

Void Dragon
red body &
pink
electricity

Step-by-step

◆ Paints required:

Void Dragon red body

- Mephiston red
- Abaddon black
- Vermilion (Vallejo mc)
- Basic skin tone (Vallejo mc)

Pink electricity

- Magenta (Vallejo mc)
- Screamer pink
- Basic skin tone (Vallejo mc)
- White

Basecoat the body with a 2:1 mix of mephiston red & abaddon black

We now start glazing in the frame of the light reflections on the body, by glazing with pure mephiston red – add 2-3 parts of water. I have added a video tutorial for how to glaze & a pdf guide for how to locate light reflections in the post description.

We now make a 2:1 mix of mephiston red & vermilion & glaze more towards the middle of the light reflections – add 2-3 parts of water.

We now 1 part more of vermilion & glaze the middle of the light reflections.

We now shade all the deepest recesses & areas still covered in the basecoat with a 1:1 mix of mephiston red & abaddon black – add 2-3 parts of water.

We now start by edge highlighting all the sharpest edges on the body with pure vermilion – we furthermore glaze in the very middle of the light reflections with 1: 1: 1/2 mix of vermilion, mephiston red & basic skin tone. Done! 😊

We now start working on the pink electricity. We basecoat it with screamer pink.

We now glaze in all the most raised areas on the electricity, with a 1:1 mix of magenta & screamer pink. Add 2-3 parts of water.

We now glaze in the middle of the raised areas with Magenta. We furthermore make a 2:1 mix of Magenta & basic skin tone, & glaze the very middle.

We now add 1 part of white to the previous mix, & leave a small dot in the very middle once again. Now its done 😊 !
