New features:

- You can now adjust how frequently morning events happen.
 - Click the in-game phone on the map screen, click "help", then "random events". There is a new slider near the bottom where you can adjust the chance from 0% - 100%.
 - You cannot choose which specific event you will see.
 - You must still meet the eligibility requirements for morning scenes that have any.
- Added the ability to pose for the art class.
 - You must be an art student and reached Harriet's scene 3.
 - Awards +2 lewdness.
- Added the ability to take girlfriends on dates.
 - Can only be done once a day.
 - Awards +3 affection.
 - Currently a fairly basic implementation, may be expanded upon later.
 - Scarlett needs to also be at relationship level 5 to take on dates.

Tweaks and balance changes:

- The back-end of how morning events occur has been rebuilt.
 - The new system should be better at prioritising events that haven't been seen and those that haven't been fully completed.
 - Some events can now occur on the weekend. Those that reference going to class still only occur on weekdays.
 - It also uses a much simpler probability calculation. Because of this, the chance of a morning event being triggered has been adjusted to 25% (previously 35%, except it wasn't really, because the mechanics were stupid).
- Added a marker to choices that lead to girlfriend routes.
- Teacher scene 2 knowledge requirements have been increased from 20 to 25.
- Added dialogue variants to various Hannah scenes, dependent on the events of her scene 5.

Bug fixes:

- Fixed Scarlett sleeping in on some weekend mornings.

- Fixed an error that could occur when replaying Ashley's scene 3.
- Fixed an error that could occur when replaying BFF's scene 5.
- Fixed BFF's scene 5 replay not correctly referencing the events in the ending monologue.
- Fixed that Scarlett's random living room event could trigger when RPG night is on.
- Fixed several typos.
