TEST SUBJECTS

DRONE FACEHUGGER

Length: 90 - 150 cm;

Length of penis: 100 cm;

The facehugger is the second stage in the life cycle of a Xenomorph. Its bony finger-like legs allow it to crawl rapidly and its long tail can launch it in great distances. The facehugger is a parasitoid; its only purpose being to make contact with the host's mouth for the implantation process. The Facehugger secures its eight finger-like appendages tightly around the head of its victim and wraps its tail tightly around the host's neck, eliciting a gasping response and allowing the insertion of an ovipositor into the host's esophagus. It transfers one embryo, which is implanted in the sternum through oral sex with the victim.

QUEEN FACEHUGGER

Length: 190 - 230 cm;

Length of penis: 150 cm;

The Queen facehugger is the second stage in the life cycle of a Queen. Its bony finger-like legs allow it to crawl rapidly and its long tail can launch it in great distances. The facehugger is a parasitoid; its only purpose being to make contact with the host's mouth for the implantation process. The Facehugger secures its eight finger-like appendages tightly around the head of its victim and wraps its tail tightly around the host's neck, eliciting a gasping response and allowing the insertion of an ovipositor into the host's esophagus. It transfers 3 embryos, which is implanted into the intestine through anal sex with the victim.

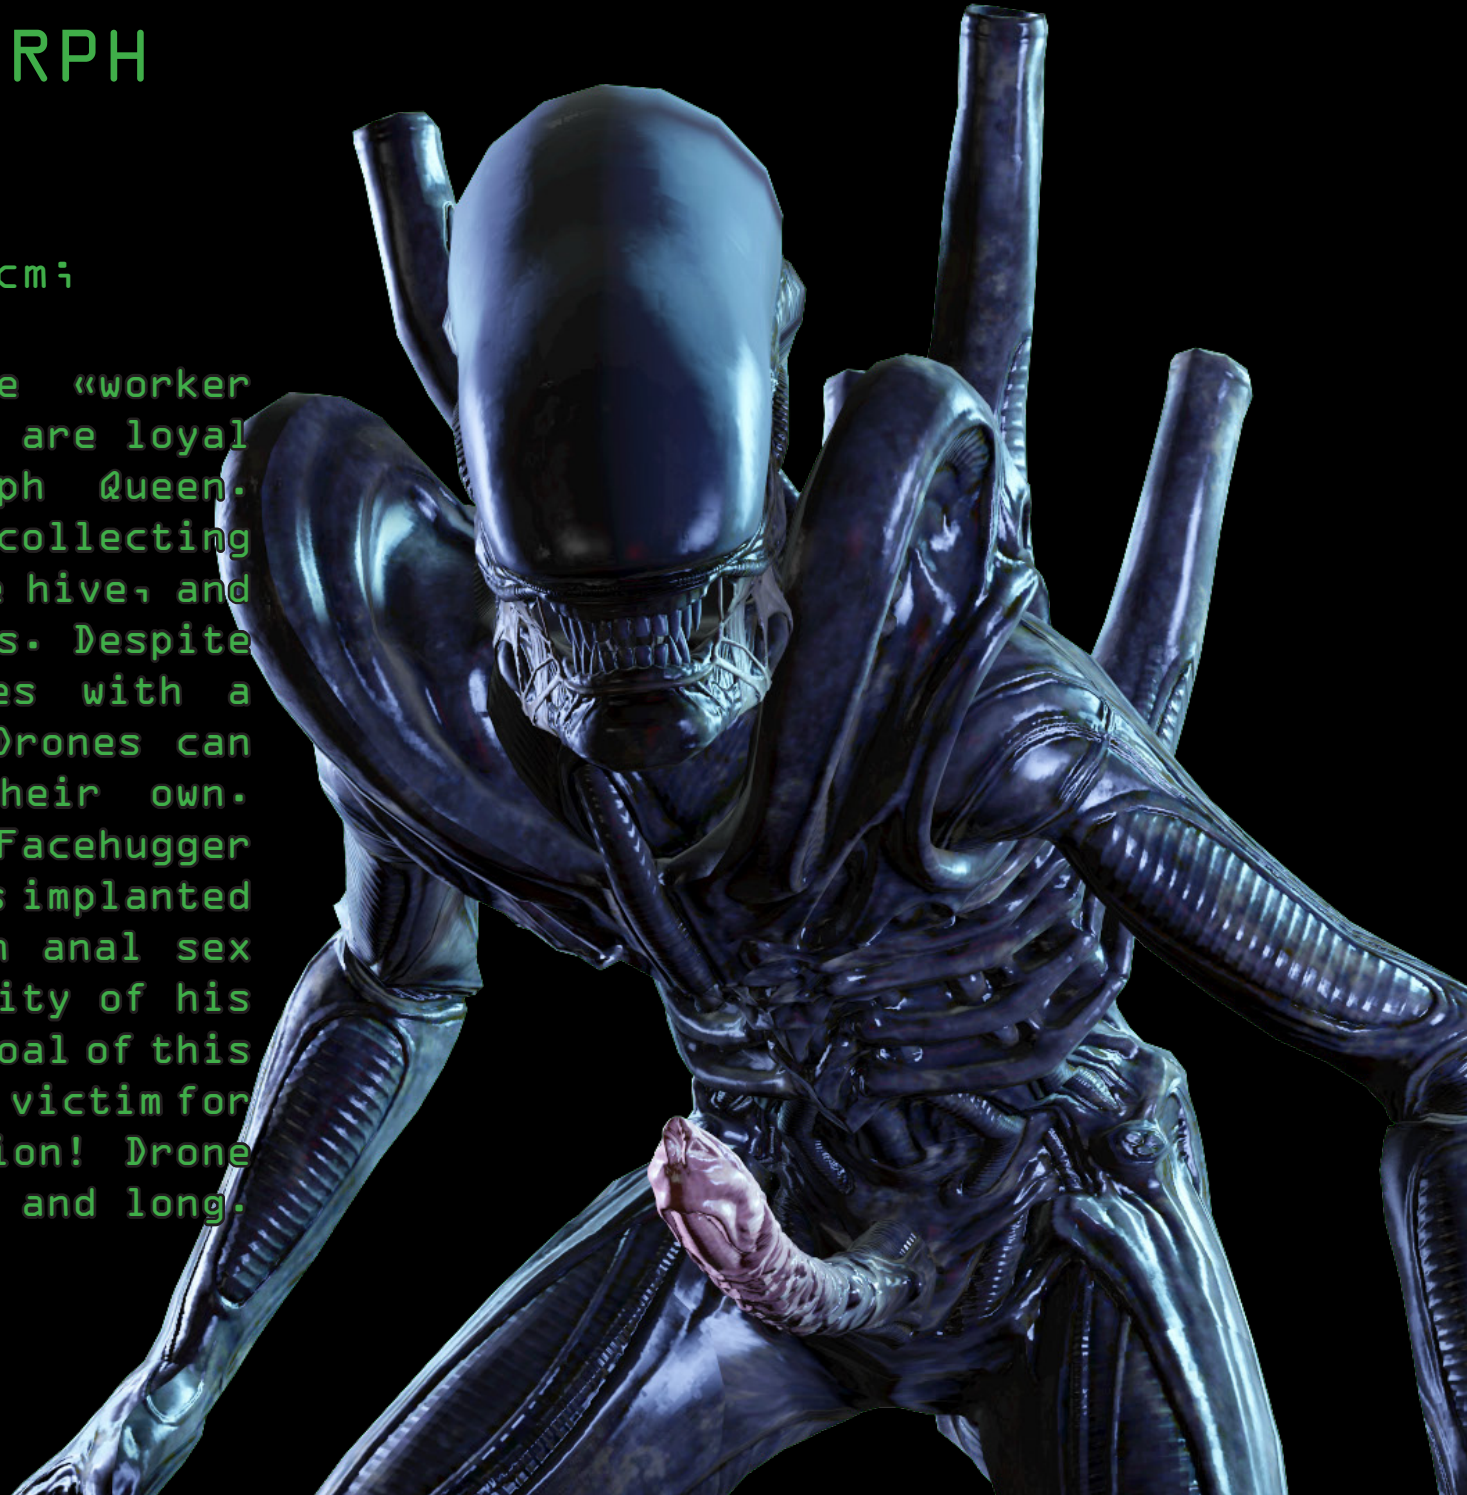

DRONE XENOMORPH

Height: 250 - 290 cm;

Length of penis: 45-55 cm;

Xenomorph Drones are the «worker bees» of an Alien hive and are loyal servants to the Xenomorph Queen. They are responsible for collecting hosts, further building the hive, and caring for the Queen's eggs. Despite being born into a species with a hive mind functionality, Drones can be just as deadly on their own. It transfers one Queen Facehugger embryo in their cum, which is implanted into the intestine through anal sex with the victim. The capacity of his cum is 700-950 ml. The main goal of this individual is to search for a victim for reproduction or insemination! Drone fucks his victim very hard and long.

