

VIRTUAL SEX LIFE

It's been a bit taboo ever since its launch...

The latest in VR technology, a suit that allows you to feel everything that your avatar feels. And a headset that basically transports you into another world.

Sounds awesome, right?

It was designed for the gaming industry,
so players could have total immersion...
But I was never really much of a gamer.

And there's really nothing
taboo about gaming.

What happened was that,
quickly after launch, perverts
like me found another use
for the new technology.

ACTIVATE CHARACTER
CUSTOMIZATION!

A better use.

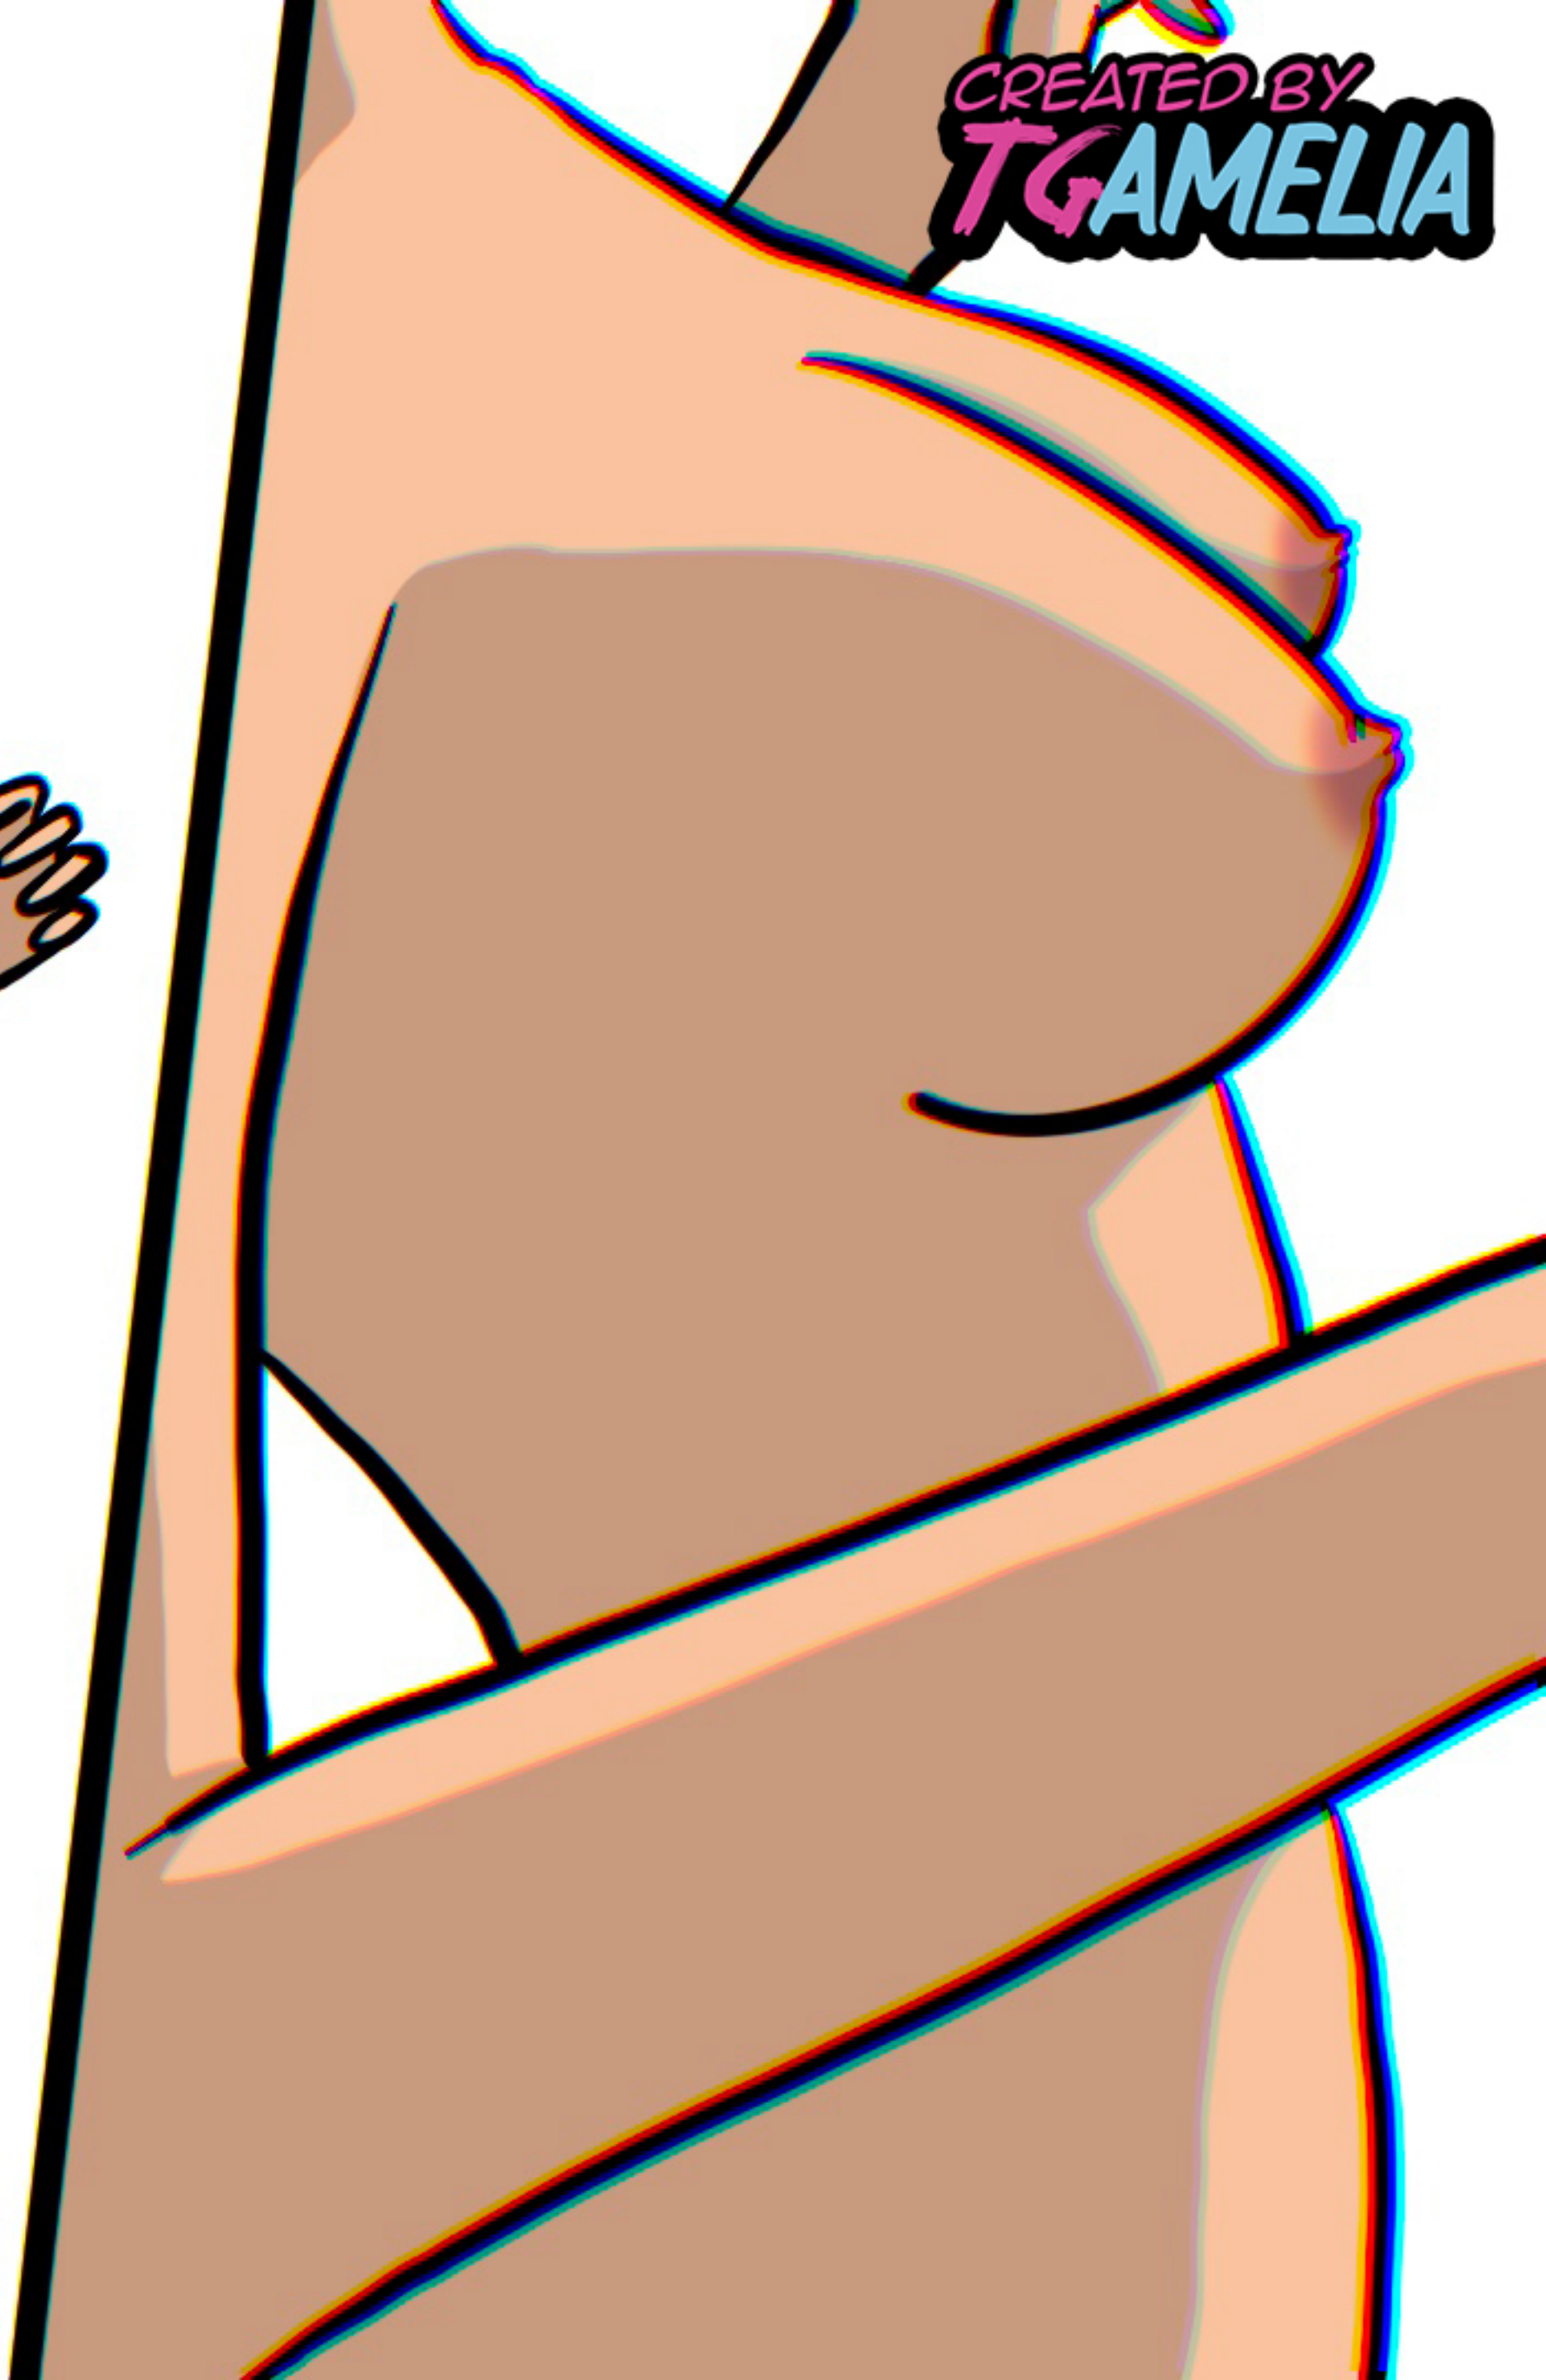

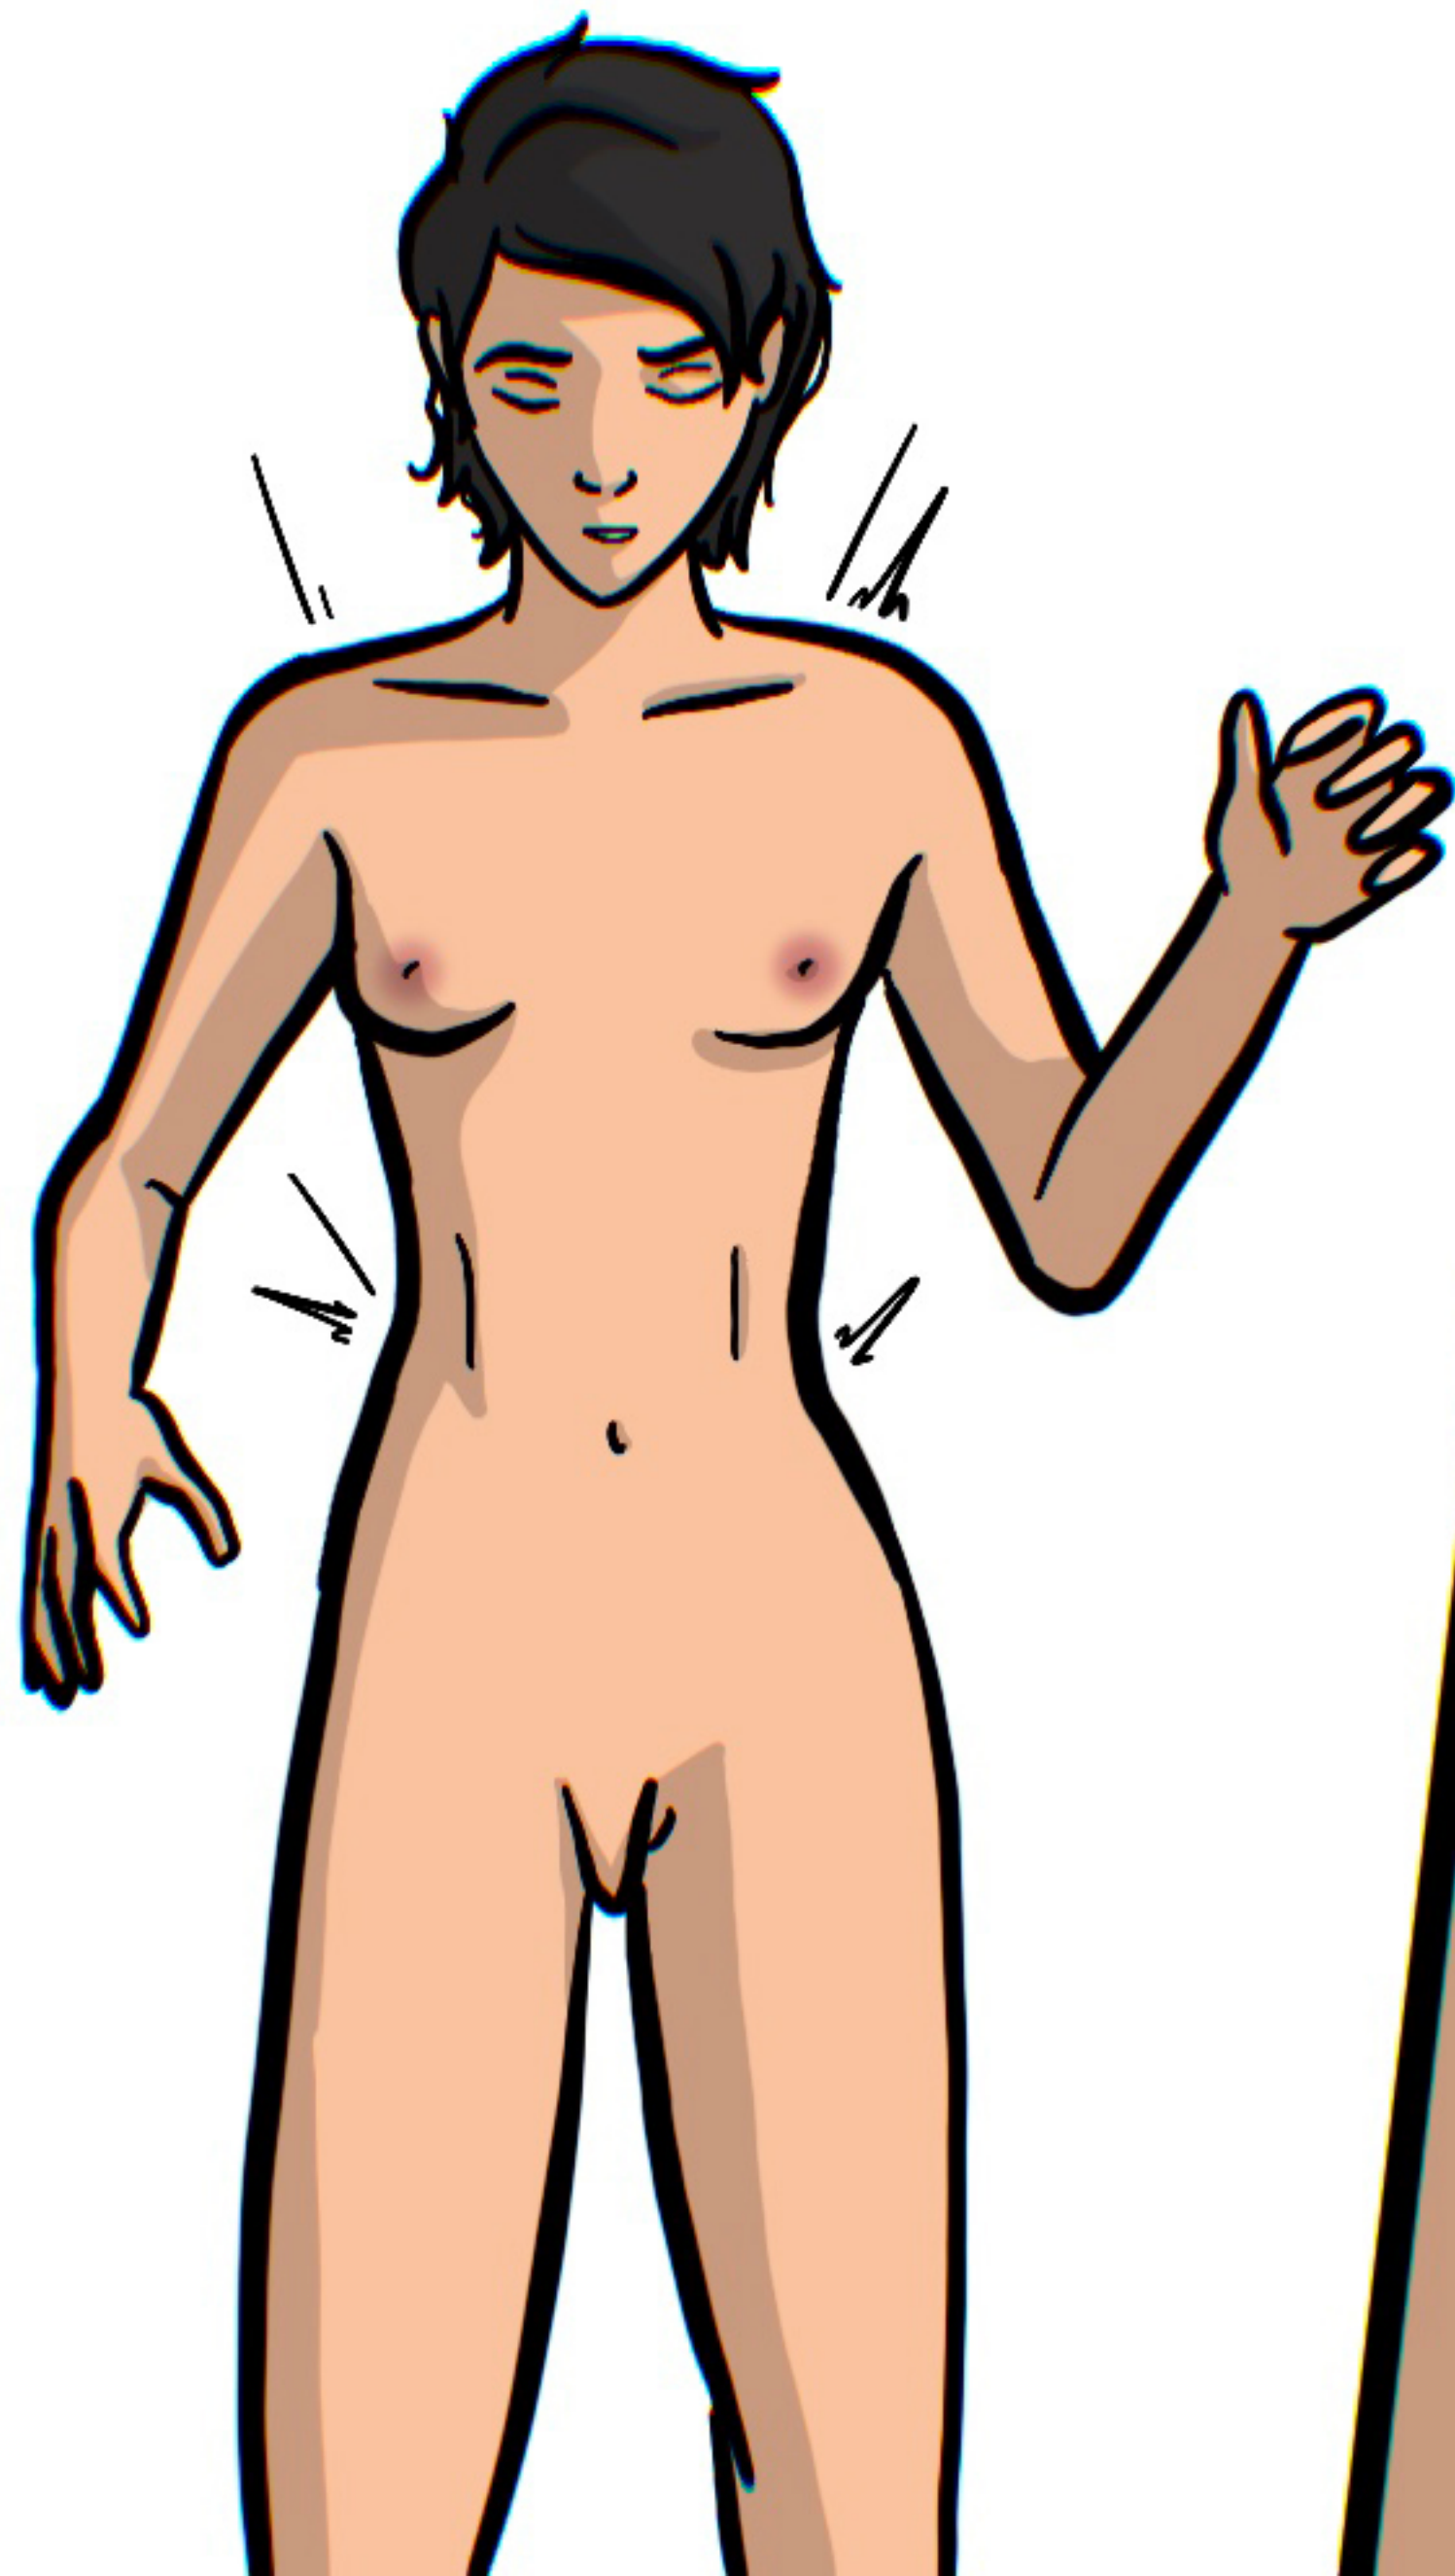

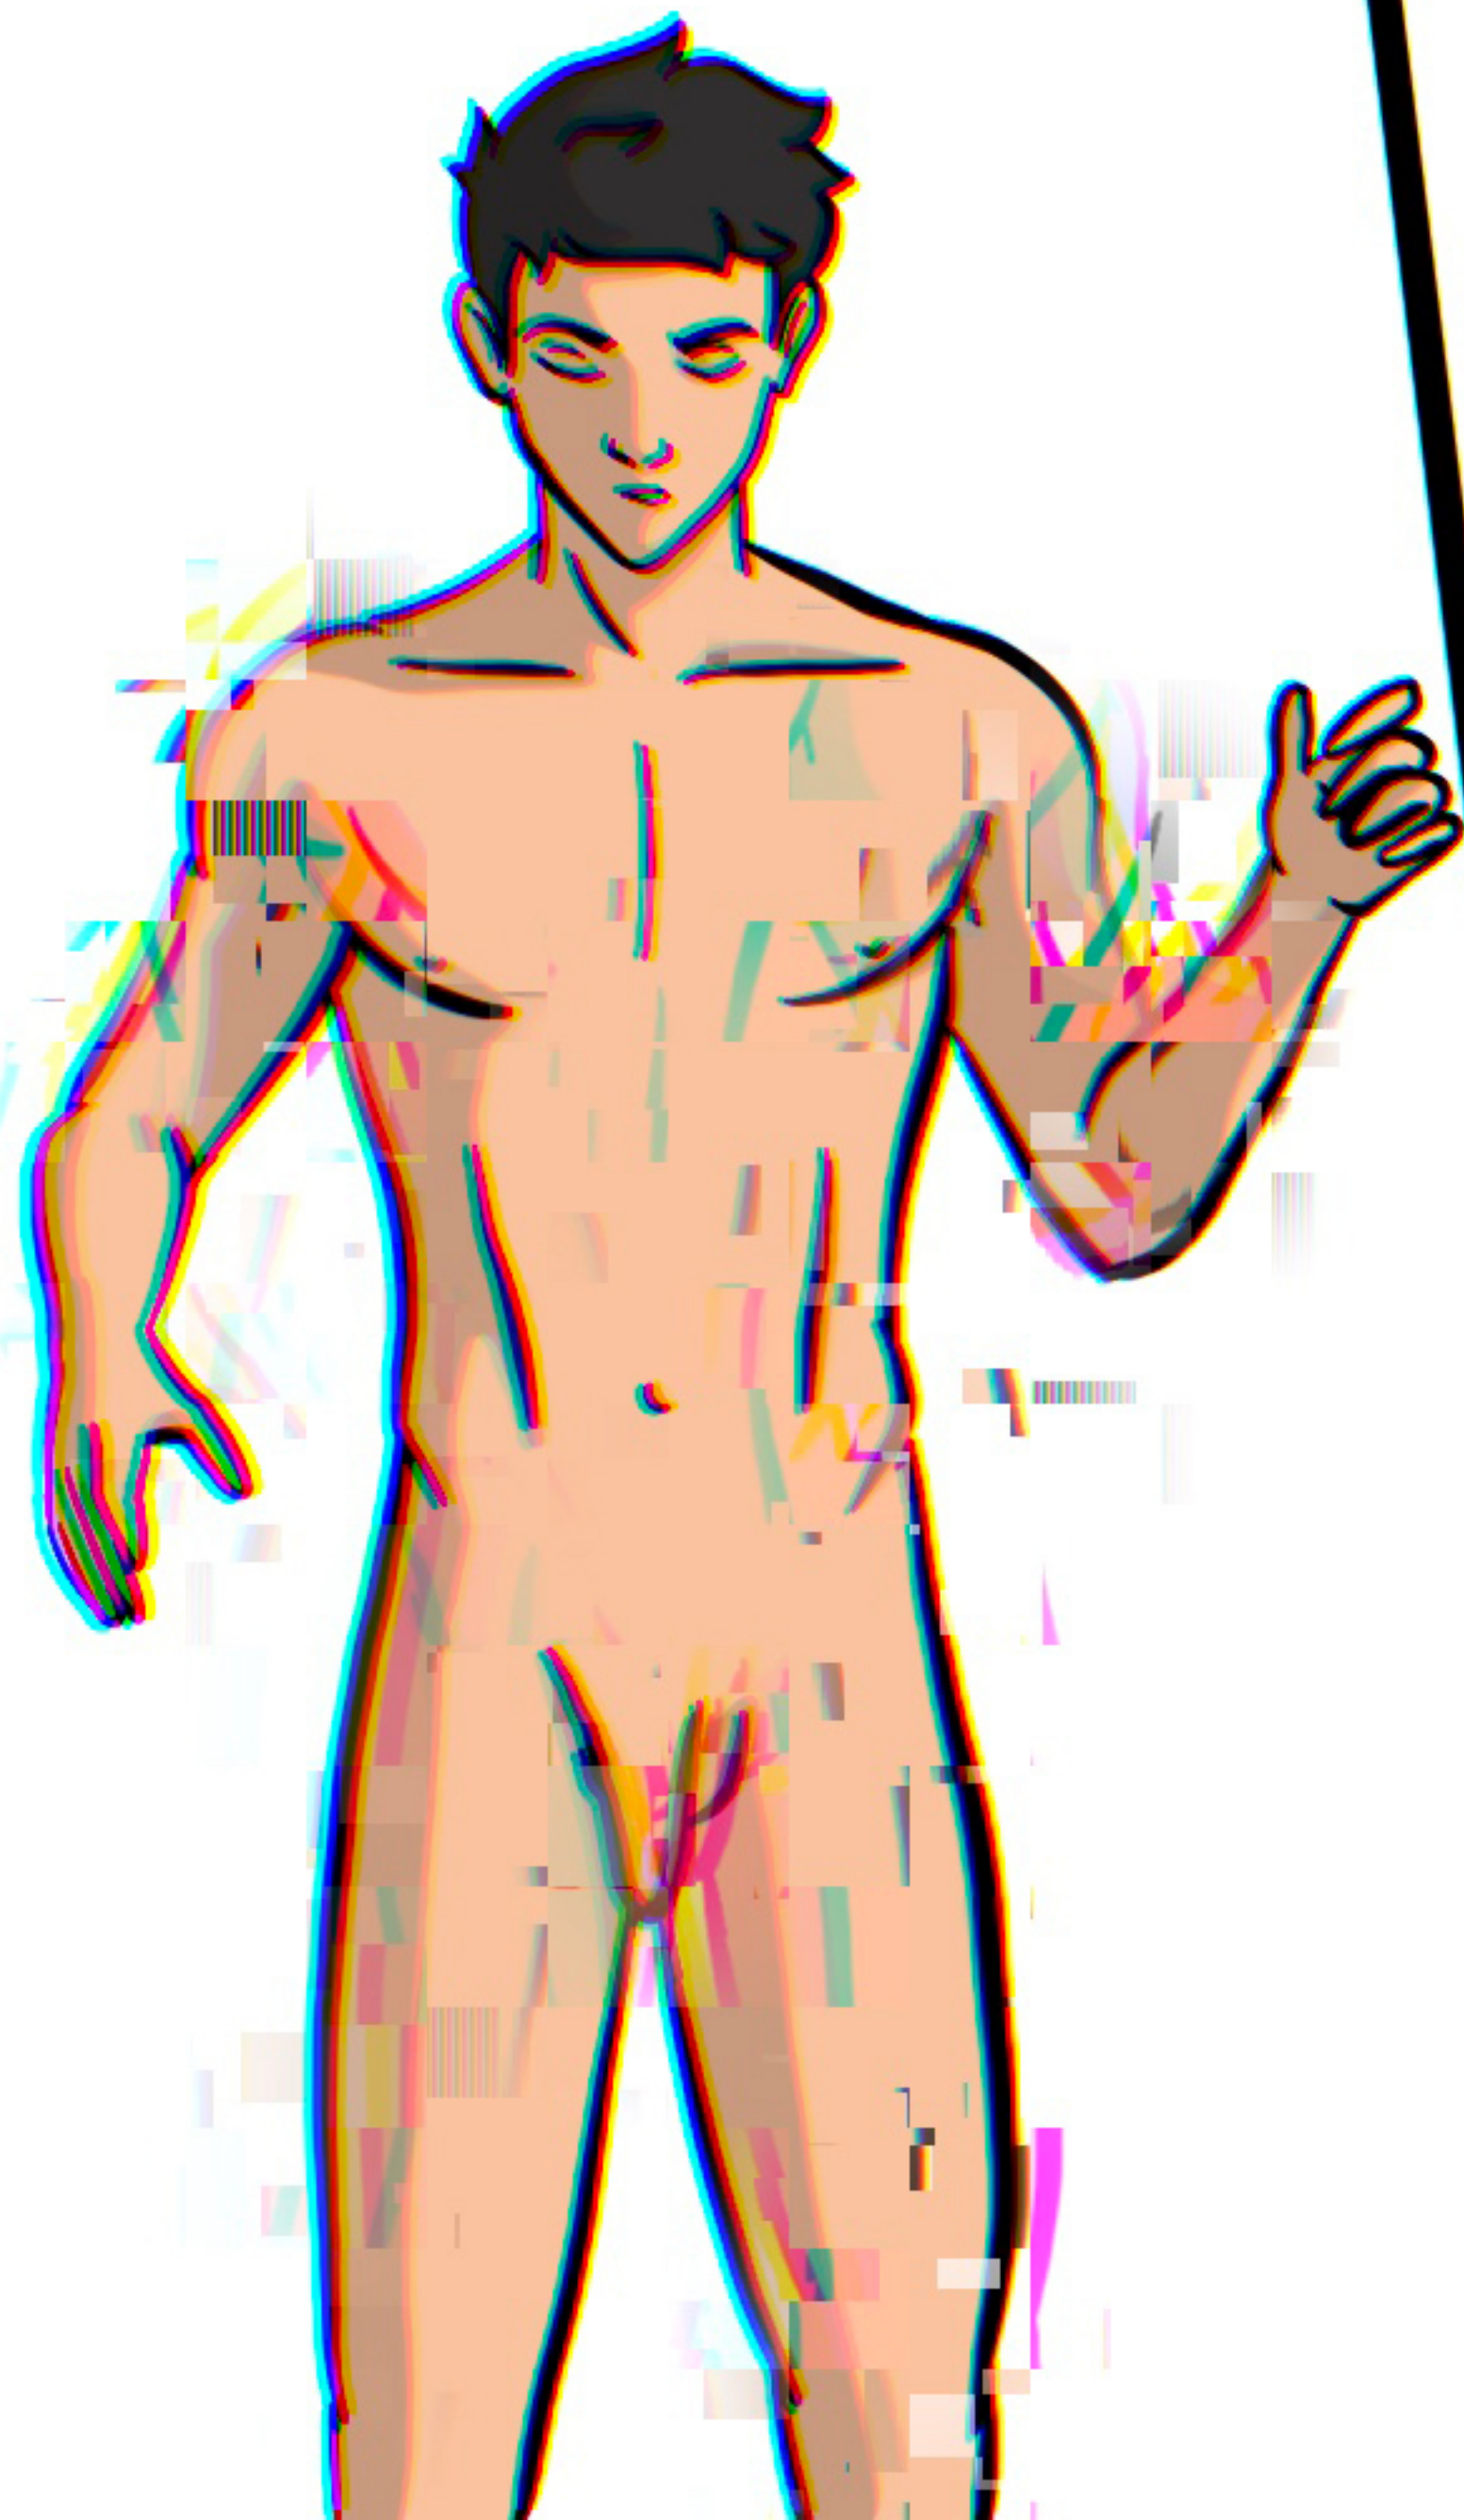

OK, LETS
SEE...

