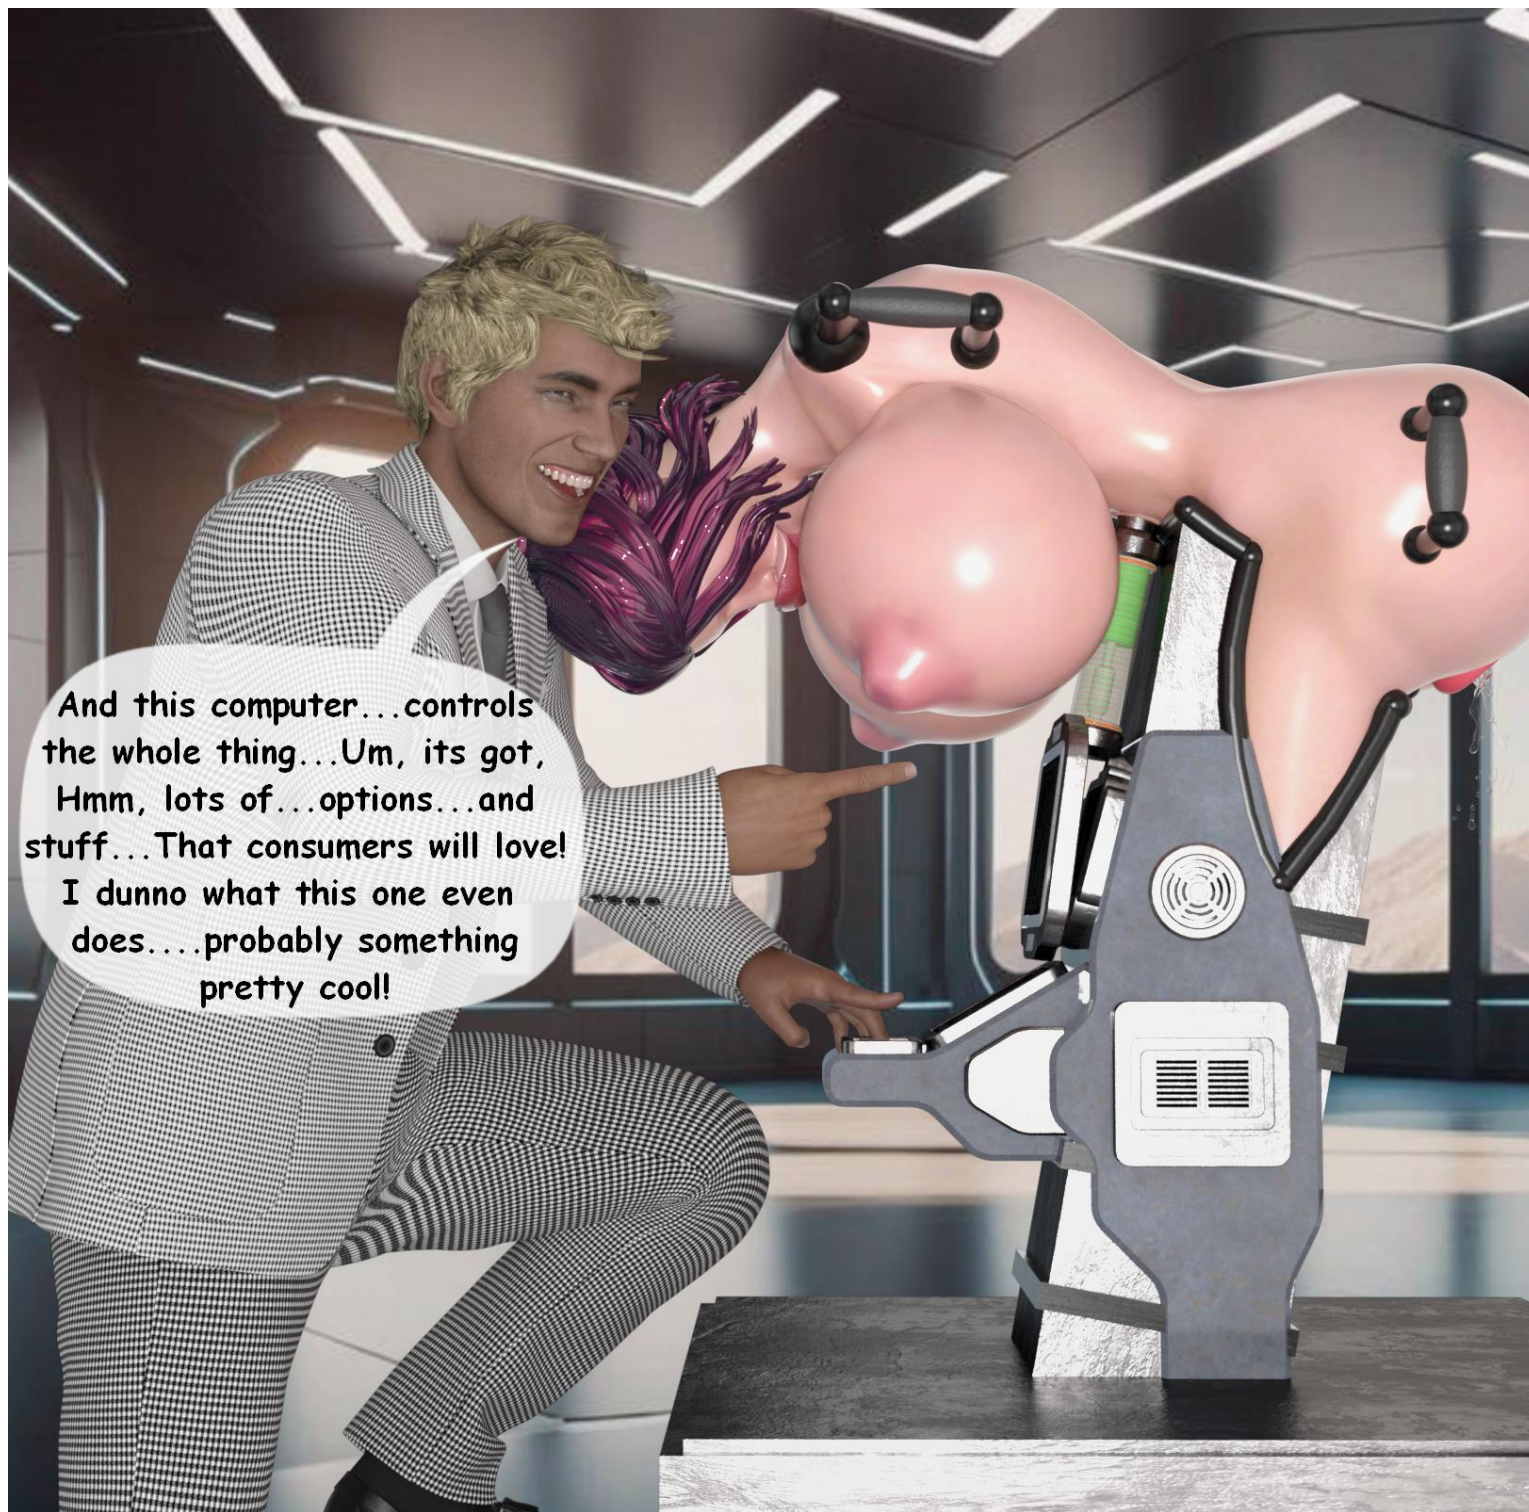

If you though that was a selling point...just look at its tits...a fuckhole in each nipple...or a fuckhole FOR each nipple! We will do a marketting poll to see what will sell more units!