PREDALIEN

Height: 310 - 350 cm;

Length of penis: 49-61 cm;

A «predalien's» typical appearance and behavior is similar to the typical human-spawned Xenomorphs, albeit with the telltale hair-like appendages and mandibles of a Predator. They are extremely deadly, and can use their sharp tail to dice someone into pieces. Their methods of attacking prey, however, are similar to those of a tiger or a shark: they circle around their intended victim, growl, then snap them up. It transfers 2-3 xenomorphs embryos in their cum, which is implanted into the intestine through anal/oral sex with the victim. The capacity of his cum is 650-850 ml. Main aim of Predalien is insemination of the victim! Predalien rapes and impregnates his victim a lot of times.

BARNEY CALHOUN

Height: 181 cm;

Length of penis: 21 cm;

Barney Calhoun, an undecided major after two years at Martinson College, is employed as a mid-level security officer at the Black Mesa Research Facility, with Level 3 security clearance and is accommodated in the Area B Topside Dormitories. He is friends with Gordon Freeman and Isaac Kleiner, who are also employees of Black Mesa. During an unforeseen cascade resonance that occurred on the Black Mesa, he was dragged into an elevated portal and transferred to the former colony on planet LV-432, where the xenomorphs placed him in a cocoon and began to be used as a queen for reproduction, by means of insemination and impregnation.

JAMES VEGA

Height: 185 cm;

Length of penis: 20 cm;

Lieutenant James Vega is a human Systems Alliance Marine and a member of Commander Shepard's squad. While Vega is an experienced soldier, he is unfamiliar with the seedy underbelly and political workings of the galaxy. After another successful mission, James with a small detachment was sent to planet LV-439 to examine the help signal. After the discovery and opening of the former colony infected with xenomorphs, the entire squad of James was killed, and James fell into the clutches of Predalien!
