

Thank you for buying my base! I really appreciate it :)

## DOWNLOAD REQUIREMENTS

### Programs

VRChat Creator Companion

<https://vrchat.com/home/download>

Blender 3.0 or later (I use Blender 3.4, but the .blend files will NOT work before 3.0)

<https://www.blender.org/download/>

[Latest Poyomi Toon Shader](#) (Or at least, some version that has poyomi 8.0)

I recommend the VPM instead of the unitypackage though!

<https://poyomi.github.io/vpm/>

You only need [Pumkin's Avatar Tools](#) if you are doing either of these

- Having multiple SoapCats in 1 project
- Upgrading an old SoapCat to 1.5

## UPLOAD INSTRUCTIONS

Make sure you watch the tutorial video on how to upload, even if you've uploaded avatars to VRChat before! My bases work a bit different than other bases so they can be super customizable while also being optimized :)

### [ALL TUTORIALS PLAYLIST](#)

The MP4s are the same videos if you would like to have offline copies of them :)

-  [Main upload](#)
-  [Quest upload](#)
-  [Upgrading a pre-existing soapcat to 1.5](#)
  - I recommend backing up your project before updating! A lot of things will be overwritten (Animations and the FX layer mostly)
-  [Adding the Soap Bar DLC](#)
  - This was made for SoapDogs but the steps are completely identical for *any* avatar it's being put onto
-  [Adding the purr prefab](#)
  - When people get close to your face they'll hear a purr

### **Things to note**

- I am new to using Substance Painter, if you run into issues in Substance I may not be able to help.
  - Thank you to [Marona Minoi](#) on twitter for helping me out with Substance file :) You should give them a follow! I've since updated the file for the SoapCat 1.5 update but it still includes some of their work!
- I am providing Blender / Unity Support **only** for what is **needed** for uploading and using the base.

- Create explicit sexual / fetish edits or use for explicit content. (Basically: no NSFW)

- Use in Youtube / Twitter / TikTok / etc posts!
- Upload as a public avatar on VRChat