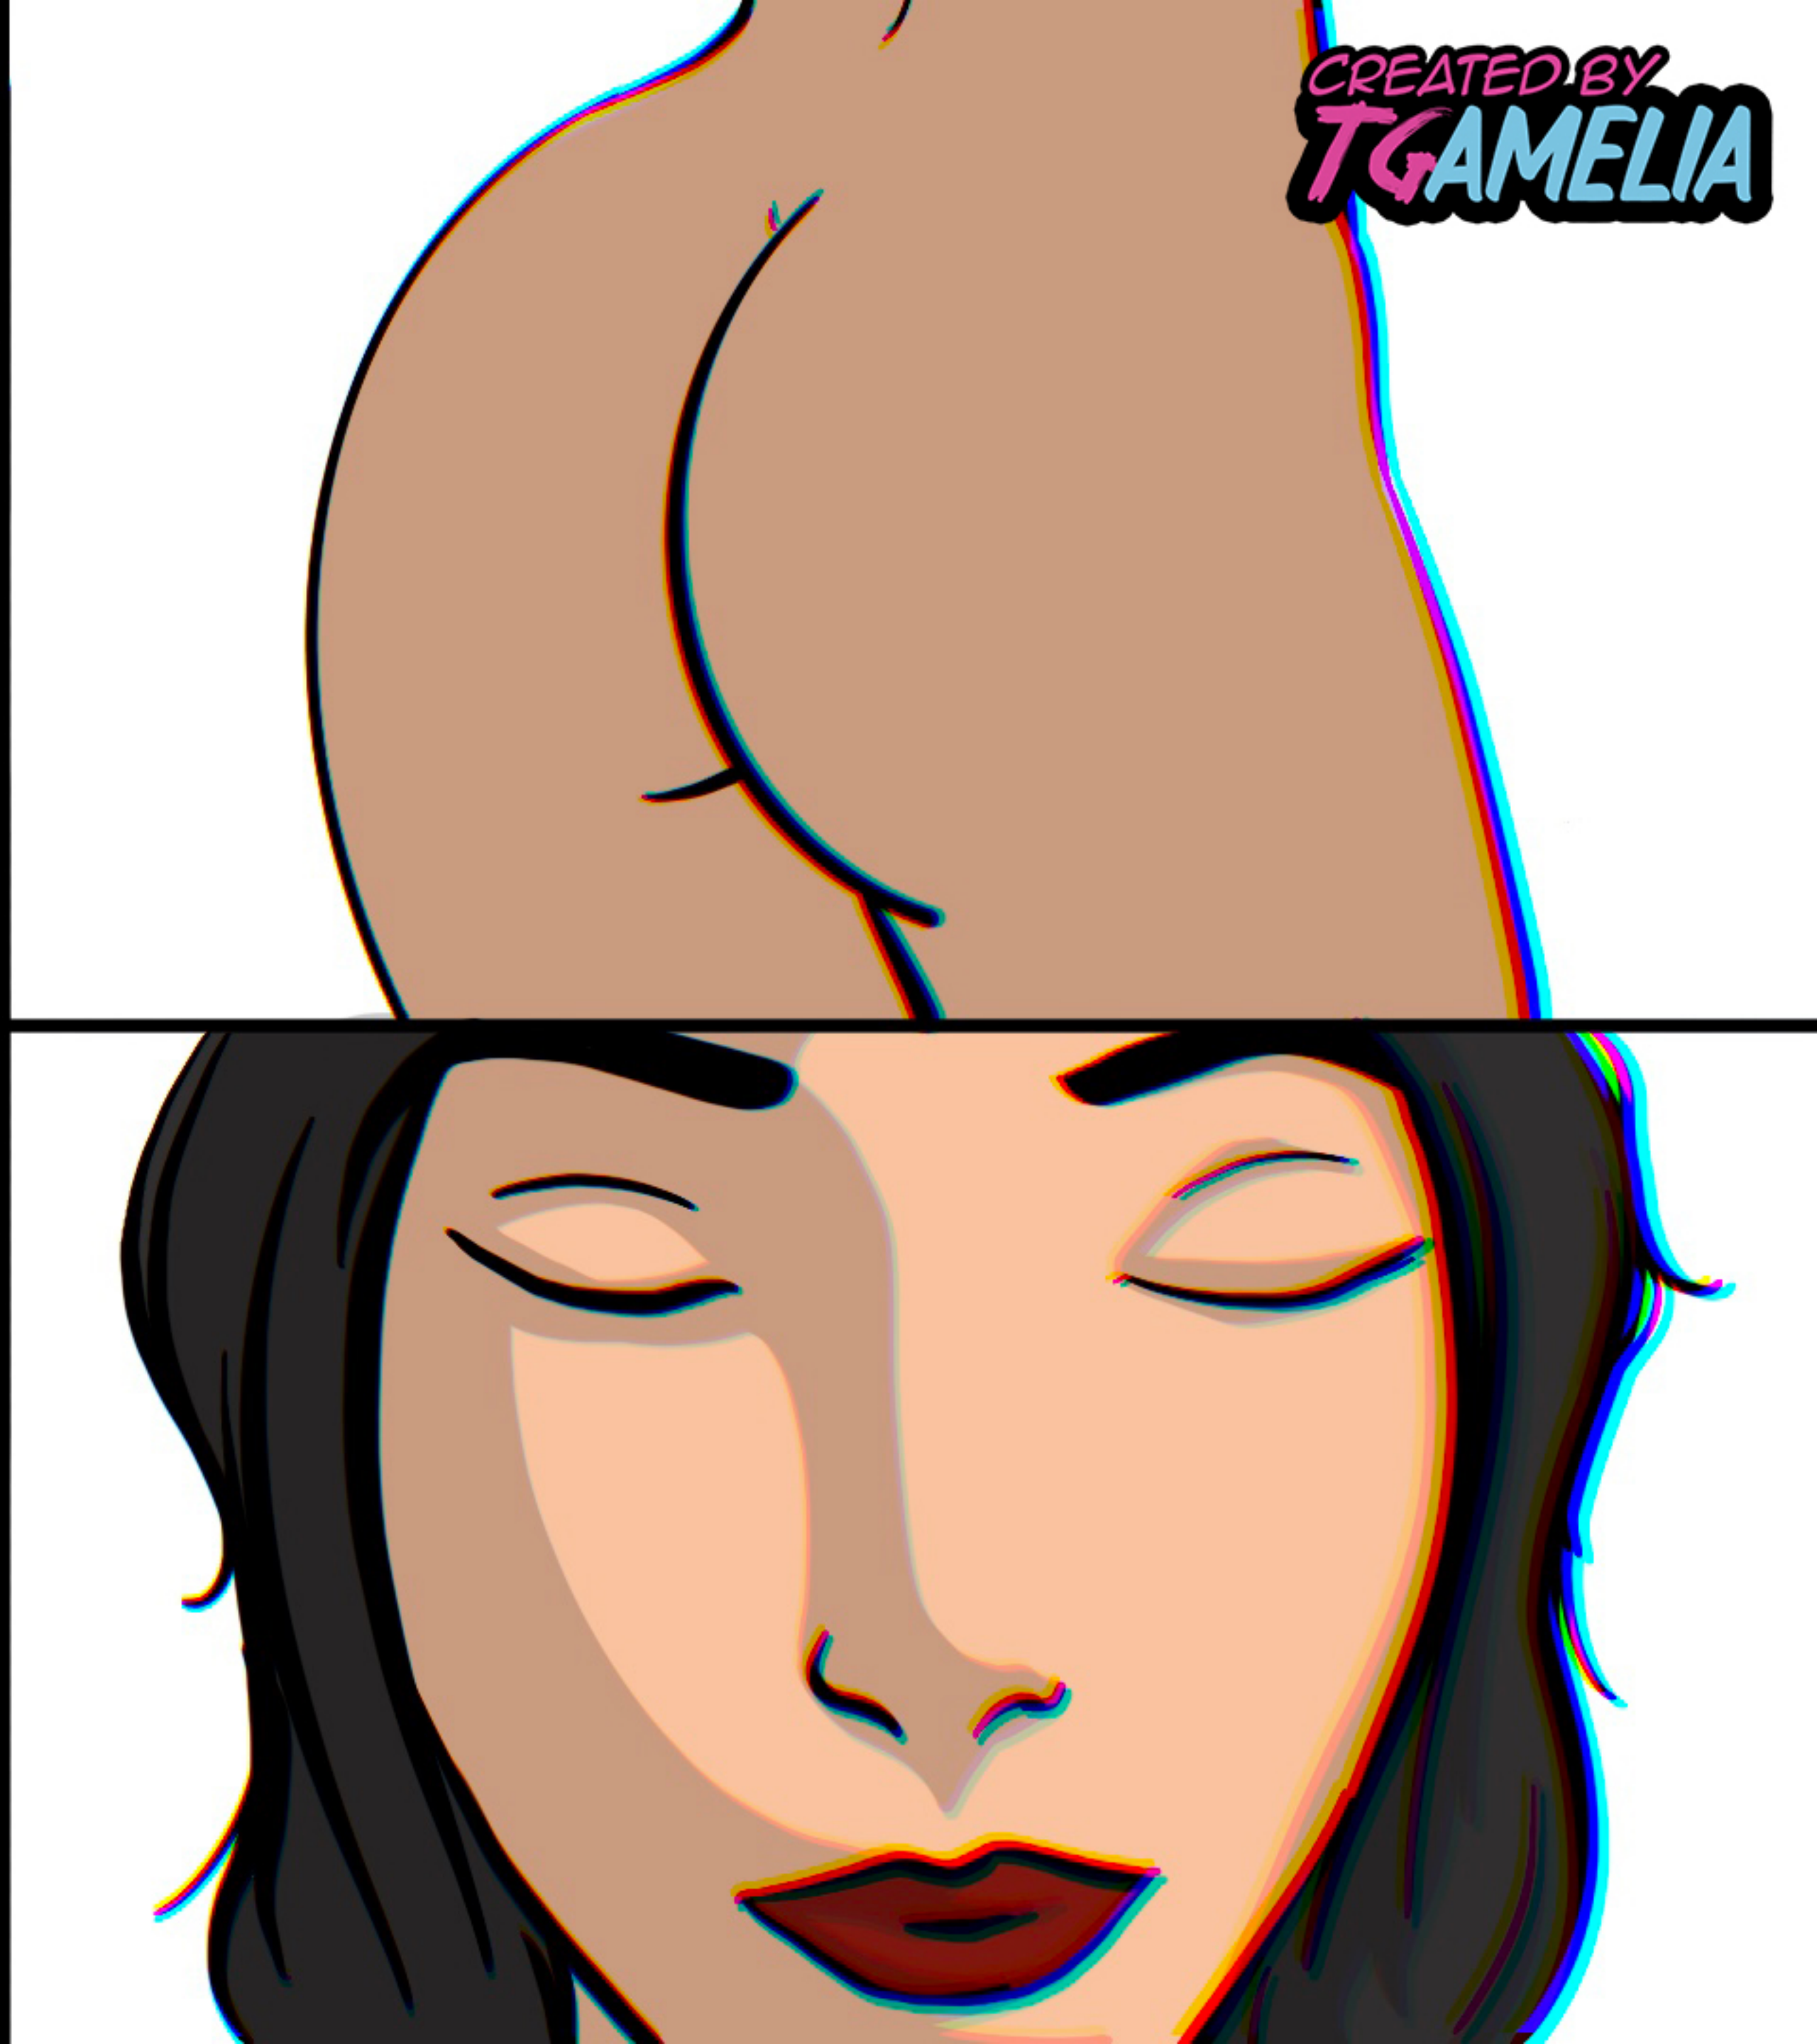

