HISTORY

Hollow is originally from the Seasons Islands, where parrots like him are revered for their cheerful songs. Hollow decided to leave his ancestral home in search of a place where his morose and haunting songs are appreciated. He has been with various caretakers since.

PERSONALITY

Hollow is reclusive and shy. He shuns company, and likes his nest to be in a dark, secluded place. Paradoxically, the bird really enjoys music, and seems to crave an audience to sing his long, morose songs to.

CARE NOTES

- Needs time to be acquainted to a new caretaker. Gain his affinity by taking the time to listen to his songs.
- Requires a dark and secluded place to nest - but close enough to people so his song can be heard.
