

**Mephisto
n red
body
armour
Step-by-step**

◆ Paints required

Red body armour

- Mephiston red
- Abaddon black
- Vermilion (Vallejo)
- White

Basecoat the armour with a 2:1 mix of mephiston red & abaddon black

Layer the middle of the left side of the armour with a 1:1 mix of mephiston red & vermillion., & on the right side of the armour focus more towards the very left with the same paint mix.

Now highlight in the middle of the previous layered areas with a 2:1 mix of vermilion & white.

Now its time to create some shade, and therefor also some contrast. Shade the areas where the body armour meets the black trim on each sides, with a 2:1 mix of abbadon black & mephiston red. Done!