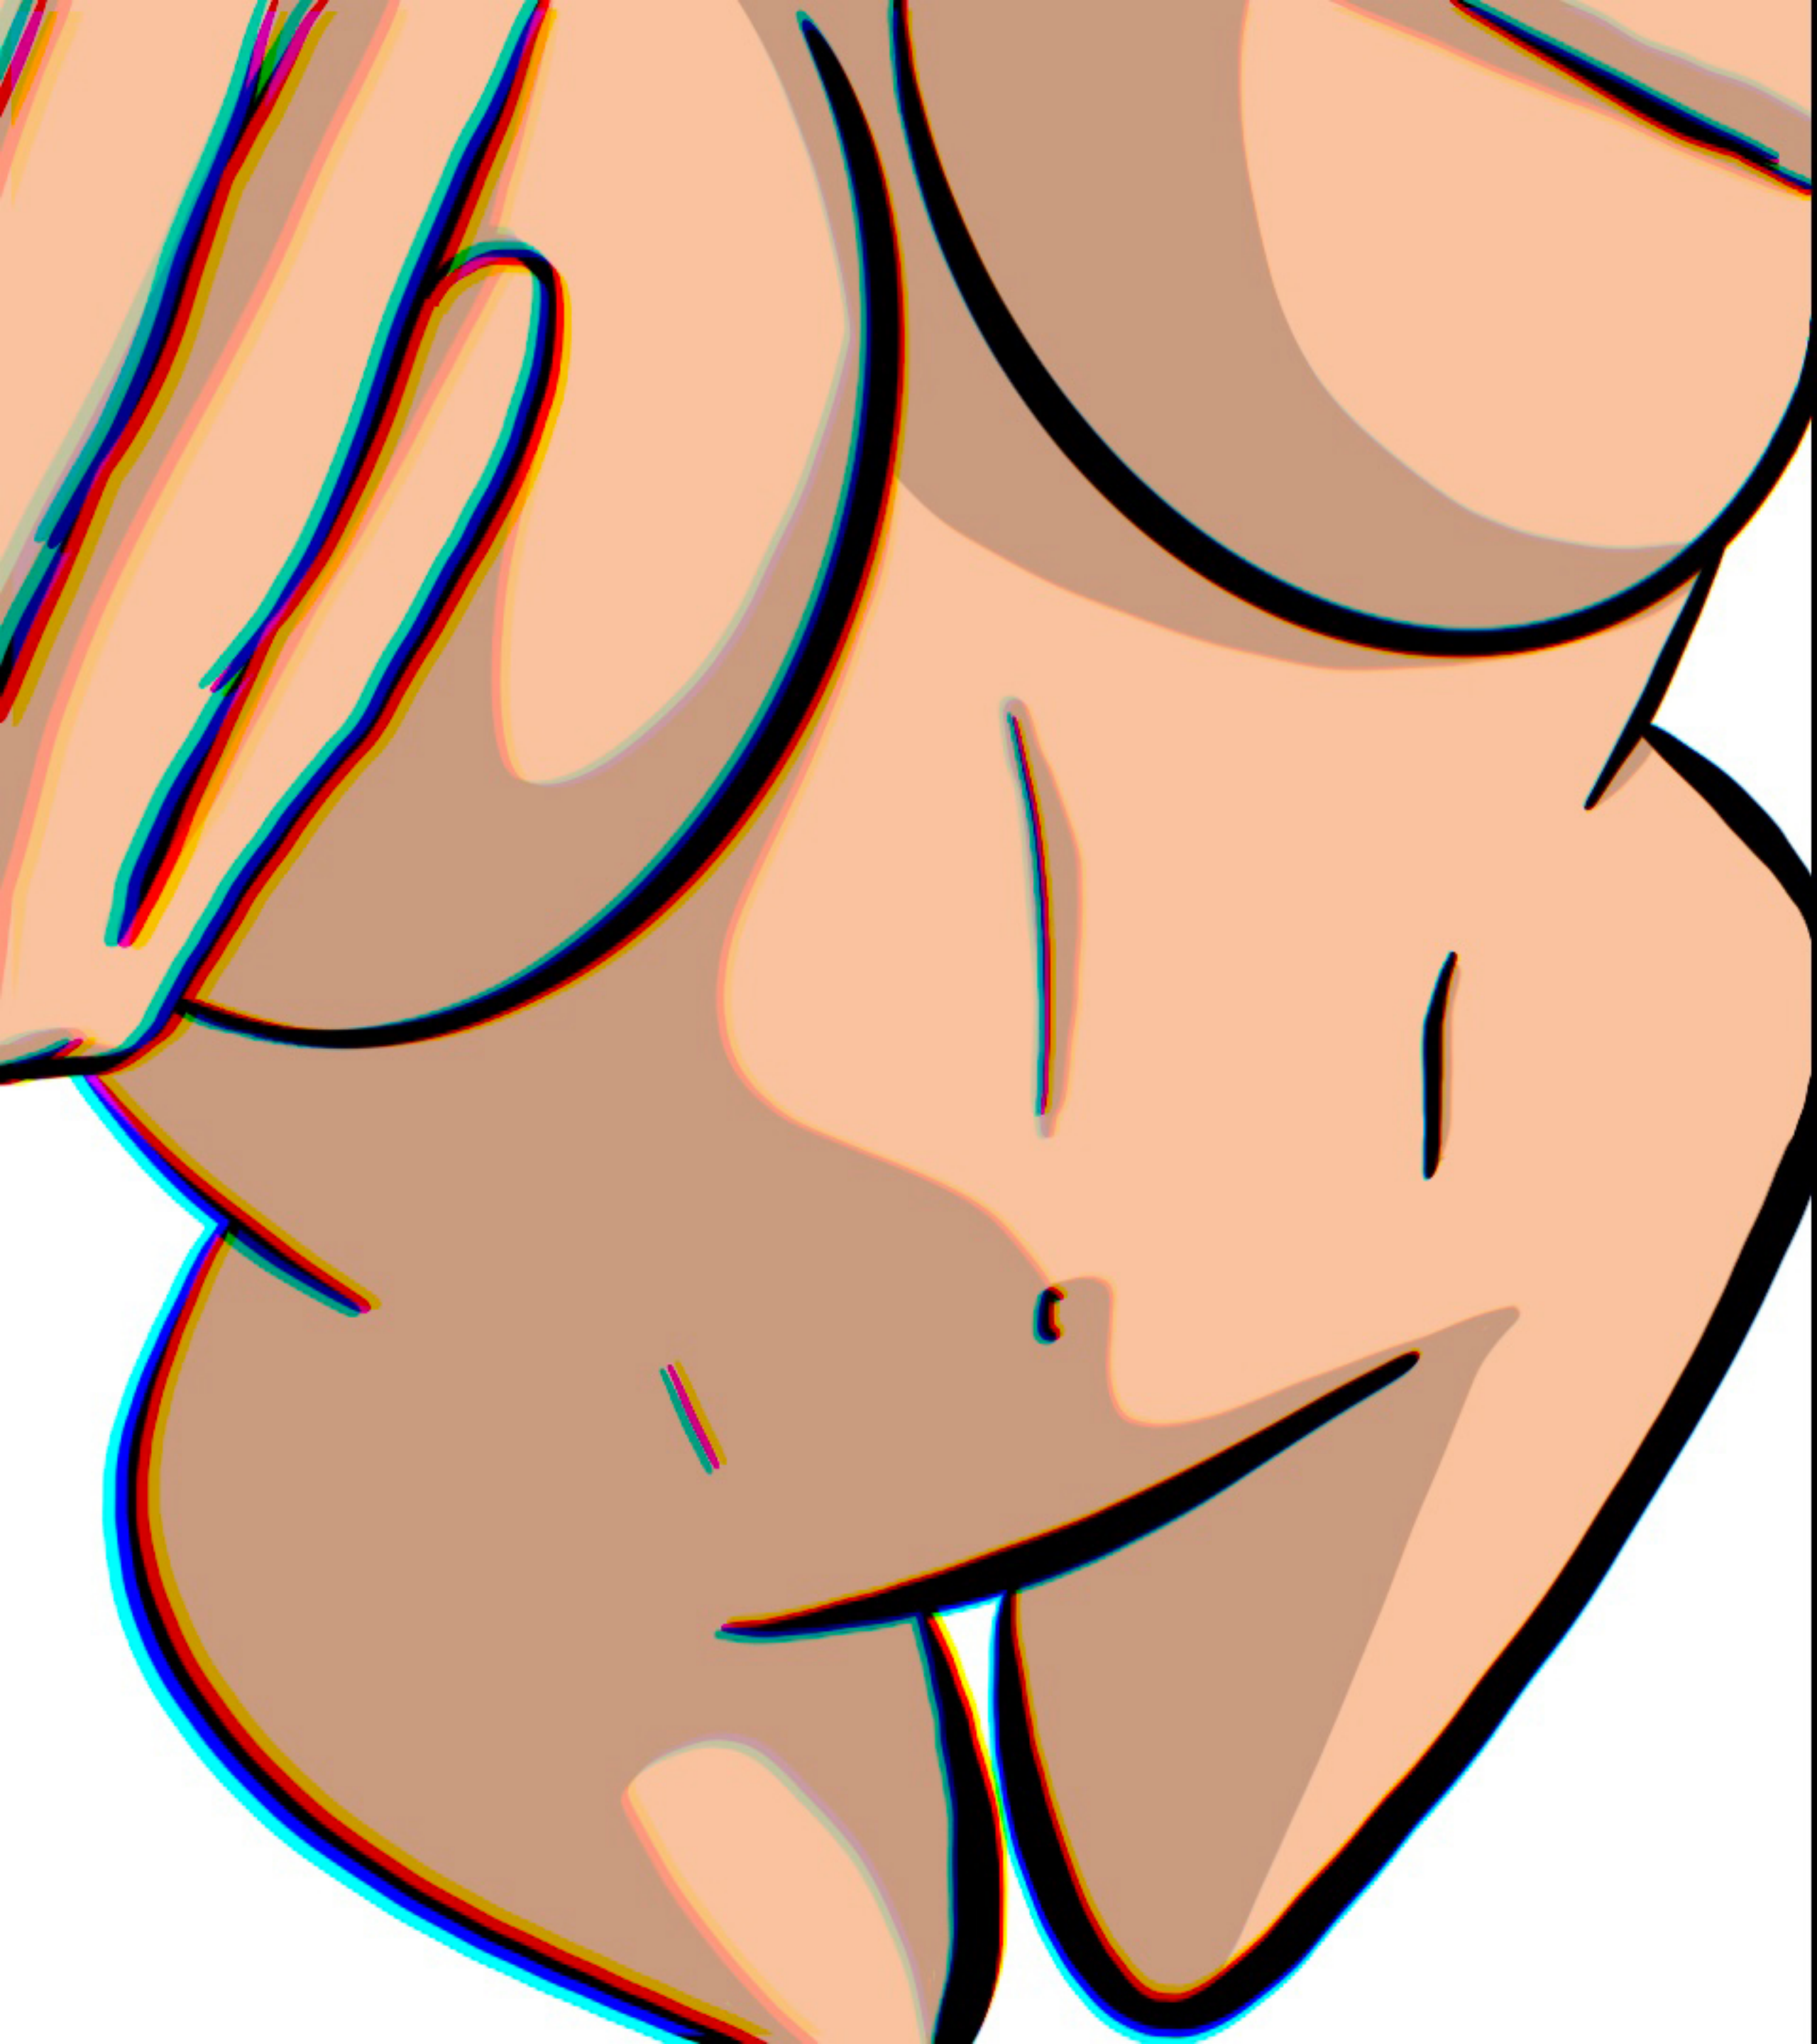

YEP!

THESE SETTINGS
LOOK GOOD.
