How to add the hair!

Download:

- **SoftHair Unity Package:** This is located in your library on Gumroad
- **Poiyomi Toon Shader** (*only if you don't already have it in your project! If you're using one of my avatars then you should already have this*):
<https://github.com/poiyomi/PoiyomiToonShader/releases>
- **VRCFury:** <https://github.com/VRCFury/VRCFury>

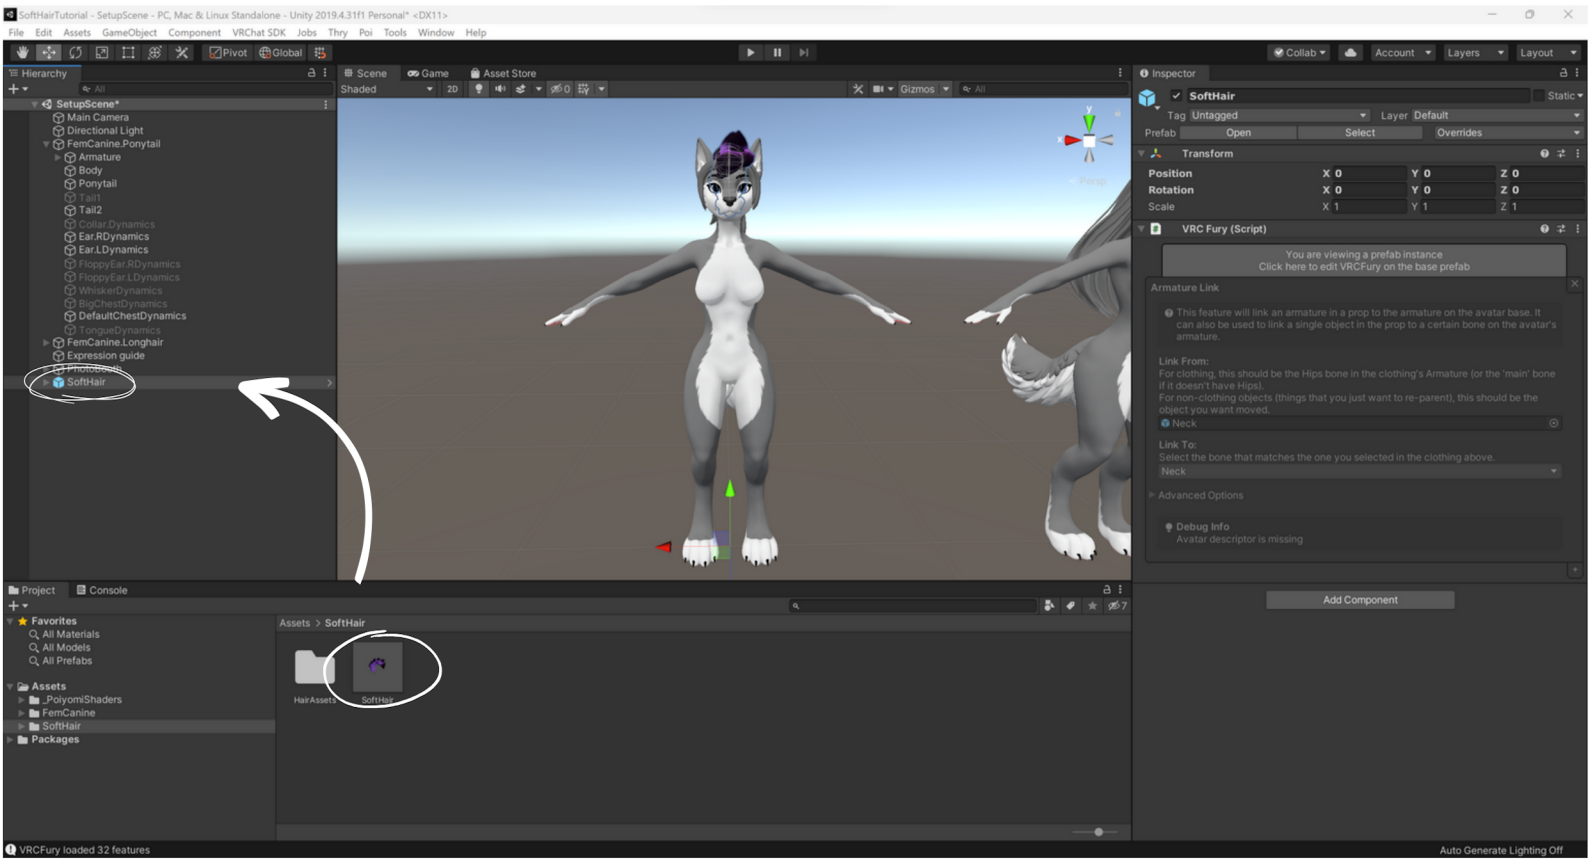

Step 1:

Download and import the soft hair unity package, vrcfury, and the poiyomi toon shader (only if you don't already have it in your project) into your project in Unity

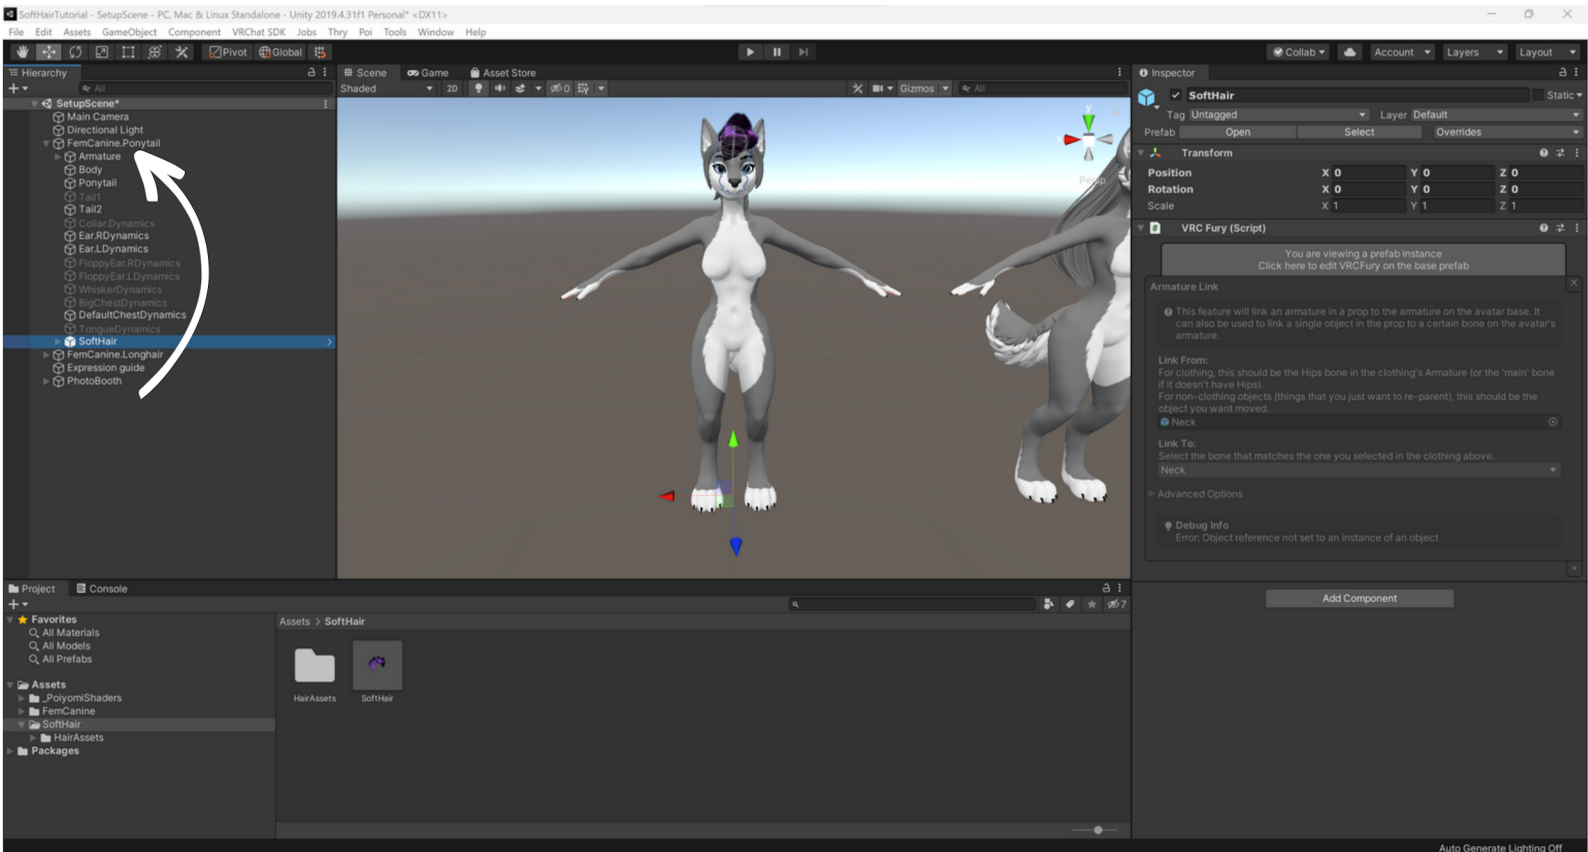

Step 2:

