INTRODUCTION

Hey everyone, it's Amy. In this tutorial, I'm going to be showing you how to paint the skin of a member of the Gnarlspirit Pack from the Gnarlwood warband.

This tutorial will cover painting dark skin tones, mixing paints to build up a smooth transition and glazing.

I hope you find this tutorial helpful!

STEP 0

Prime the miniature with an airbrush using **Vallejo Black Surface Primer** but you could also use a spray can or brush-on primer.

STEP 1

Basecoat the skin using **Bloodreaver Flesh**.

STEP 2

Apply **Rhinox Hide** to the eyes and mouth.

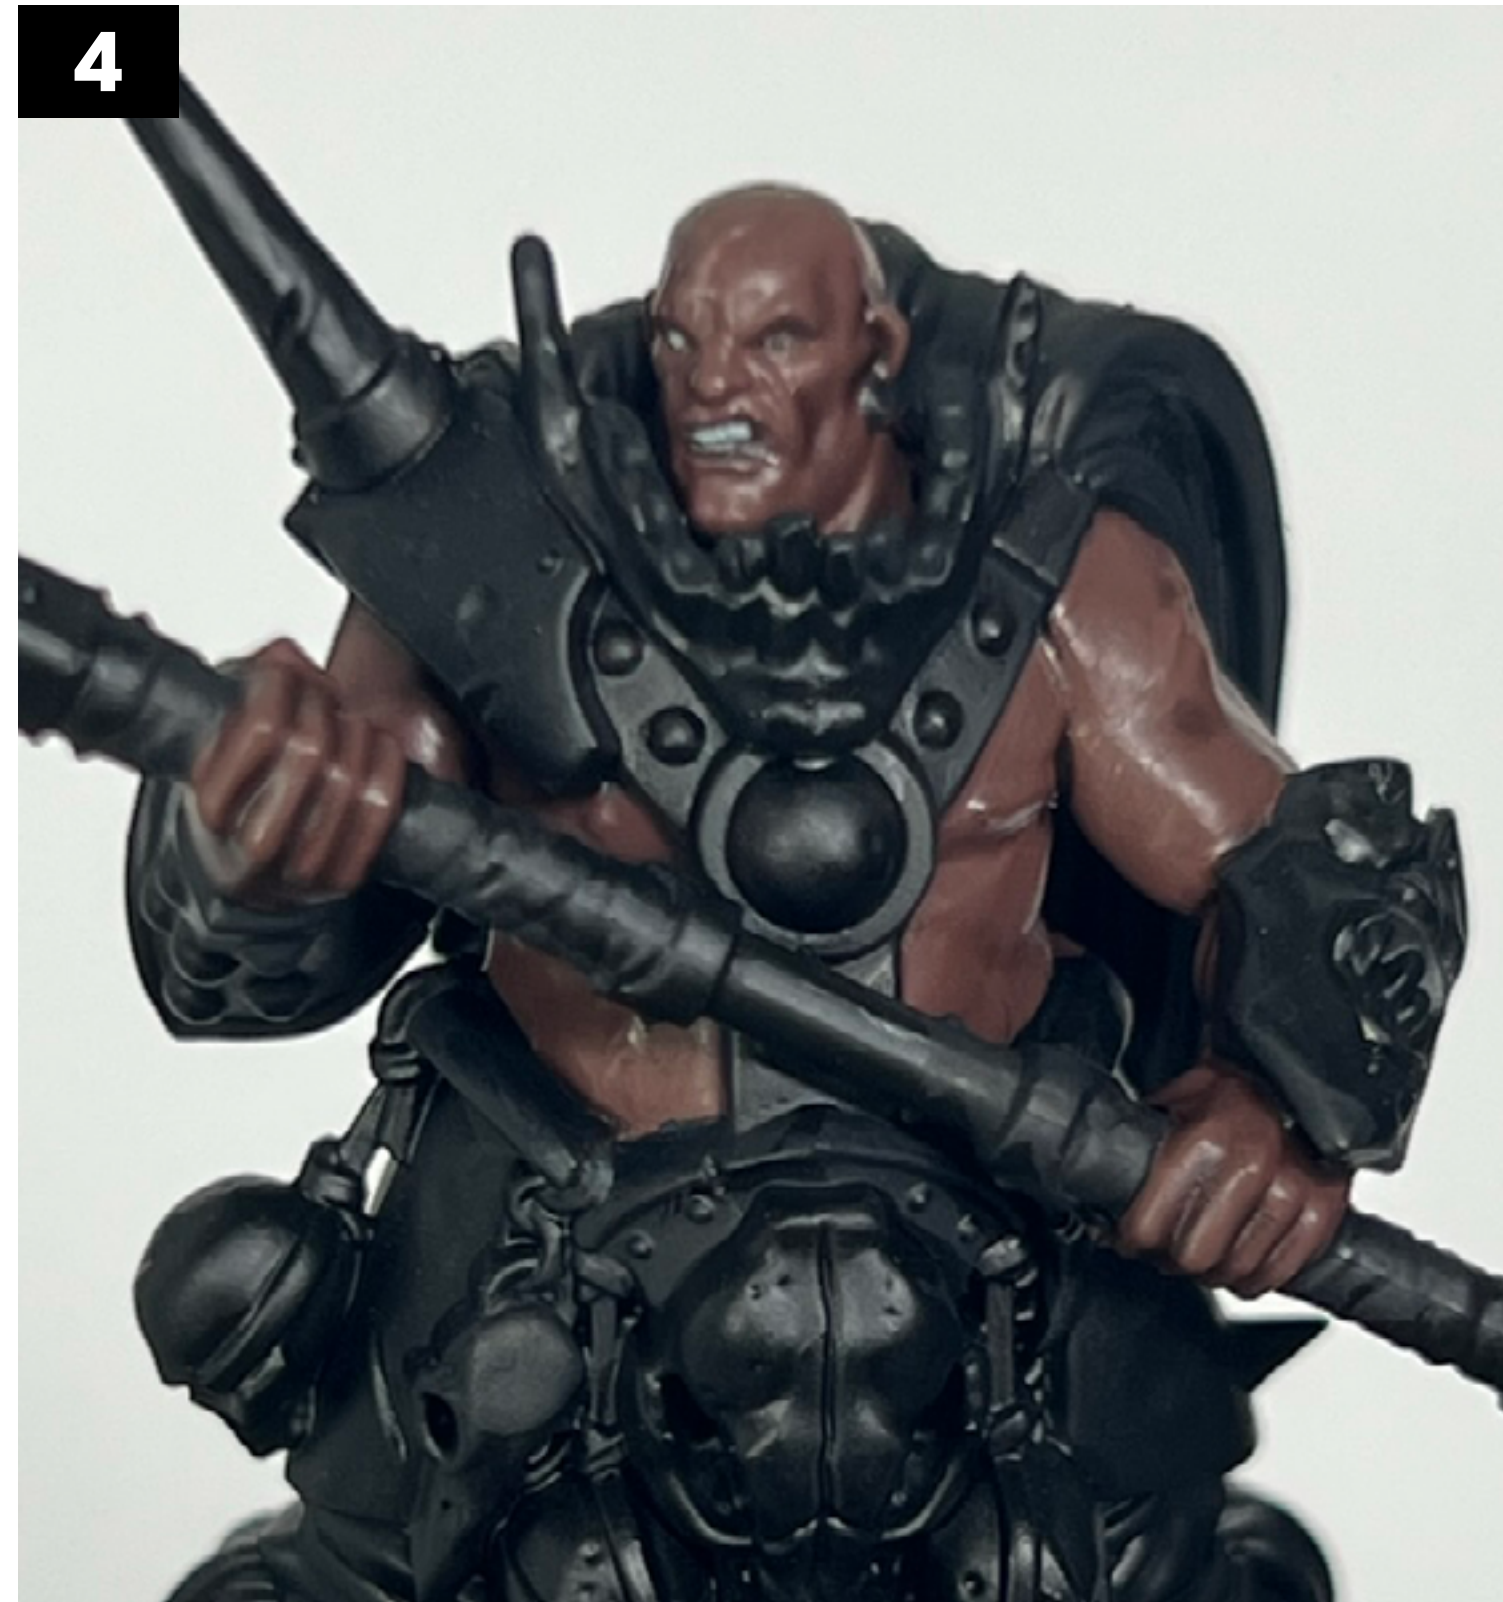

STEP 3

Paint the teeth and eyes with **Ulthuan Grey**.

