

[ASMR] DOLL [MM4A][SCIENTISTS][SPICE]

Two scientists are on the breakthrough of a lifetime; creating life in robotics. These geniuses are you two. The listener is an experiment the two of you have built from the ground up. However, you definitely made them with the right assets and the... right... assets. One of you pulls the switch to awaken them and the listener begins to observe.

~ROY

System should be 75% now... Optics should be up.

~SHIA

Yup! Yup~ Eyes are open-- helloooo~ Can you see our handsome faces? (no reply)
...hmm. What's the status of the eardrum mics?

~ROY

Auditory function should be operational. (To listener) Can you hear us? (The listener only stares) Hmm... on my end, they should be able to hear us.

~SHIA

Huh... Do you think it's a bug? We did kind of rush securing the mics down.

~ROY

Well they're in the process of waking up. We literally just turned them on. They're still at 76%. Let's not assume the worst just yet.

~SHIA

You're right. Sorry sorry! Should we start while they're still hooked up?

~ROY

Go ahead with the first tests. You got the checklist?

~SHIA

Right here~ Alright. (To listener) Okay. I need you to acknowledge my directions. If you can hear me, tilt your head up and down for me. Consider this action confirmation from here on in. (The listener takes a moment but obeys) HAH! The mics work! We're good!

~ROY

Keep testing. We can't pop champagne yet.

~SHIA

Oh lighten up a little~ (Back to focus) Alright. Can you blink three times for me? Slowly if you can. (They obey, no issues) No obstruction in the eyes. Sensors to be tested later.. Okay! So far so good.

~ROY

Reaction speed is perfect. Signals are firing faster than we predicted inside the motherboard.

~SHIA

That's cause we're geniuses~

~ROY

79%. Let's keep moving.

~SHIA

Right, right... (To listener) Okay. Mouth test. Basics first. Please open your mouth for me. (The listener obeys) Okay good... Can you stick out your tongue? (They obey. You place two fingers on their tongue) Thank you. Hmm... warm and moist. Tongue's good.

~ROY

Thank God the silicon works...

~SHIA

After how much we paid for the stuff, it better! (To listener) Go ahead and close your mouth. (They do, but they keep the tongue out) Ack-- uh... your tongue, too. Back behind your lips. (They obey) Haha! Good.

~ROY

Did you just make them blep like a cat?

~SHIA

Not intentionally!... It was kind of cute, though.

~ROY

Focus. 81%. Limbs should be operational now.

~SHIA

(Focus up) Okay. We'll go ahead and test those. Lift both of your arms for me? (They obey) Can you wiggle your fingers? (They do~) Almost instant. That firmware update did wonders.

~ROY

Naturally. (Call to the listener) Go ahead and try and wiggle your toes too.

~SHIA

Huh? (The listener is obeying) Oh wow! No blockages of any kind from what I can see. Pretty sure their legs will work just fine at this rate.

~ROY

Alright, switch with me. (Walk away from the console and approach the listener) I'll go ahead and run the tests for cognitive function.

~SHIA

You got it. (You trade places with Roy. Electronic signs are surprisingly normal.) 83% and rising~ Go for it.

~ROY

(To listener) Alright. This is test twenty-five of your cerebral cognition. This is to test your ability to respond to actions with deduction and not automated obedience. Do you understand? (The listener nods) Good.

~SHIA

Nothing abnormal here. You can probably skip the name and memory test. They probably know who they are at this point.

~ROY

Very well. (To listener) I'm going to touch different parts of your body with my fingers. I need you to acknowledge each touch with a deductive response. Do you understand? (The listener nods) Here we go. I'll start with your cheek and neck.

Roy, you direct your fingers along the listeners cheek and neck. They actually shiver beneath your touch, but you expected this. They were built to feel good.

~ROY

Nervous system seems operational, if a little sensitive. They're... shivering.

~SHIA

A little sensitivity never hurt anyone~ Still, shivering is a good thing, right?

~ROY

(To listener) Does it feel good when I rub my fingers here? (You rub the back of your fingers against their neck; it feels really good) ... it does? Would you like me to stop? (They shake their head) then I shall keep going.

~SHIA

Ooo their internal temperature rose a little. Careful there~

~ROY

Let me know if it gets dangerously high. (Back to the listener) Now, I'm going to move my fingers down your arm. When I reach your hand, I want you to either take mine or slap it away if you do not like it. Okay? (You move forward with said action, letting them shiver under your fingers. They slowly hold your hand when you reach theirs) Good. I'm glad you didn't slap my hand.

~SHIA

They're not crushing your hand either! Score for the firmware update!

~ROY

We're not done yet. We still have to check the torso area. (To listener) alright. I'm going to release your hand and move to your stomach. I will slowly trace my hand up back to the neck and we'll stop there. Okay? (The listener nods)

Your hand slowly releases the listener's. You touch the listener's stomach and see them tense up a little bit.

~ROY

Is something wrong?

~SHIA

Dude, your hand is colder tha--

~ROY

Let them tell me. We still have to check their voice box anyway. (To listener) What's wrong? (The listener confirms that your hand is cold on their belly) My hand is cold? Would you like me to pull it away-- huh? (The listener slowly takes your hand and covers it with both of theirs against their stomach)

~SHIA

Are they...warming up your hand with theirs?

~ROY

Yeah... This is amazing... (To listener) Thank you. My hand feels much warmer now. I'm sorry for touching you with cold skin. (The listener smiles)... you have a lovely smile.

~SHIA

86%! Facial expressions should be online-- (You see the listener's smile) oh! Wow... they do have a pretty smile...

~ROY

Heh. If it's alright, may we continue the test? (The listener nods and releases your hand) Thank you. Now, where were we? Right, the chest... I'm going to use my full hand to touch you, okay?