Drag the SoftHair prefab into the Hierarchy

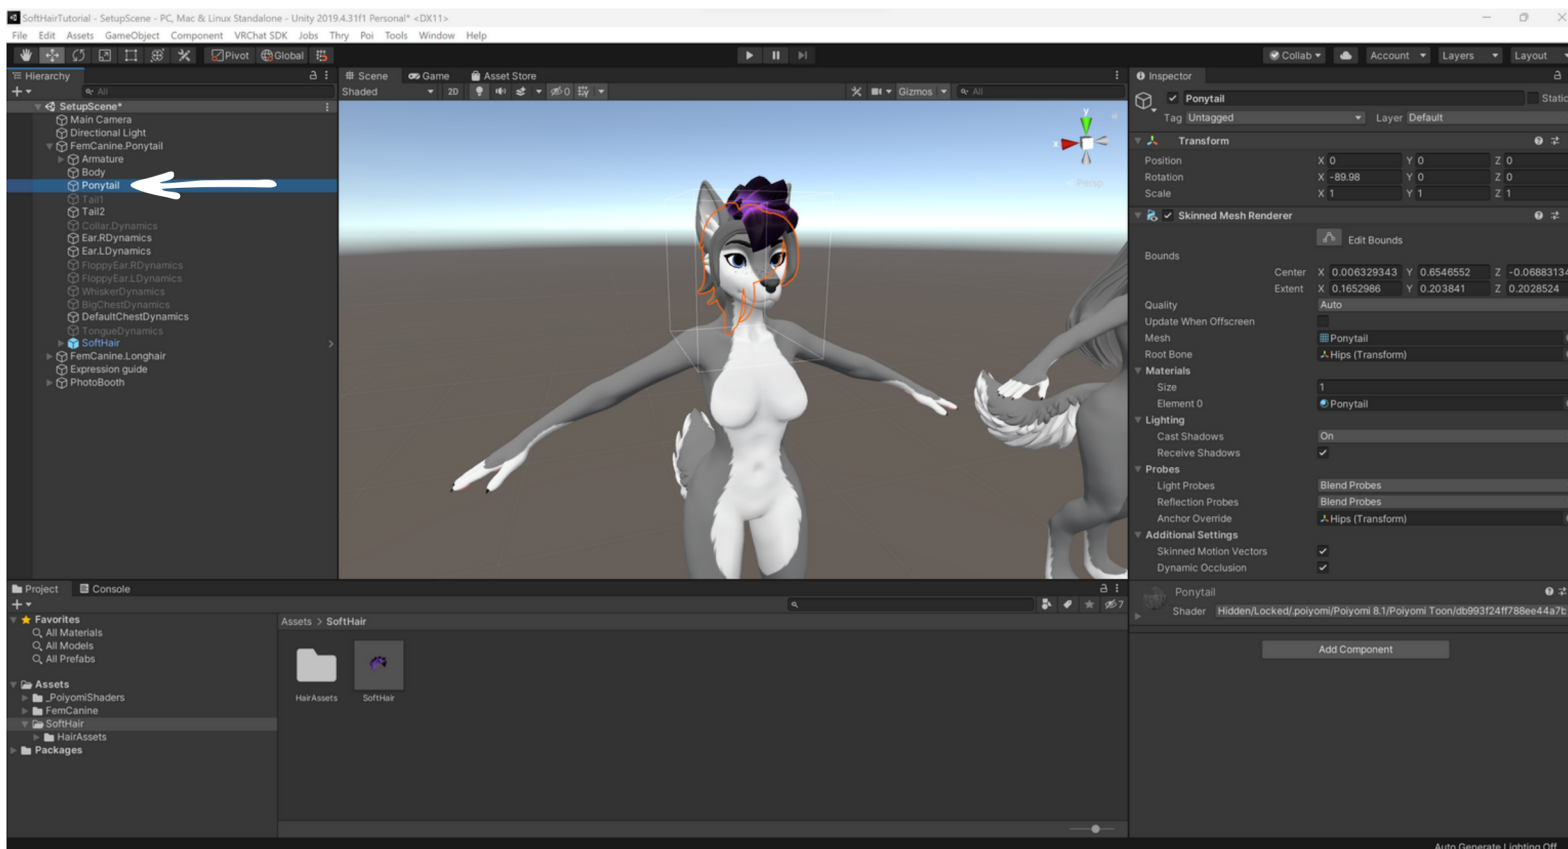

Step 3:

Drag the prefab directly onto your avatar in the Hierarchy

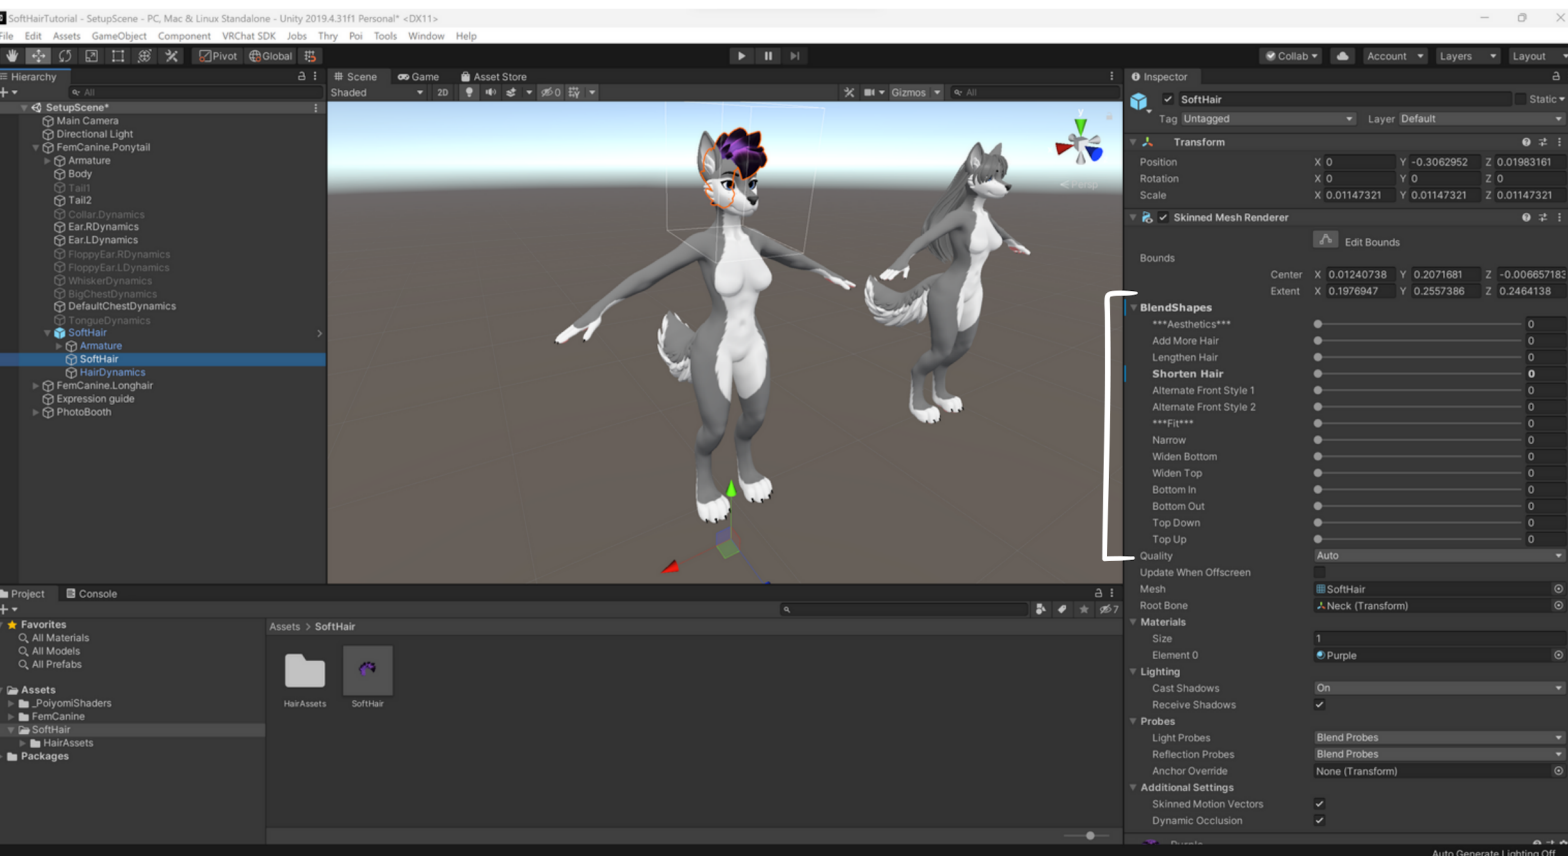

Step 4:

If you have existing hair as a separate mesh you can select it and delete it

Step 5:

Move the mesh and adjust the blendshapes to fit it to your avatar's head

DONE ^^