On this guy, I've painted the right eye entirely so it looks blind to tie in to the scar on the face.

STEP 4

Apply **Targor Rageshade** to all of the skin. This will flow into the recesses and will make picking them out later easier.

STEP 5

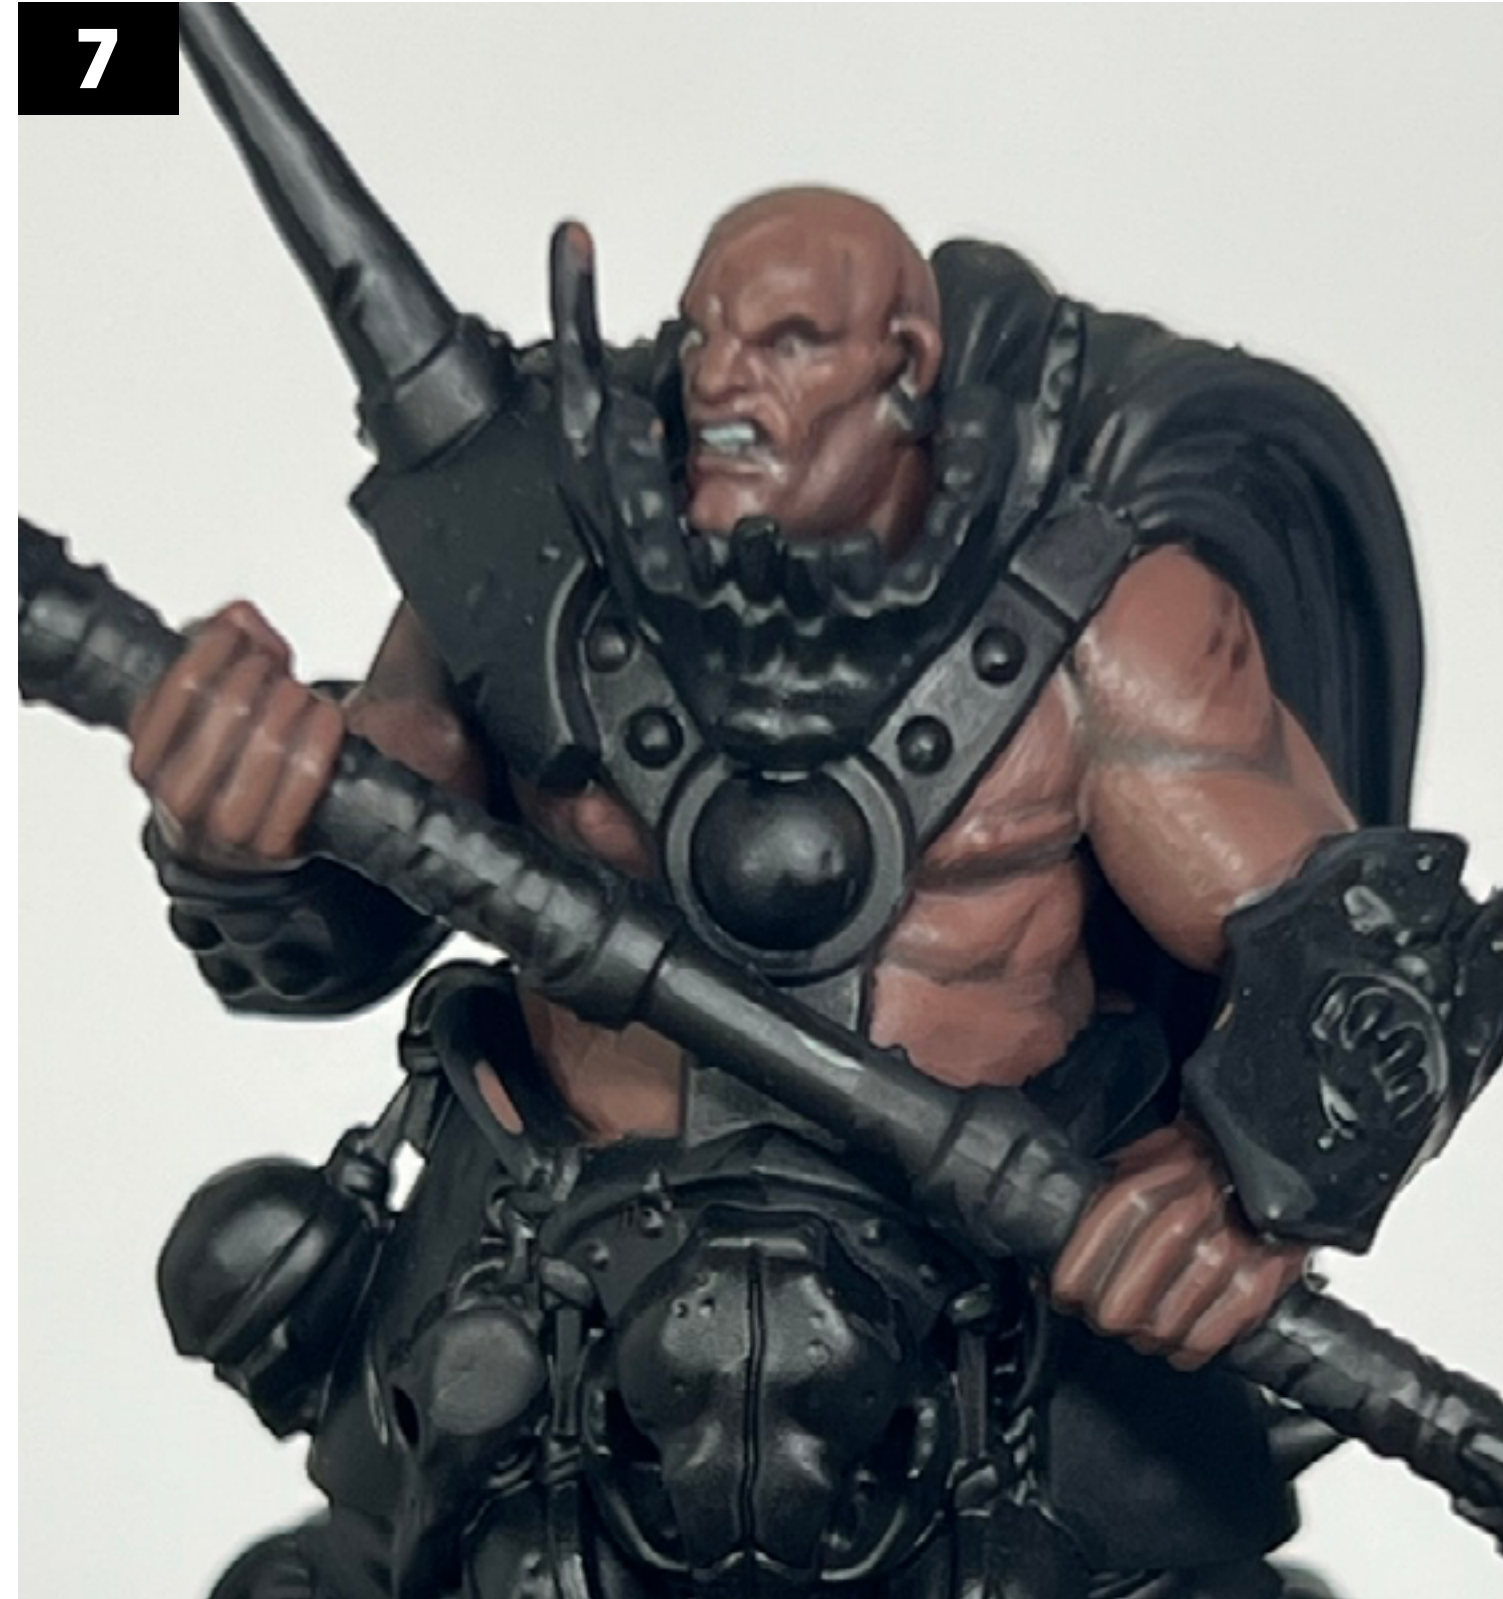

Apply **Rhinox Hide** to the recesses of the skin.

