

NBNL V 0.8.1 Walkthrough

General tips

At the beginning of the game prioritize the Marina's route and getting recognition through Jenna's route and other events because recognition rank 1 opens up a lot of events

Topics related to stats will be painted with their respective color for example you need **recognition** rank 1 to progress in this event or picking choice B will get you extra **corruption**. And lastly the character's relationship will be in dark blue like that, this will improve your relationship with **Sharon**.

The guide will be separated between character in the same order as the notes in Nicole's cellphone, so if you want to look for someone in particular just write name+route example "Nicole route" I'll be using the same template and won't add the 's in the titles to make it easy for you to find the character you want.

When the option to start the event isn't obvious like meet with X in X's questline I tried to add the name of the event. And the event lines that don't have a specific character attached are at the end.

Characters

Introducción events (Before sandbox)

In this event the first decision is to masturbate or not, in the long term there are no consequences of your choice here. After that when talking to Sharon (the doctor) there will be 3 choices, only 2 will have some kind of effect the first one is "I'm not sure but I didn't want to hurt a child" which will improve Nicole's **charisma** and the other one is "The name does ring a bell but I don't understand why" which will improve relationship with **Sharon**.

When Nicole gets her cellphone back, the option to watch the movie doesn't have consequences aside from watching or skipping the scene and when Rebecca wants to grope Nicole letting her will improve relationship with **Rebecca**, the other choice doesn't have an effect

Later you'll be asked if you want to go to a bar or stay home, this choice is between Rebecca (go) or Sienna (Stay) and if you want to go it is recommended to have an acquaintance level relationship with Rebecca.

Bar: The first choice is to go back as soon as Elizabeth wants or stay in the bar, leaving will be continued in the Elizabeth part of this same section. When you find her with a guy if you "pretend to be her lover" **you'll improve the relationship** and this will lead to sex otherwise Nicole and Rebecca will go back home.

House: The movie genre won't have relevant consequences, but when Elizabeth wants help to get Sienna to sleep you can choose to "Go for a last bottle with Sienna" this will improve **Sienna's** relationship and have a scene or "Go to sleep now" Which will lead you to the Elizabeth side of this event

Elizabeth : This will improve [Elizabeth's](#) relationship with Nicole and will have a closing event for the night.

After meeting Lola none of the choices matter in this event, but while meeting Mia, "Didn't I had sex with her too?" will cause a flashback and will add some [corruption](#) the other choice will just skip the futa content. After that you'll have another choice, if you select "Channel the old Nicole and make her understand her place" this will improve Nicole's [corruption](#) again, the other choice will make Nicole try to be nice.

After meeting Jenna, if you choose to "Tease her a little bit more" this will improve [Jenna's](#) relationship, going back home if you keep watching the stream you'll end up watching a sex scene

While meeting Dani and Anri None of the choices have any lasting consequences.