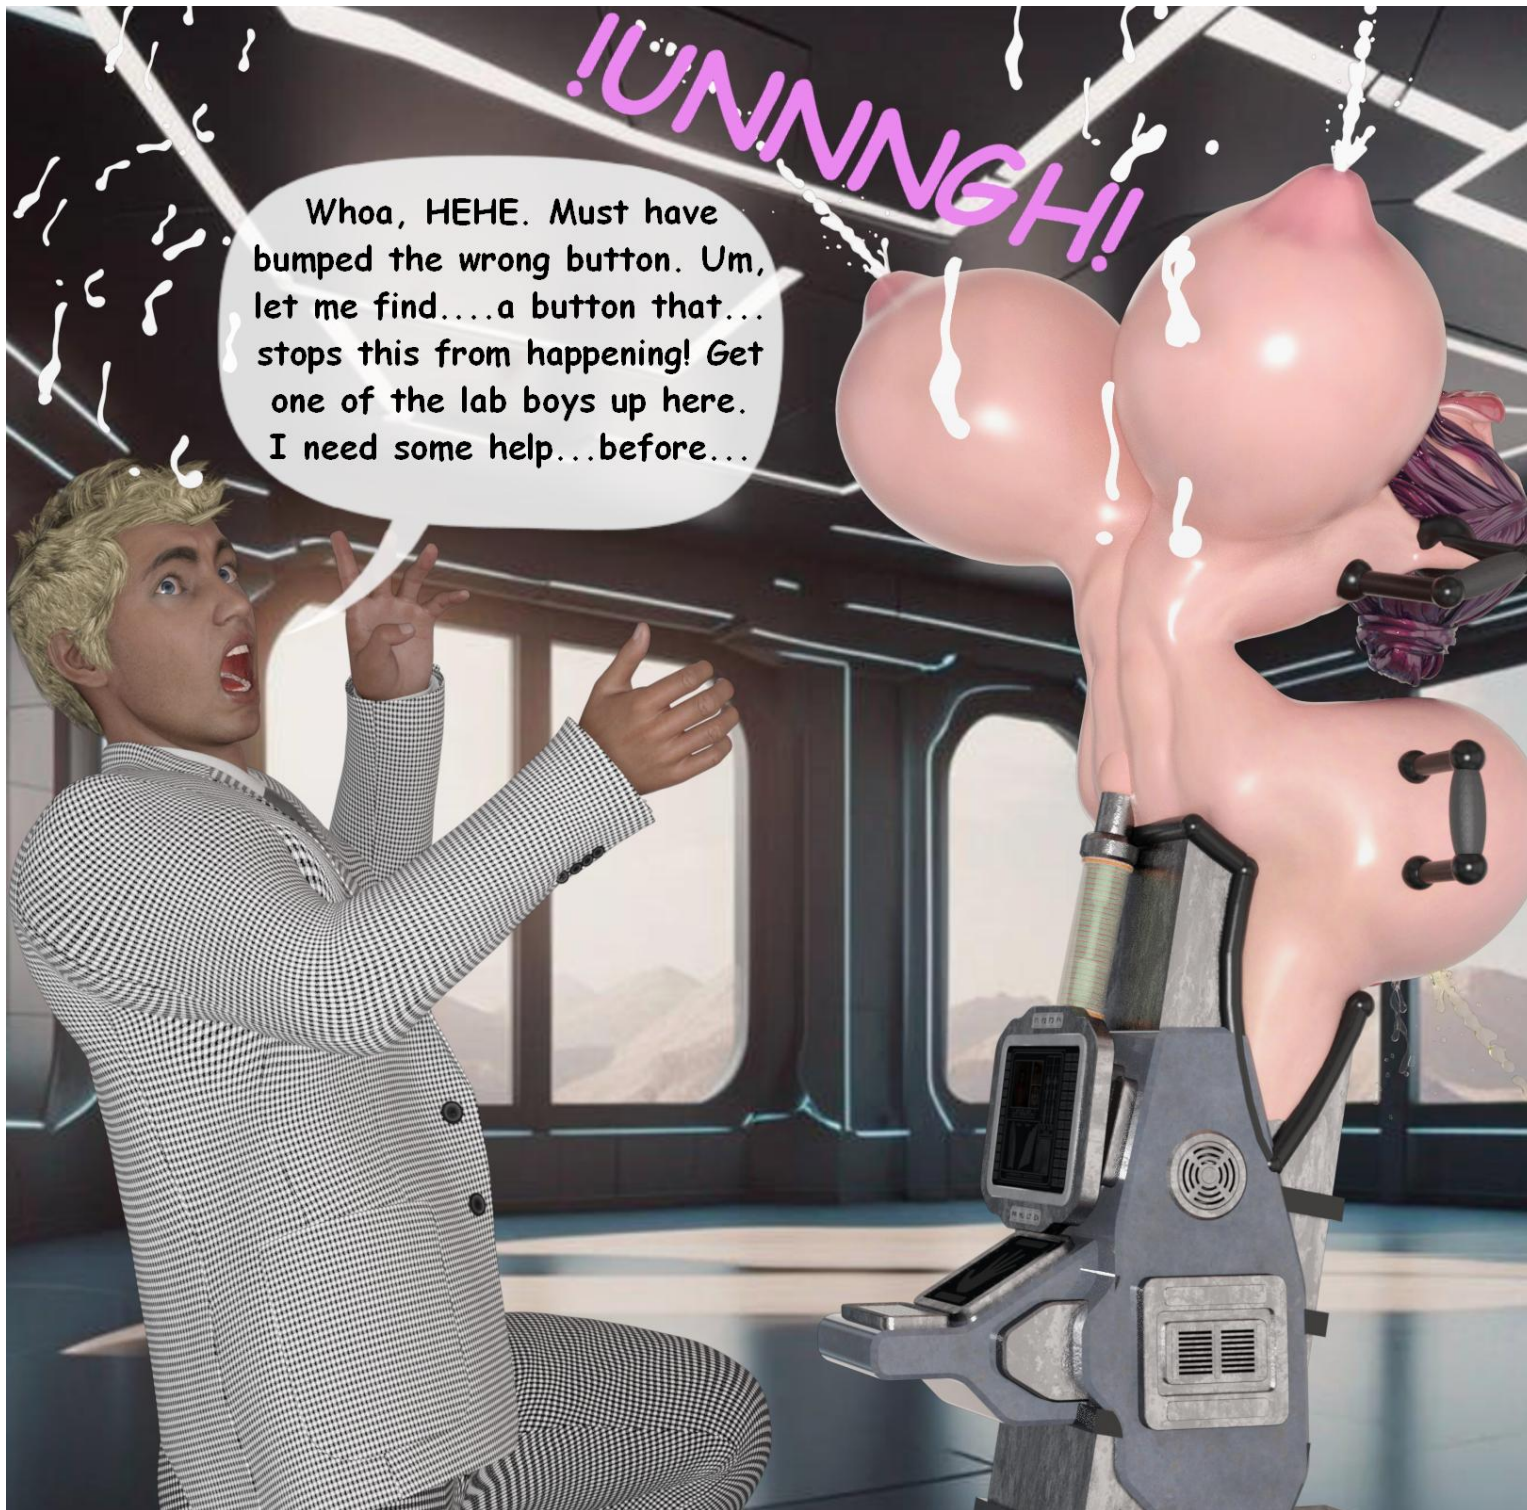

Now the lips. Bee-stung,  
silicone injected, balloon  
inflated, dick sucking lips that  
were designed in a lab...to suck!  
Anyone up for a free sample?  
Get with me after the  
presentation!