STEP 6

Re-apply **Bloodreaver Flesh** to the skin, leaving the darker browns in the recesses.

Apply a mix of **Bloodreaver Flesh** 1:1 **Knight Questor Flesh** to the upper portions of the skin.

STEP 8

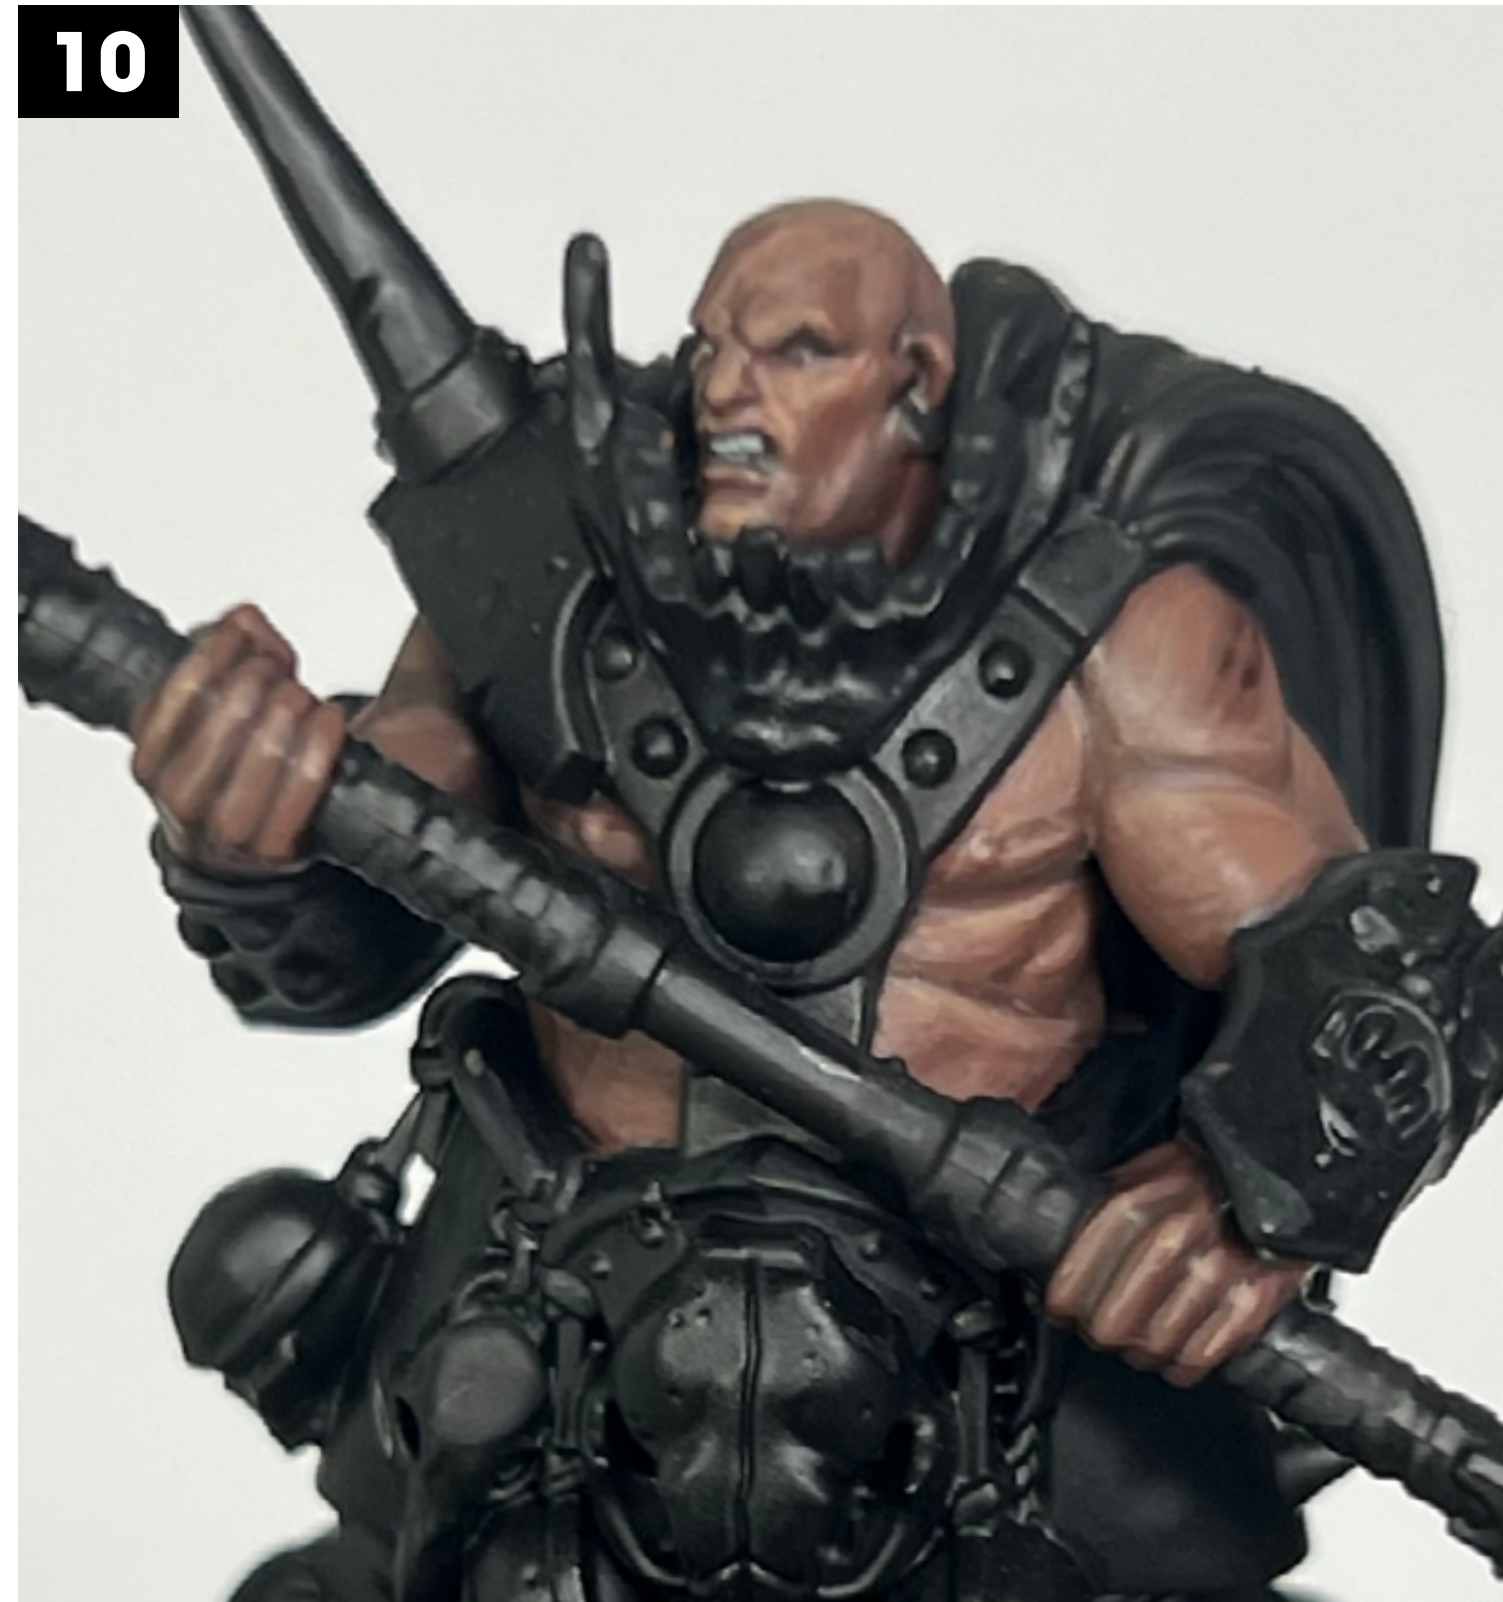

Apply **Knight Questor Flesh** to the raised surfaces of the skin.

STEP 9

Glaze **Bloodreaver Flesh** into the recesses to soften the transition between colours.
