

Well, I certainly didn't call our teacher a fat cow! What could I possibly have gained from that? It was my twin James for sure. Besides, fat cow is such a lame insult; why would I risk getting punished like this for something only he would find funny?

I was trying to quietly ask James a question when he suddenly blurted out the words "fat cow" and of course the teacher heard it and swung her body around towards us. She was so mad that she had steam coming out of her ears. Before I knew it, there was a strange sensation coursing throughout my body and then, the changes started. First, all of the muscle in my body faded away into fat, not that there was much muscle to begin with. Then, my hair grew longer until it reached down over my shoulders and onto my back. It also changed colors from blonde to brown. My face started changing shape, becoming small and feminine. Well that is except for my nose which actually grew wider to the point where it looked like a muzzle. My skin softened. It felt so smooth. But that's when the changes started to get intense. I looked down at my chest and saw two large mounds begging to grow out of my chest. They started to get so big that the buttons on my shirt started to come off. My ass also started to fatten up... like a lot. The same went for my thighs. The teacher snickered as she watched the spectacle. My stomach began to rumble. I looked down to see another large mound forming; but this time it was coming from my belly. It was massive, pink, and had 4 extra... things... coming out of it. Then I realized, oh my god, it was an udder. But that wasn't all. I started to sprout ears and a tail, and my feet were turning into hooves. Oh god she turned me into a cow.

The teacher looked at us and said, "I wasn't sure which one of you said that; so I made it easier to tell you two apart."

We both quickly got up and ran off. Well I wouldn't call it running because that shit is really hard with these hooves.

Later that day as I was hanging out around the house I wanted to see what milking myself would feel like. And oh my god it felt so great I couldn't help mooooving in pleasure. Maybe James got the short end of the stick. I mean between you and me. I totally called her a fat cow... worth it.
