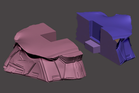
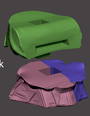
HOW TO ASSEMBLE THE MECHA

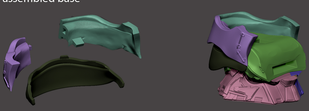


First join base part left / right

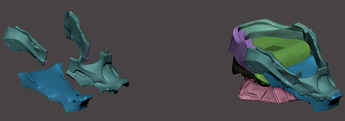
Now join the center piece named as neck



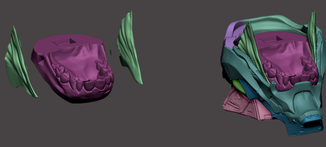
gather all the parts named as neck metaland fit them onto the assembled base

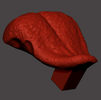


Bring together all the metal jaw pieces and fit them onto the already assembled base.



Fit the pieces named as mouth muscle into the lower jaw piece and then fit the base that has already been assembled

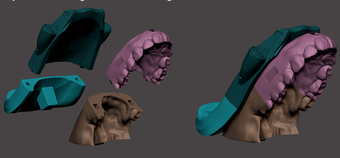




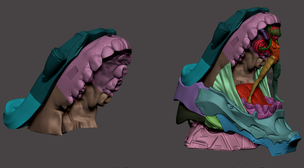
fit the tongue onto the already assembled base

it's time to assemble the character and fit it to the base

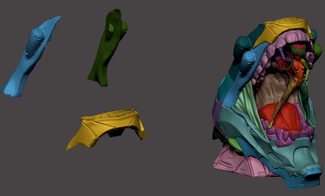
Now join the middle jaw and top jaw pieces, then fit the gum metal pieces 1 and 2 and join them all together as in the image below



join the top of the mouth to the base and mounted character



fit the pieces named gum metal left / right on the sides and then fit the protective gum piece on the top as in the image below



to finish, join the two pieces called head metal and
then fit them on top of the base that has already been assembled