The hand goes up the listener's chest and elicits the most surprising reaction; a moan.

~ROY

Uh--... did...

~SHIA

Did they just moan when you touched their chest?

~ROY

I think so... (To listener) Did you like that? (The listener remains silent, surprised at their own reaction) It's okay to like that feeling. Touches like that are meant to feel good.

~SHIA

You can totally push him away, though~! (Listen: I don't want to!) H-Huh? You don't want to?

~ROY

Well that's good. I'm thankful for that. Now let's-- (The listener gently takes your wrist and guides your hand back to where it was.) Huh? You want me to... keep touching you there?

~SHIA

Huh??? (Look at the console screen) Woah... their motherboard already registered that feeling as positive.

~ROY

Should I--

~SHIA

Keep doing it! DUH! Listen to them!

~ROY

Alright... (You step closer to them and caress their chest again. They feel very warm, by design, and it actually feels very good to touch them.) Mmm... You're very warm... (Listen: Do you feel good?) Do I feel good? I do indeed, as long as you feel good too. (You ponder a thought.) Can I squeeze here? (The listener nods and you give a small squeeze. It makes them moan again.) Mmm... good.

~SHIA

Okay now I want a turn to teach them.

~ROY

One of us has to watch the console--

~SHIA

Then you watch it and I'll check their legs! They're fully operational now at 89%

~ROY

(You don't want to. But it's only fair.) ...alright. (You slowly pull your hand away, despite the listener contesting) Shhh it's okay. There are more ways to feel that good. We'll show you slowly so you can know each and every way... do you understand? (The listener nods) Good.

Shia, you switch with Roy. You know plenty of spots on the lower half of the body where the listener can register pleasure, so like the good scientist you are...

~SHIA

Alright! Let's go ahead and sit you down on this chair. Don't want you toppling over during the test. (You guide the listener into a chair and kneel before them) I'm gunna do what he did but on your legs, okay?

~ROY

91%... hmm... their internal temperature is a little high...

~SHIA

Well no duh... (You slowly massage your hands against their waist) Wow... you really do feel warm... soft, too. (Permission first) Can I, uh... check your thighs? (The listener

nods) Yeah? Okay. (They are indeed very luscious and warm. You massage each side of one.) I'll just massage this thigh first...

Shia, this robot was built VERY well. It actually feels halfway addicting to touch them and hear them elicit moans from your hands. They quake a little beneath your touch with a very lewd expression.

~SHIA

Holy shit... your face... did we register that expression? It's kinda lewd...

~ROY

Nope. We didn't register that one. They must have made it on their own based on the positive feeling they're experiencing.

~SHIA

Dude, we can just call it what it is. (Listen: What is it?) Huh? What is it called? It's called Pleasure. We gave you touch recognition and pleasure is part of it. So feelings like this... (You squeeze their thigh slightly) Mmmm... those are good feelings.

~ROY

If it ever becomes a bad feeling, you need to tell us, okay? Not that we would ever intend to hurt you, but your deductive reasoning should allow you to determine what is 'pleasure' and what isn't.

~SHIA

Exactly~ (Lean in and tease a little) So if I touch you on your hip like this... (You do such. They like it a lot~) Mmmm, what a cute reaction. Did that feel good? (They affirm) Awesome~ Mind if I keep touching you like this? It feels good for me too... (Listen: Lower...) lower? You want me to... ohh~

~ROY

What?

~SHIA

Don't worry about it. Just keep watching the screen.

~ROY

I see the screen and their internal temperature is rapidly rising. Chill out with the teasing.

~SHIA

(To the listener) Well, what do you think? Should I stop? (Listen: No...) No? You want me to keep going? (Lean into their ear) You want me to touch you there? I'd like to as well, but that mean guy over there said to stop~

~ROY

Oy! Quit getting distracted! (Listen: Please let him touch me) H-huh? Let him touch you? I... At least teach them kissing first?

~SHIA

(Listen: Kissing?) Ooo right. Remember that mouth test we did? I'm gunna slowly come up and... (gently lay a kiss over their lips) mmm~ wow, even your lips are warm...

(Listen: can we do that again?) You want another kiss? Well then~ for science~ (Give them a slightly deeper kiss) Mmmm~

Okay, Shia's having a little too much fun. Roy, get your ass in there.

~ROY

95%. They're almost clear to unplug. Switch.

~SHIA

(lips still attached) nuhhmm(nuh-huh)... (NOW unlatch) They want my kisses, so why should I?

~ROY

Because kisses don't just belong on lips... (You approach and whisper in the listener's ear) They can also go on other parts of your body and feel just as good, if not better... like right here on your neck... (kiss their neck)

~SHIA

Ooo... What a sound! We certainly did not program that into your voice box~

~ROY

You must really enjoy this... (lay a couple of heavier kisses down near their ear) You are quite a marvel... with such a cute voice... such sexy reactions...

~SHIA

Ah-ah-ah~ We're not done yet with kissing~ (Capture their lips again in another heavy kiss) Mmmmm~ The best part? We can kiss you and touch you, too~ Just like this~

(Touch [NON SEXUAL YOUTUBE FRIENDLY PART HERE] as you kiss them again)
Mmmmmuah~ A kiss here, a squeeze there~ It's all possible...

~ROY

And remember: You're in control here... (lay a butterfly kiss) we can kiss you and touch you as much as you want... (another kiss) but you can stop at any time... you are *a/ways* in control... but it's also just as okay to keep going and even go deeper... (a slower, slightly wetter kiss)

~SHIA

That's right~ Now, where do you want to be touched next? Let's get you to 100%~

(POTENTIAL END? IF THIS IS LIMIT?)