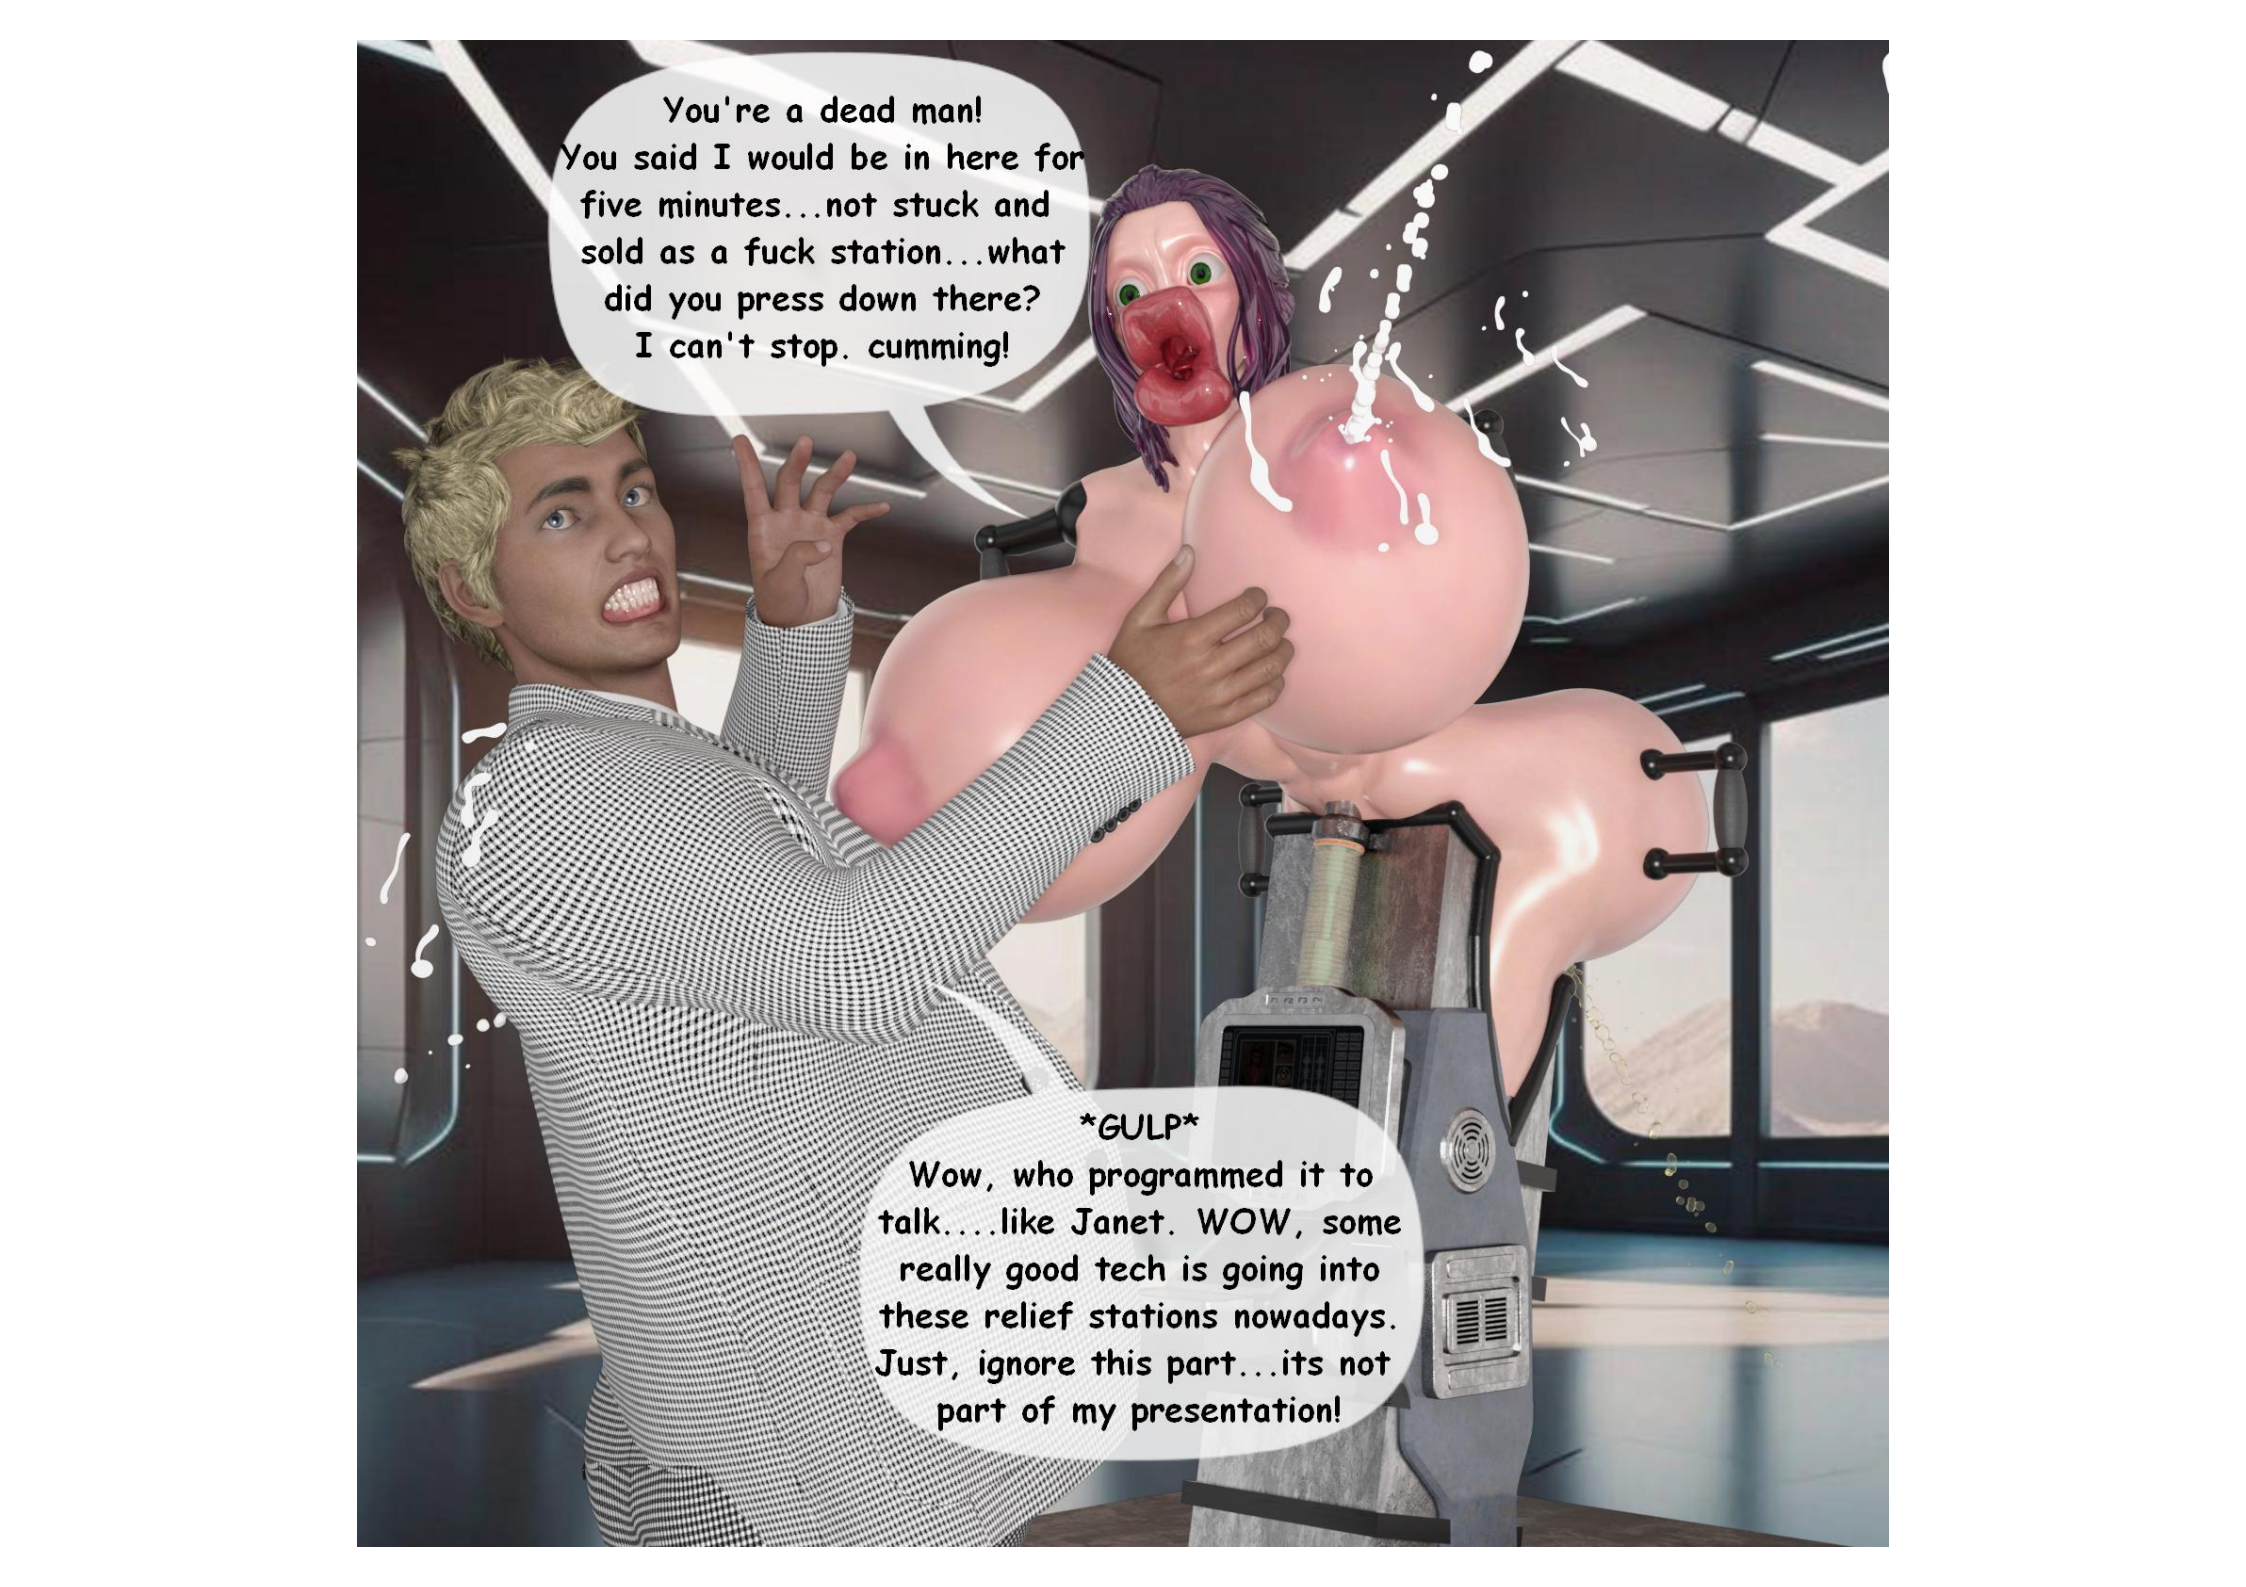

And this computer...controls the whole thing...Um, its got, Hmm, lots of...options...and stuff...That consumers will love! I dunno what this one even does...probably something pretty cool!

Whoa, HEHE. Must have bumped the wrong button. Um, let me find....a button that... stops this from happening! Get one of the lab boys up here. I need some help...before...

!UNNNNGH!

A man with blonde hair, wearing a grey and white checkered suit, stands in a futuristic, dark-colored room with blue accents. He has a shocked expression, with wide eyes and an open mouth. He is looking towards a female robot. The robot has a purple wig, large green eyes, and a wide, open mouth. She has very large, pink, fleshy breasts that are overflowing with a white, milky substance. She is holding a large, pink, fleshy object in her hands. The robot is mounted on a grey mechanical base. The background shows a window with a view of a desert landscape.

You're a dead man!  
You said I would be in here for

The new model is designed to appeal to the female and Bi market. Its got everything a pervert could want for a kinky night of debauchery!

These are custom...top  
of the line synthetic beings  
built for sex...we will put  
them in movies, promotions,  
XXXvideos, art exhibits,  
and more!

And when we are done!  
Sold to the highest bidder!  
Meanwhile the cheaper  
knockoffs we produced will  
be sold to the general public.

Getting ride of these

your loose ends...but the real  
money maker will be the newer  
production models...New and

a worker in these bad boys.  
Pure profit!
